

Unparalleled VMware 2V0-11.25 Reliable Exam Pass4sure: VMware Cloud Foundation 5.2 Administrator Pass Guaranteed

P.S. Free 2026 VMware 2V0-11.25 dumps are available on Google Drive shared by PDFTorrent: https://drive.google.com/open?id=1zytYq9PAS5QrWKYVVDg6_eqLShf5EbYE

Our company really took a lot of thought in order to provide customers with better 2V0-11.25 learning materials. First of all, in the setting of product content, we have hired the most professional team who analyzed a large amount of information and compiled the most reasonable 2V0-11.25 Exam Questions. And you can find the most accurate on our 2V0-11.25 study braindumps. Secondly, our services are 24/7 available to help our customers solve all kinds of questions.

VMware 2V0-11.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> IT Architectures, Technologies, Standards: There are no testable objectives in this section. However, this area establishes the foundational knowledge expected of cloud administrators, such as understanding basic IT infrastructure, virtualization, and cloud models. This section is relevant for cloud administrators and infrastructure engineers.
Topic 2	<ul style="list-style-type: none"> Plan and Design the VMware by Broadcom Solution: There are no testable objectives in this section. Still, it is intended for solution architects who need to plan and design VMware Cloud Foundation deployments, focusing on sizing, architecture selection, and network storage design.
Topic 3	<ul style="list-style-type: none"> Troubleshoot and Optimize the VMware by Broadcom Solution: This section of the exam measures skills of the cloud infrastructure support engineer and covers diagnosing and resolving technical issues related to VMware Cloud Foundation deployment and operations. It includes troubleshooting the deployment process, vSphere, networking, vSAN, SDDC Manager, and Aria Suite. The section also evaluates the ability to optimize infrastructure performance, manage resources, and ensure efficient operation, focusing on the practical aspects of maintaining and enhancing VMware Cloud Foundation environments.
Topic 4	<ul style="list-style-type: none"> Install, Configure, Administrate the VMware by Broadcom Solution: This section of the exam measures skills of the VMware Cloud Foundation administrator and covers the installation and configuration processes for VMware Cloud Foundation components, deploying and configuring management domains, NSX Edge Clusters, and the VMware Aria Suite Lifecycle. It assesses the ability to deploy workload domains, enable vSphere IaaS control plane, create vSphere namespaces, manage stretched clusters, and use VMware Cloud Foundation APIs. Candidates are also tested on scaling deployments, performing Day 2 operations like backup, recovery, lifecycle management, VM lifecycle management, configuring networking and storage, managing ESXi hosts, implementing encryption, and operationalizing VMware NSX, vSAN, and Aria Suite. The section is comprehensive, targeting those responsible for the ongoing administration and optimization of VMware environments.

Topic 5	<ul style="list-style-type: none"> VMware by Broadcom Solution: This section of the exam measures skills of the cloud administrator and covers identifying VMware Cloud Foundation components like vSphere, vSAN, and NSX, as well as their architecture, including stretched configurations. It also assesses knowledge of requirements for implementing private cloud solutions, use cases for VMware Aria Suite components, vSphere IaaS control plane, Data Services Manager, and VMware Cloud Foundation Add-Ons. The focus is on the ability to recognize and apply the correct VMware solutions for various enterprise scenarios.

Vce 2V0-11.25 Files & 2V0-11.25 Questions Answers

Our VMware dumps torrent contains everything you need to pass 2V0-11.25 actual test smoothly. We always adhere to the principle that provides our customers best quality 2V0-11.25 Exam Prep with most comprehensive service. This is the reason why most people prefer to choose our 2V0-11.25 vce dumps as their best preparation materials.

VMware Cloud Foundation 5.2 Administrator Sample Questions (Q38-Q43):

NEW QUESTION # 38

While deploying the first VI workload domain in a VMware Cloud Foundation solution, which two steps will always be performed by SDDC Manager? (Choose two.)

- A. Configure vSAN for the VI workload domain's storage needs.
- B. Deploy an NSX Edge cluster and configure BGP routing on the TO Gateway.
- C. Deploy and configure a new vCenter Server instance for the VI workload domain.
- D. Connect a new vCenter Server instance to the Application Virtual Network.
- E. Deploy a new NSX Manager instance for the VI workload domain.

Answer: C,E

Explanation:

SDDC Manager automatically deploys and configures a new vCenter Server instance as part of the deployment of the VI workload domain.

SDDC Manager also handles the deployment of a new NSX Manager instance to provide network virtualization services for the VI workload domain.

NEW QUESTION # 39

An administrator needs to configure an ESXi host and create a host profile to ensure consistent configuration across multiple hosts in a cluster.

Which three steps are necessary to achieve this? (Choose three.)

- A. Extract the host profile from the configured reference host.
- B. Configure the desired settings on a reference ESXi host.
- C. Remediate the non-compliant hosts to ensure they match the host profile.
- D. Apply the host profile to all hosts in the cluster.
- E. Manually configure each host to match the reference host settings.

Answer: A,B,C

Explanation:

First, configure the desired settings on a reference ESXi host. This host will be used as the template for creating a consistent configuration across the cluster.

After configuring the reference host, extract the host profile from it. This captures the configuration of the reference host as a host profile.

Remediation is necessary to ensure that other hosts in the cluster align with the reference host's configuration.

The host profile can be applied, and remediation will correct any non-compliant settings on other hosts.

NEW QUESTION # 40

An administrator needs to create a custom role in vCenter Server that is part of VMware Cloud Foundation environment to grant specific privileges to a group of users.

Which two actions should be taken to create this custom role? (Choose two.)

- A. Navigate to the Roles section in the vSphere Client.
- B. Clone an existing role in SDDC Manager to create the custom role.
- C. Assign permissions to the custom role before adding privileges.
- D. Apply the custom role to the root of the vCenter Server inventory/.
- E. Choose the privileges required for the custom role.

Answer: A,E

Explanation:

When creating a custom role, it is essential to choose the appropriate privileges that the role will require.

These privileges define what actions the users in the role can perform.

To create and manage roles, you need to navigate to the "Roles" section in the vSphere Client. This is where roles are defined and assigned within the vCenter Server.

NEW QUESTION # 41

A specific VM is unable to communicate with other VMs in the same network. An administrator needs to identify and resolve the network connectivity issue.

What three steps should the administrator follow? (Choose three.)

- A. Restart the VM to reset its network connections
- B. Verify that the VM is connected to the correct port group
- C. Check the network adapter settings in vCenter Server
- D. Verify the port group settings and VLAN configuration
- E. Use the ESXi command line to check the status of the VM Kernel adapter

Answer: B,C,D

Explanation:

Port group settings and VLAN configurations need to be correct for VMs to communicate with each other on the same network. Ensuring they are properly configured is essential.

It's important to check that the VM is connected to the correct port group that matches the network configuration of the other VMs.

The network adapter settings in vCenter Server should be reviewed to ensure there are no misconfigurations that could prevent network communication.

NEW QUESTION # 42

What are three prerequisites for deploying an NSX Edge cluster in a VMware Cloud Foundation solution? (Choose three.)

- A. Verify that the NSX host overlay VLAN and NSX Edge overlay VLAN are routed to each other.
- B. Assign separate VLAN IDs and subnets for the NSX host overlay and NSX Edge overlay networks.
- C. Install Aria Operations and enable Edge Cluster monitoring.
- D. Set up vSAN storage policies for the Edge VMs.
- E. Create DNS entries for the NSX Edge nodes.

Answer: A,B,E

Explanation:

The NSX host overlay VLAN and NSX Edge overlay VLAN need to be routed to each other to ensure proper communication between the host and NSX Edge clusters.

DNS entries for the NSX Edge nodes are required to enable name resolution, which is important for the proper functioning of the NSX Edge cluster.

Assigning separate VLAN IDs and subnets for the NSX host overlay and NSX Edge overlay networks is necessary to maintain network isolation and optimize traffic flow between components.

NEW QUESTION # 43

.....

We have three versions of our 2V0-11.25 study materials, and they are PDF version, software version and online version. With the PDF version, you can print our materials onto paper and learn our 2V0-11.25 study materials in a more handy way as you can take notes whenever you want to, and you can mark out whatever you need to review later. With the software version, you are allowed to install our 2V0-11.25 study materials in all computers that operate in windows system. Besides, the software version can simulate the real test environment, which is favorable for people to better adapt to the examination atmosphere. With the online version, you can study the 2V0-11.25 Study Materials wherever you like, and you still have access to the materials even if there is no internet available on the premise that you have studied the 2V0-11.25 study materials online once before.
