

Latest 2V0-17.25 Exam Cram, New 2V0-17.25 Exam Guide

The price for 2V0-17.25 exam materials is reasonable, and no matter you are a student at school or an employee in the company, you can afford it. Besides, 2V0-17.25 exam materials are compiled by skilled professionals, and they are familiar with the exam center, therefore the quality can be guaranteed. 2V0-17.25 study guide offer you free demo to have a try before buying, so that you can have a better understanding of what you are going to buy. Free update for one year is also available, and in this way, you can get the latest information for the exam during your preparation. The update version for 2V0-17.25 Exam Dumps will be sent to your email address automatically.

We emphasize on customers satisfaction, which benefits both exam candidates and our company equally. By developing and nurturing superior customers value, our company has been getting and growing more and more customers. To satisfy the goals of exam candidates, we created the high quality and high accuracy 2V0-17.25 real materials for you. By experts who diligently work to improve our practice materials over ten years, all content are precise and useful and we make necessary alternations at intervals.

New 2V0-17.25 Exam Guide | Actual 2V0-17.25 Test Pdf

Our 2V0-17.25 learning guide allows you to study anytime, anywhere. If you are concerned that your study time cannot be guaranteed, then our 2V0-17.25 learning guide is your best choice because it allows you to learn from time to time and make full use of all the time available for learning. Our online version of 2V0-17.25 learning guide does not restrict the use of the device. You can use the computer or you can use the mobile phone. You can choose the device you feel convenient at any time.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q60-Q65):

NEW QUESTION # 60

Which three statements are characteristics of a VMware Cloud Foundation (VCF) private cloud? (Choose three.)

- A. VCF supports the provisioning of both VMs and containers.
- B. VCF offers manual scalability of the environment through configurations or custom scripts.
- C. VCF offers the ability to configure full isolation of organizations in the private cloud.
- D. VCF supports only the industry and regulatory compliance offered by the cloud service provider.
- E. VCF offers automation of operations and the ability to optimize network services.
- F. VCF supports only vSAN storage technology.

Answer: A,C,E

Explanation:

VCF provides integrated automation and orchestration for Day 0-2 operations, including networking. VCF is a "full-stack IaaS" with "automation and orchestration to simplify Day 0, Day 1, and Day 2 tasks." VCF supports modern apps: users can provision "VMs" and "Kubernetes workloads" from self-service services, providing both VM and container support. Multi-tenancy with strong isolation is native: Organizations are "secure and isolated" boundaries; All Apps organizations run "virtual machines (VMs), Kubernetes... multiple tenants with secure infrastructure isolation." Incorrect choices: VCF is not limited to vSAN only (supports VMFS/NFS/CNS as documented elsewhere) and does not rely on manual scalability-automation is core. Compliance is provided within the private cloud, not only by a CSP.

NEW QUESTION # 61

What is the primary benefit of enabling Workload Management on a vSphere Cluster?

- A. It enables the use of Kubernetes for container orchestration on the vSphere platform.
- B. It integrates vSphere with third-party cloud providers.
- C. It enhances the security of the vSphere environment.
- D. It allows the deployment of traditional VMs with enhanced performance.

Answer: A

Explanation:

Enabling Workload Management on a vSphere Cluster allows the use of VMware vSphere with Tanzu, which enables the deployment and management of Kubernetes clusters directly on vSphere. This integration allows for container orchestration, making it easier to deploy, manage, and scale containerized applications alongside traditional VMs in the same environment.

NEW QUESTION # 62

Which feature of VMware Lifecycle Manager allows an administrator to manage the lifecycle of ESXi hosts by applying a consistent image across the hosts in a cluster? (Choose three.)

- A. Configure a Key Management Server (KMS) and add it to vCenter
- B. Enable the encryption feature on the ESXi hosts.
- C. Apply the encryption policy to the existing VMs.
- D. Create an encryption policy in vCenter.
- E. Enable SSH on the ESXi hosts to manage encryption keys.

Answer: A,C,D

Explanation:

A Key Management Server (KMS) is required to manage encryption keys in the environment, ensuring that encrypted data is securely managed across ESXi hosts.

Creating an encryption policy in vCenter allows administrators to define how encryption is applied to virtual machines and data.

Applying the encryption policy to the existing VMs ensures that the encryption settings are enforced on virtual machines that require protection.

NEW QUESTION # 63

A VMware administrator wants to reduce the time spent on repetitive VM deployments. Which approaches can they use?

- A. Leveraging vRealize Automation for self-service provisioning
- B. Cloning VMs at the guest OS level using third-party scripts
- C. Building VM templates in the Content Library
- D. Creating a Default Resource Pool for new VMs

Answer: A,C

Explanation:

Creating templates in the Content Library (A) and using vRealize Automation (B) for self-service and orchestration reduce repetitive tasks. Cloning at the guest OS level (C) is less efficient, and a default resource pool (D) doesn't automate the actual deployment process.

NEW QUESTION # 64

An administrator logged into NSX Manager to view host details. The administrator noticed that the "Tunnel" status for the ESXi hosts, in the VI workload domain, is showing down.

What is a possible reason the ESXi host tunnels are showing down in NSX?

- A. The overlay traffic is being blocked by the gateway firewall.

- B. The host TEP IP addresses are being dynamically assigned through DHCP instead of being statically assigned.
- C. The IGMP has been disabled on the network.
- **D. The MTU setting for the host TEPs has been set to 1500.**

Answer: D

Explanation:

The "Tunnel" status in NSX indicates the status of the VXLAN tunnels used for communication between ESXi hosts. If the MTU setting for the host Tunnel Endpoint (TEP) is incorrectly set to 1500, this can cause issues with VXLAN encapsulation, as VXLAN packets typically require an MTU of at least 1600 bytes to function correctly. Setting the MTU too low can cause packet drops and result in the tunnel status being down.

NEW QUESTION # 65

.....

In the 21 Century, the {Examcode} certification became more and more recognized in the society because it represented the certain ability of examinees. However, in order to obtain {Examcode} certification, you have to spend a lot of time preparing for the 2V0-17.25 exam. Many people gave up because of all kinds of difficulties before the examination, and finally lost the opportunity to enhance their self-worth. As a thriving multinational company, we are always committed to solving this problem. For example, the 2V0-17.25 Learning Engine we developed can make the 2V0-17.25 exam easy and easy, and we can confidently say that we did this.
