Well-Prepared Dumps ISO-IEC-27001-Foundation Free - Effective ISO-IEC-27001-Foundation Exam Tool Guarantee Purchasing Safety

In the same way, IE, Firefox, Opera and Safari, and all the major browsers support the web-based APMG-International ISO-IEC-27001-Foundation practice test. So it requires no special plugins. The web-based ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) practice exam software is genuine, authentic, and real so feel free to start your practice instantly with ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) practice test.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

| Topic | Details |
|---------|---|
| Topic 1 | <ul style="list-style-type: none"> • Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information. |
| Topic 2 | <ul style="list-style-type: none"> • Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength. |
| Topic 3 | <ul style="list-style-type: none"> • Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal. |
| Topic 4 | <ul style="list-style-type: none"> • Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems. |
| Topic 5 | <ul style="list-style-type: none"> • Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity. |
| Topic 6 | <ul style="list-style-type: none"> • Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity. |
| Topic 7 | <ul style="list-style-type: none"> • Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards. |

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q44-Q49):

NEW QUESTION # 44

In an audit, what is the definition of an observation?

- A. A non-fulfilment of a requirement of ISO/IEC 27001
- B. An issue raised by an interested party
- C. A conformity to the standard where there is an opportunity for improvement
- D. An issue excluded from the scope of the standard

Answer: C

Explanation:

ISO/IEC 27001 mandates internal audits (Clause 9.2) and continual improvement (Clause 10.1) but does not define the specific audit term "observation." However, the audit framework in 9.2 requires an audit programme and impartial auditors, and management review inputs include "feedback on the information security performance including trends in... audit results" and "opportunities for continual improvement."

The companion implementation guidance (ISO/IEC 27002) reinforces the concept of opportunities for improvement in the review of policies: "The reviews should include assessing opportunities for improvement and the need for changes to the approach to information security..." In practical ISO audit usage (aligned with ISO 19011 guidance referenced in the Study Guide), an observation is a recorded conformity where improvement is advisable—commonly termed an Opportunity for Improvement (OFI). The Study Guide's internal audit section emphasizes running an audit programme to identify "potential areas of weakness or non-compliance," supporting the notion of recording improvement opportunities alongside nonconformities. Therefore, within ISO/IEC 27001 audit practice, the best-fit definition is B: a conformity where there is an opportunity for improvement.

NEW QUESTION # 45

Identify the missing word(s) in the following control relating to the Policies for information security control.

"Information security policy and topic-specific policies should be defined, approved by management, [?] and acknowledged by relevant personnel and relevant interested parties, and reviewed at planned intervals and if significant changes occur."

- A. communicated to

- B. published, communicated to
- C. established and maintained
- D. published

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.1 (Policies for information security) states:

"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to and acknowledged by relevant personnel and relevant interested parties, and reviewed at planned intervals and if significant changes occur." This confirms that the missing words are "published, communicated to." The control emphasizes not just defining and approving policies but ensuring they are actively distributed and communicated so that relevant stakeholders are aware of and acknowledge them. Options A, B, and D are partial but incomplete.

Thus, the correct answer is C.

NEW QUESTION # 46

Which audit activity related to ISO/IEC 27001 may be carried out by a practitioner?

- A. Conduct an audit of a Certification Body
- B. Conduct an internal audit of the organization
- C. Conduct a surveillance audit of their own area of the organization
- D. Conduct an audit of an Accredited Training Organization

Answer: B

Explanation:

ISO/IEC 27001 requires internal audits and sets out how they must be conducted: "The organization shall conduct internal audits at planned intervals..." (9.2.1) and "plan, establish, implement and maintain an audit programme(s)... [and] select auditors and conduct audits that ensure objectivity and the impartiality of the audit process" (9.2.2). These extracts confirm that practitioners (internal to the organization) can conduct internal audits provided objectivity and impartiality are ensured (e.g., they do not audit their own work). Surveillance audits (option A) and audits of Accredited Training Organizations or Certification Bodies (options C, D) are third-party activities outside the remit of an internal practitioner under ISO/IEC 27001; the standard's audit requirement is focused on the organization's own internal audit programme. Therefore, conducting an internal audit (B) is the correct practitioner activity per Clause 9.2.

NEW QUESTION # 47

What is the definition of a threat according to ISO/IEC 27000?

- A. A potential cause of an unwanted incident which can result in harm to a system or organization
- B. A single or a series of unwanted or unexpected information security events
- C. A weakness of an asset or a control that can be exploited
- D. The risk remaining after risk treatment

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

According to ISO/IEC 27000:2018, Clause 3.74, a threat is defined as:

"Potential cause of an unwanted incident, which can result in harm to a system or organization." This definition directly matches option A.

* Option B refers to an "information security incident" (ISO/IEC 27000:2018, Clause 3.32).

* Option C describes a "vulnerability" (ISO/IEC 27000:2018, Clause 3.67).

* Option D refers to "residual risk" (ISO/IEC 27000:2018, Clause 3.61).

The standard emphasizes that threats exploit vulnerabilities, causing incidents that can harm information confidentiality, integrity, and availability. Correctly identifying threats is critical for risk assessment (Clause 6.1.2). Thus, the correct definition per ISO/IEC 27000 is A.

NEW QUESTION # 48

When are the information security policies required to be reviewed, according to the Policies for information security control?

- A. Every six months
- B. According to a schedule defined by the Certification Body
- **C. At planned intervals and if significant changes occur**
- D. Annually

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.1 (Policies for information security) specifies:

"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to and acknowledged by relevant personnel and relevant interested parties, and reviewed at planned intervals and if significant changes occur." This clearly identifies the review frequency requirement: planned intervals and whenever there are significant changes. Options A and B (six-monthly or annually) are not prescribed by ISO - timing is left to the organization. Option C is also wrong, since Certification Bodies do not dictate policy review schedules.

Therefore, the verified correct answer is D.

NEW QUESTION # 49

.....

Do you want to pass the exam with the least time? If you do, you can choose us, we can do that for you. ISO-IEC-27001-Foundation exam cram is high-quality, and it can help you pass the exam just one time. You just need to spend about 48 to 72 hours on practicing that you can pass the exam. Besides, you can obtain the download link and password within ten minutes after payment for ISO-IEC-27001-Foundation Training Materials. In order to make you get the latest information for ISO-IEC-27001-Foundation training materials, we offer you free update for one year after buying, and the latest version for ISO-IEC-27001-Foundation exam materials will be sent to your email automatically.
