That is the reason PassExamDumps has compiled a triple-formatted ISO-IEC-27001-Foundation exam study material that fulfills almost all of your preparation needs. The APMG-International ISO-IEC-27001-Foundation Practice Test is compiled under the supervision of 90,000 APMG-International professionals that assure the passing of the ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) exam on your first attempt.

# APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q24-Q29):

**NEW QUESTION # 24**
Which of the following statements about the differences between an internal audit and a certification audit is true?
An internal audit is conducted at planned intervals and a certification audit is conducted annually An internal audit is known as a 1st party audit and a certification audit is known as a 3rd party audit

- A. Only 2 is true
- B. Both 1 and 2 are true
- C. Only 1 is true
- D. Neither 1 or 2 is true

**Answer: A**

Explanation:
ISO/IEC 27001 Clause 9.2 requires internal audits to be conducted at planned intervals, but it does not specify an annual frequency. Certification audits, under ISO/IEC 17021 rules, typically occur on a 3-year cycle with annual surveillance, not strictly "annually." This makes statement 1 inaccurate.
Audit types are defined in ISO/IEC 19011:
First-party audits: conducted internally by or on behalf of the organization (internal audits).
Third-party audits: conducted by independent external certification bodies.
Thus, statement 2 is correct. Therefore, the accurate choice is B: Only 2 is true.

**NEW QUESTION # 25**
Which item is required to be defined when planning the organization's risk assessment process?

- A. The parts of the ISMS scope which are excluded from the risk assessment
- B. The criteria for acceptable levels of risk
- C. How the effectiveness of the method will be measured
- D. There are NO specific information requirements

**Answer: B**

Explanation:
Clause 6.1.2 (Information security risk assessment) requires organizations to "define and apply an information security risk assessment process that... establishes and maintains information security risk criteria, including criteria for accepting risk." This means that acceptable levels of risk (risk acceptance criteria) must be explicitly defined. These criteria ensure consistent decision-making when evaluating whether identified risks need further treatment or can be tolerated.

Option A is incorrect because exclusions relate to the ISMS scope (Clause 4.3), not risk assessment planning.
Option B is not a requirement; effectiveness of risk assessment methods is not required to be measured, though methods must be applied consistently. Option D is false-the standard clearly specifies required elements for risk assessment.
Thus, the correct answer isC: The criteria for acceptable levels of risk.

## NEW QUESTION # 26
Identify the missing word(s) in the following sentence.
When planning the ISMS, the organization is specifically required to plan actions to address risks and opportunities and how to [ ? ] these actions.

- A. evaluate the effectiveness of
- B. improve the effectiveness of
- C. apply competent resources to
- D. communicate

**Answer: A**

Explanation:
Clause 6.1.1 (Planning) states:
"The organization shall plan:
d) actions to address these risks and opportunities; and
e) how to:
* integrate and implement the actions into its ISMS processes; and
* evaluate the effectiveness of these actions."
This confirms the missing words are"evaluate the effectiveness of". Communication (A), applying resources (B), and improving effectiveness (C) are important concepts elsewhere but not the direct requirement stated in this clause.

## NEW QUESTION # 27
Which factor is required to be determined when understanding the organization and its context?

- A. Internal issues affecting the purpose of the ISMS
- B. The information security objectives relevant to the ISMS
- C. The ISO/IEC 27001 clauses which apply to the management system
- D. The processes that will be required to operate the ISMS

**Answer: A**

Explanation:
Clause 4.1 specifies exactly what must be determined when establishing context: "The organization shall determine external and internal issues that are relevant to its purpose and that affect its ability to achieve the intended outcome(s) of its information security management system." This requirement is about understanding internal and external issues (e.g., culture, capabilities, regulatory environment) that influence the ISMS's effectiveness. Objectives (option B) are addressed later in Clause 6.2; processes (option C) are addressed in Clause 4.4 and operational planning; and "which clauses apply" (option D) is not a determination step-ISO/IEC 27001's requirements in Clauses 4-10 are not optional. Therefore, the direct, required factor per 4.1 is determining internal (and external) issues relevant to the organization's purpose and ISMS outcomes.

## NEW QUESTION # 28
Which benefit is NOT relevant by implementing an ISMS for an organization?

- A. Information security controls are tailored to suit the organization's specific circumstances
- B. Information security risks are assessed and the probability and/or impact reduced
- C. Information security staff will be qualified to ISO/IEC 27001 Foundation level
- D. Information security compliance will increase stakeholder trust in the organization

**Answer: C**

Explanation:
The benefits of implementing an ISMS under ISO/IEC 27001 are well established. Clause 0.1 (General) explains that an ISMS

provides asystematic approach to managing sensitive informationand "preserves confidentiality, integrity, and availability of information by applying a risk management process and gives confidence to interested parties that risks are adequately managed."
Option A is correct as a benefit, since trust and confidence from stakeholders is an outcome of compliance.
Option C is also a benefit, since controls are chosen and tailored based on organizational context and risk assessment (Clause 6.1.3). Option D reflects another real benefit-reducing the probability and/or impact of incidents through effective risk management. However,staff qualifications (option B)are not guaranteed benefits of implementing an ISMS. While training and competence (Clause 7.2) are required, the standard does not require or provide ISO/IEC 27001 Foundation-level certification for staff. That is an external training/certification scheme, not an ISMS outcome.
Therefore, the benefitNOT relevantto implementing ISO/IEC 27001 isB.

## NEW QUESTION # 29

......

PassExamDumps APMG-International ISO-IEC-27001-Foundation exam questions are compiled according to the latest syllabus and the actual ISO-IEC-27001-Foundation certification exam. We are also constantly upgrade our training materials so that you could get the best and the latest information for the first time. When you buy our ISO-IEC-27001-Foundation Exam Training materials, you will get a year of free updates. At any time, you can extend the the update subscription time, so that you can have a longer time to prepare for the exam.
