Opportunities are very important in this society. With the opportunity you can go further. However, it is difficult to seize the opportunity. Is your strength worthy of the opportunity before you? In any case, you really need to make yourself better by using our AZ-700 training engine. With our AZ-700 Exam Questions, you can equip yourself with the most specialized knowledge of the subject. What is more, our AZ-700 study materials can help you get the certification. Imagine you're coming good future maybe you will make a better choice!

Contending for the success fruit of AZ-700 practice exam, many customers have been figuring out the effective ways to pass it. Due to the shortage of useful practice materials or being scanty for them, we listed these traits of our AZ-700 practice materials. Actually, some practice materials are shooting the breeze about their effectiveness, but our AZ-700 practice materials are real high quality AZ-700 practice materials with passing rate up to 98 to 100 percent.

Pass Guaranteed 2026 Trustable Microsoft New AZ-700 Study Notes

The supremacy of Real4exams in the tech sector solely relies on its competency to offer its users updated and real AZ-700 exam dumps. Our dedicated team takes feedback from experts all around the world to update its AZ-700 actual dumps. This practice material will make your preparation for the Microsoft AZ-700 examination super easy and effective.

The Microsoft AZ-700 exam is designed for professionals who are interested in pursuing a career in cloud computing or who are looking to upgrade their skills in networking. AZ-700 exam is a great way to demonstrate your knowledge and expertise in Azure Networking and to stand out in the job market.

What is the exam cost of the Microsoft AZ-700 Exam

The cost of a Microsoft AZ-700 convention exam is \$165 USD.

Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q152-Q157):

NEW QUESTION # 152

You have the Azure resources shown in the following table.

You need to link VNet2 to Circuit1

What should you create in each subscription? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 153

Case Study 1 - Litware, Inc

Overview

Litware, Inc. is a financial company that has a main datacenter in Boston and 20 branch offices across the United States. Users have Android, iOS, and Windows 10 devices.

Existing Environment:

Hybrid Environment

The on-premises network contains an Active Directory forest named litwareinc.com that syncs to an Azure Active Directory (Azure AD) tenant named litwareinc.com by using Azure AD Connect.

All the offices connect to a virtual network named Vnet1 by using a Site-to-Site VPN connection.

Azure Environment

Litware has an Azure subscription named Sub1 that is linked to the litwareinc.com Azure AD tenant. Sub1 contains resources in the East US Azure region as shown in the following table.

A diagram of the resource in the East US Azure region is shown in the Network Diagram exhibit.

There is bidirectional peering between Vnet1 and Vnet2. There is bidirectional peering between Vnet1 and Vnet3. Currently, Vnet2 and Vnet3 cannot communicate directly.

Azure Environment Diagram

Requirements:

Business Requirements

Litware wants to minimize costs whenever possible, as long as all other requirements are met.

Virtual Networking Requirements

Litware identifies the following virtual networking requirements:

- Direct the default route of 0.0.0.0/0 on Vnet2 and Vnet3 to the Boston datacenter over an ExpressRoute circuit.

- Ensure that the records in the cloud.litwareinc.com zone can be resolved from the on-premises locations.

- Automatically register the DNS names of Azure virtual machines to the cloud.litwareinc.com zone.

- Minimize the size of the subnets allocated to platform-managed services.

- Allow traffic from VMSSet1 to VMSSet2 on the TCP port 443 only.

Hybrid Networking Requirements

Litware identifies the following hybrid networking requirements:

- Users must be able to connect to Vnet1 by using a Point-to-Site (P2S) VPN when working remotely. Connections must be authenticated by Azure AD.

- Latency of the traffic between the Boston datacenter and all the virtual networks must be minimized.

- The Boston datacenter must connect to the Azure virtual networks by using an ExpressRoute FastPath connection.

- Traffic between Vnet2 and Vnet3 must be routed through Vnet1.

PaaS Networking Requirements

Litware identifies the following networking requirements for platform as a service (PaaS):

- The storage1 account must be accessible from all on-premises locations without exposing the public endpoint of storage1.
- The storage2 account must be accessible from Vnet2 and Vnet3 without exposing the public endpoint of storage2.

You need to configure the default route in Vnet2 and Vnet3. The solution must meet the virtual networking requirements. What should you use to configure the default route?

- A. a user-defined route assigned to GatewaySubnet in Vnet1
- **B. BGP route exchange**
- C. route filters
- D. a user-defined route assigned to GatewaySubnet in Vnet2 and Vnet3

Answer: B

Explanation:

You must use BGP to advertise on-premises routes to the Microsoft Edge router. You cannot create user-defined routes to force traffic to the ExpressRoute virtual network gateway if you deploy a virtual network gateway deployed as type: ExpressRoute
Source: <https://docs.microsoft.com/en-us/azure/virtual-network/virtual-networks-udr-overview#border-gateway-protocol>

NEW QUESTION # 154

You have an on-premises network and an Azure virtual network named VNet1.

You need to implement Azure Extended Network. The solution must minimize costs.

Which type of virtual machine should you deploy to VNet1, and which tool should you use to configure Azure Extended Network?

To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 155

You need to manage connectivity from NYCNet to the Azure services that use private endpoints. The solution must meet the security requirements. What should you do first?

- **A. Enable a network policy for SUBNET-PE.**
- B. Add a route table to SUBNET-PL
- C. From Azure Virtual Network Manager, create a security admin configuration.
- D. From Azure Virtual Network Manager, create a network group that has Member type set to Subnet

Answer: A

NEW QUESTION # 156

You have an Azure subscription that contains a virtual machine named VM1. VM1 contains a NIC named NIC1 and a public IP address named PIP1. PIP1 is assigned to NIC1.

You plan to deploy four Network Virtual Appliances (NVAs).

You need to ensure that all the inbound traffic from the internet to PIP1 is inspected by the NVAs. The solution must ensure that the NVA deployment is highly available.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:
