But what is helpful is that it functions without an active internet connection. It copies the exact pattern and style of the real The Open Group OGBA-101 Exam to make your preparation productive and relevant.

The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q129-Q134):

NEW QUESTION # 129

Consider the following extract of a model showing relationships between Business Architecture concepts:

What is the relationship labeled X?

- A. Creates
- B. **Consists of**
- C. Enables
- D. Receives

Answer: B

Explanation:

In the context of TOGAF and Business Architecture, the diagram depicts the relationship between a Value Stream, Value Stage, and Value.

* Value Stream: Represents the end-to-end set of activities that create and deliver value to a stakeholder.

* Value Stage: A distinct step or phase within the Value Stream.

* Value: The benefit delivered to the stakeholder.

The relationship "X" indicates that a Value Stream is composed of multiple Value Stages.

Think of it like a journey (Value Stream) with multiple stops along the way (Value Stages). Each stage contributes to the overall value delivered at the end of the journey.

NEW QUESTION # 130

What can be introduced to formalize a joint agreement between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture?

- A. Non-disclosure Agreement
- B. Architecture Contracts
- C. The Statement of Architecture Work
- D. Service Level Agreements

Answer: A

NEW QUESTION # 131

Question: Which of the following best describes a business capability map?

- A. A reference model that provides a conceptual definition of all the key building blocks within a business architecture
- B. The highest-level description of an organization, covering all missions and functions of the business.
- C. A holistic representation of capabilities, including end-to-end delivery value, and the relationships between these capabilities.
- D. A self-contained view of the business that is independent of organizational structure, business processes, systems and applications.

Answer: C

Explanation:

A business capability map is a comprehensive representation that showcases an organization's abilities in a structured manner. It identifies and illustrates the various business capabilities that allow the enterprise to function and deliver value. These capabilities are often defined independently of the organizational structure, processes, or technology, focusing instead on what the business does and can do. This map encompasses the end-to-end value delivery and how different capabilities interrelate and support one another, thus providing a holistic view of the business's functional abilities.

NEW QUESTION # 132

Which ADM Phases match the following purpose descriptions?

1	Describes the development of Information Systems Architectures to support the agreed Architecture Vision
2	Addresses how to move from the Baseline to the Target Architectures by finalizing a detailed Implementation and Migration Plan
3	Provides an architectural oversight of the implementation
4	Describes the development of the Technology Architecture to support the agreed Architecture Vision

- A. 1 Phase C - 2 Phase F - 3 Phase H - 4 Phase B
- B. 1 Phase C - 2 Phase E - 1 Phase H - 4 Phase C

- C. 1 Phase D - 2 Phase B - 3 Phase G - 4 Phase A
- D. 1 Phase C - 2 Phase F - 3 Phase G- 4 Phase D

Answer: D

Explanation:

The ADM Phases that match the purpose descriptions provided are: Phase C for the development of Information Systems Architectures to support the agreed Architecture Vision, Phase F for addressing the move from the Baseline to the Target Architectures by finalizing a detailed Implementation and Migration Plan, Phase G for providing architectural oversight of the implementation, and Phase D for describing the development of the Technology Architecture to support the agreed Architecture Vision.

NEW QUESTION # 133

What is the relationship labeled Y?

- A. Creates
- B. Enables
- C. Consists of
- D. Receives

Answer: B

Explanation:

In TOGAF, the relationship labeled "Y" as "Enables" typically refers to how one element of the architecture facilitates or supports the functioning of another element. Here's a detailed explanation:

* Relationship Definition:

* Enables: This relationship indicates that one component (e.g., a business capability, process, or technology) enables or supports another component to function or achieve its objectives. It shows a dependency where the presence or effectiveness of one element is necessary for the other to perform effectively.

* Examples in TOGAF:

* Business Capabilities and Processes: A business capability may enable specific business processes. For instance, the capability of "Customer Relationship Management" enables processes like "Customer Support" and "Sales".

* Technology and Applications: A particular technology infrastructure may enable the operation of various business applications, ensuring they can deliver the required functionalities.

* TOGAF ADM Phases:

* Phase B: Business Architecture: Identifying how different business capabilities enable business processes helps in understanding the interdependencies and ensuring that all necessary capabilities are developed and supported.

* Phase C: Information Systems Architectures: In this phase, identifying how technology enables business applications and data flows is crucial for designing a coherent and efficient architecture.

* Importance:

* Understanding enabling relationships helps in ensuring that all necessary components are in place and functioning correctly to support the overall architecture. It also helps in identifying critical dependencies that need to be managed during implementation. In summary, the relationship labeled "Enables" describes how one component facilitates or supports the functioning of another, ensuring that the architecture is coherent and all dependencies are managed effectively.

NEW QUESTION # 134

.....

Experts before starting the compilation of "the OGBA-101 latest questions", has put all the contents of the knowledge point build a clear framework in mind, though it needs a long wait, but product experts and not give up, but always adhere to the effort, in the end, they finished all the compilation.
