

1Z0-931-25 Test Cram | 1Z0-931-25 Valid Exam Test

What's more, part of that VCEEngine 1Z0-931-25 dumps now are free: https://drive.google.com/open?id=1wcNZVfBWvXUAKvH2H4K__D9YqgN3EI1B

VCEEngine Oracle Autonomous Database Cloud 2025 Professional (1Z0-931-25) questions in three formats are the go-to source for successful and quick preparation. Three formats of our study material are Oracle 1Z0-931-25 exam PDF questions, desktop practice test software, and web-based 1Z0-931-25 practice test. The philosophy behind offering these formats is simple: to create a world-class learning material that can help candidates achieve their Oracle Autonomous Database Cloud 2025 Professional (1Z0-931-25) preparation objectives. With the help of 1Z0-931-25 exam questions in three formats, you can prepare successfully for the test according to your style.

Oracle 1Z0-931-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Developing on Autonomous Database: This section of the exam measures the skills of Application Developers and focuses on developing and extending applications using Autonomous Database. It covers using generative AI for natural language queries, Autonomous JSON Database, Oracle Text for document search, location-based analysis with Autonomous Spatial, Autonomous Graph for data relationships, and integration with Object Storage, enabling developers to build intelligent, scalable applications.
Topic 2	<ul style="list-style-type: none">Autonomous Database Shared: This section of the exam measures the skills of Cloud Engineers and focuses on creating and managing shared Autonomous Database instances. It includes provisioning, scaling, and starting or stopping instances, as well as database consolidation with Elastic Resource Pools. It also covers user management, cloning, database migration, monitoring, backup and restore processes, and introduces Data Guard for high availability, ensuring cloud engineers can maintain optimal database performance.
Topic 3	<ul style="list-style-type: none">Managing and Maintaining Autonomous Database: This section of the exam measures the skills of Database Administrators and focuses on the ongoing management and maintenance of Autonomous Database instances. It includes using REST APIs and OCI CLI for automation, configuring access control lists and private endpoints, monitoring performance, setting up notifications, utilizing features like auto-indexing and data safe, handling connectivity through wallets and service handles, and configuring disaster recovery using Data Guard to ensure business continuity.

Topic 4	<ul style="list-style-type: none"> Getting Started with Autonomous Database: This section of the exam measures the skills of Database Administrators and covers the architecture and key features of Oracle Autonomous Database. It explains how the database integrates within the Oracle ecosystem and provides an overview of different Autonomous Database offerings and their licensing models, helping administrators understand how to deploy and manage these cloud-based databases efficiently.
Topic 5	<ul style="list-style-type: none"> Data Lake Analytics with Autonomous Database: This section of the exam measures the skills of Big Data Engineers and explores how Autonomous Database can be used for analytics in data lake environments. It includes data ingestion, query optimization, and leveraging cloud-native analytics services, ensuring engineers can efficiently process and analyze large volumes of structured and unstructured data.
Topic 6	<ul style="list-style-type: none"> Autonomous Database Tools: This section of the exam measures the skills of Data Analysts and covers the tools available within Autonomous Databases for advanced data processing and analytics. It includes Oracle Machine Learning, APEX, and SQL Developer Web for database development, as well as data transformation, business model creation, data insights, and data analysis, allowing analysts to extract valuable insights from large datasets.

Get Marvelous 1Z0-931-25 Test Cram and Pass Exam in First Attempt

VCEEngine is a very wonderful and effective platform to give chances to our worthy clients who want to achieve their expected scores and gain their 1Z0-931-25 certifications. With our professional experts' tireless efforts, our 1Z0-931-25 exam guide is equipped with a simulated examination system with timing function, allowing you to examine your learning results at any time, keep checking for defects, and improve your strength. And you can be satisfied with our 1Z0-931-25 learning guide.

Oracle Autonomous Database Cloud 2025 Professional Sample Questions (Q108-Q113):

NEW QUESTION # 108

Which predefined role that exists in Autonomous Database includes common privileges that are used by a Data Warehouse developer? (Choose the best answer.)

- A. ADBDEV
- **B. DWROLE**
- C. ADMIN
- D. ADWC

Answer: B

Explanation:

Autonomous Database provides predefined roles tailored to specific use cases. The correct answer is:

DWROLE (B): The DWROLE predefined role is designed for Data Warehouse developers. It includes privileges commonly needed for data warehousing tasks, such as creating tables, views, and materialized views, as well as executing analytical queries. This role is optimized for Autonomous Data Warehouse (ADW) workloads.

The incorrect options are:

ADBDEV (A): There is no predefined ADBDEV role in Autonomous Database; this appears to be a fictional or misinterpreted role.

ADMIN (C): The ADMIN role is a superuser role with full database privileges, far exceeding the needs of a typical Data Warehouse developer and not tailored to that specific use case.

ADWC (D): This is not a predefined role; it might be a typo or confusion with ADW (Autonomous Data Warehouse), but no such role exists.

DWROLE is the best fit for a Data Warehouse developer's needs.

NEW QUESTION # 109

Which statement is FALSE about the Catalog tool?

- A. Impact shows the entities that depend on the source.
- **B. You can delete an entity from the Autonomous Database via the Catalog tool.**
- C. You can limit the display of entities to only those with certain names, schemas, types, or applications by entering values in the Search field.
- D. You can view the data definition of an entity.

Answer: B

Explanation:

The Catalog tool in Autonomous Database provides metadata exploration:

Correct Answer (A): "You can delete an entity from the Autonomous Database via the Catalog tool" is false. The Catalog is a read-only interface for viewing database objects (tables, views, etc.) and their relationships; it does not support modification or deletion actions.

True Statements:

B: Filtering by name, schema, type, or application is a core search feature.

C: Viewing DDL (data definition language) for entities is supported.

D: The Impact tab shows dependencies, aiding change analysis.

This ensures safe metadata exploration without risking data changes.

NEW QUESTION # 110

Which predefined service connection should you use when running lots of high concurrent queries in an Autonomous Database?

- **A. DBNAME_LOW**
- B. DBNAME_CONCURRENT
- C. DBNAME_MEDIUM
- D. DBNAME_HIGH

Answer: A

Explanation:

Full Detailed In-Depth Explanation:

Service connections in Autonomous Database:

A . DBNAME_LOW: Optimized for high concurrency with minimal resources per query, ideal for many simultaneous queries.

B . DBNAME_MEDIUM: Balanced concurrency and performance.

C . DBNAME_HIGH: Prioritizes individual query performance, not concurrency.

D . DBNAME_CONCURRENT: Not a valid service name.

NEW QUESTION # 111

Which statement is FALSE regarding provisioning an Autonomous Database and configuring private endpoints with security rules to allow incoming and outgoing traffic to and from the Autonomous Database instance?

- A. The source is set to the address range you want to allow to connect to your database
- **B. A stateless ingress rule is created to allow connections from the source to the Autonomous Database instance**
- C. The destination port range is set to 1522
- D. The IP Protocol is set to TCP

Answer: B

Explanation:

Configuring private endpoints for Autonomous Database involves network security rules. The false statement is:

A stateless ingress rule is created to allow connections from the source to the Autonomous Database instance (C): This is incorrect. For Autonomous Database private endpoints, security rules (e.g., in Security Lists or NSGs) must be stateful, not stateless. Stateful rules track connection states (e.g., allowing return traffic automatically), which is necessary for Oracle Net Services (SQL*Net) communication over TCP. A stateless rule requires explicit ingress and egress rules for both directions, complicating setup and risking connectivity issues. For example, a stateful ingress rule from a client subnet (e.g., 10.0.1.0/24) to the ADB subnet ensures bidirectional traffic works seamlessly without additional egress rules.

The true statements are:

The IP Protocol is set to TCP (A): Autonomous Database uses TCP for database connections, aligning with Oracle Net Services standards.

The destination port range is set to 1522 (B): Port 1522 is the default for secure TLS connections to Autonomous Database, as specified in the client wallet's tnsnames.ora.

The source is set to the address range you want to allow to connect to your database (D): The security rule defines the source CIDR block (e.g., 10.0.0.0/16) of allowed clients, restricting access to specific subnets or VCNs.

Stateful rules simplify and secure private endpoint configurations.

NEW QUESTION # 112

A Business Analyst joined your organization and wants to explore the database tools. When restoring or cloning an Autonomous Database (ADB), you must select a backup that is at least how old?

- A. 5 minutes
- B. 2 hours
- C. 1 day
- D. 24 hours

Answer: D

Explanation:

Full Detailed In-Depth Explanation:

When restoring or cloning an Autonomous Database (ADB), Oracle enforces a minimum backup age to ensure data consistency and integrity. The official Oracle documentation specifies that backups used for these operations must be at least 24 hours old. This requirement exists because:

Backups need time to complete and stabilize, ensuring all transactions are fully committed and the backup is consistent.

Recent backups (e.g., less than 24 hours old) may still be in progress or lack full verification, risking incomplete or corrupted restores/clones.

Options B (5 minutes), C (2 hours), and D (1 day) are either too short or redundant:

5 minutes and 2 hours: Too recent, violating the 24-hour rule.

1 day: Matches 24 hours but is less precise than the explicit "24 hours" phrasing in the documentation.

For the Business Analyst's exploration, they can access tools like SQL Developer Web or Data Load via the OCI Console under the "Tools" tab, but this question focuses on the backup age constraint, making A the best answer.

NEW QUESTION # 113

.....

The 1Z0-931-25 certification verifies that you are a skilled professional. VCEEngine product is designed by keeping all the rules and regulations in focus that Oracle publishes. Our main goal is that you can memorize the actual Oracle 1Z0-931-25 exam question to complete the Oracle Autonomous Database Cloud 2025 Professional (1Z0-931-25) test in time with extraordinary grades. Oracle 1Z0-931-25 Exam Dumps includes Oracle 1Z0-931-25 dumps PDF format, desktop 1Z0-931-25 practice exam software, and web-based 1Z0-931-25 practice test software.
