PrepAwayTest: The Ultimate Solution for Apple DEP-2025 Certification Exam Preparation

Our DEP-2025 exam questions almost guarantee that you pass the exam. Even if you don't pass, you don't have to pay any price for our DEP-2025 simulating exam for we have money back guarantee to all of our exam materials. I hope we have enough sincerity to

impress you. And our pass rate of the DEP-2025 training engine is high as 98% to 100%, it is the data that proved and tested by our loyal customers. As long as you study with our DEP-2025 learning guide, you will pass the exam easily.

Apple DEP-2025 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs.
Topic 2	<ul style="list-style-type: none">• Device Support: This section of the exam measures the skills of an IT Administrator and covers troubleshooting Mac startup, recovery, and password reset processes using macOS Recovery. It ensures support professionals can maintain and restore device functionality.
Topic 3	<ul style="list-style-type: none">• Apple Configurator: This section of the exam measures the skills of an IT Administrator and covers the usage of Apple Configurator in enrollment, supervision, and deployment of Apple devices. It includes an overview of its features and setup processes.
Topic 4	<ul style="list-style-type: none">• Software Updates: This section of the exam measures the skills of an MDM Specialist and covers update management strategies using MDM. It includes handling deadlines, updating behavior, and ensuring that updates are properly delivered and installed.
Topic 5	<ul style="list-style-type: none">• Network Integration: This section of the exam measures the skills of an IT Administrator and covers assessing network responsiveness and device connectivity. It also covers wireless auto-join behavior on Apple devices and ensures strong network coverage.
Topic 6	<ul style="list-style-type: none">• Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication.
Topic 7	<ul style="list-style-type: none">• Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices.
Topic 8	<ul style="list-style-type: none">• Plan a Deployment: This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple's built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools.
Topic 9	<ul style="list-style-type: none">• Planning Device Ownership and Enrollment: This section of the exam measures the skills of an IT Administrator and covers enrollment planning strategies based on ownership models. It focuses on data separation and appropriate deployment paths based on user and organizational requirements.
Topic 10	<ul style="list-style-type: none">• Device Setup: This section of the exam measures the skills of an MDM Specialist and covers strategies and use cases for managing Setup Assistant via MDM. It also covers the configuration of enrollment-related settings and pane options.

Apple Deployment and Management Exam Sample Questions (Q46-Q51):

NEW QUESTION # 46

Which type of Apple ID is required for Shared iPad?

- A. Shared Apple ID
- B. Apple ID
- C. Personal Apple ID
- **D. Managed Apple ID**

Answer: D

Explanation:

Shared iPad requires Managed Apple IDs, created via Apple School Manager (ASM) or Apple Business Manager (ABM), to enable multiple users to log in with separate sessions. These IDs are organization- controlled and integrate with MDM for session management. Personal Apple IDs (options A and C, the same) are for individual use and incompatible with Shared iPad. There's no "Shared Apple ID" (option D); Shared iPad uses individual Managed Apple IDs or temporary sessions. The Apple Platform Deployment Guidemandates Managed Apple IDs for Shared iPad.

Reference:Apple Platform Deployment Guide(Chapter: Shared iPad).

NEW QUESTION # 47

Which type of device can use Shared iPad?

- A. iPhone with iOS 13 or later
- B. Mac with macOS Catalina or later
- C. iPad with iPadOS 13.4 or later
- D. Apple Watch with watchOS 6 or later

Answer: C

Explanation:

Shared iPad is a feature introduced for educational and business environments, allowing multiple users to share an iPad with separate user sessions, each tied to a Managed Apple ID. It requires iPadOS 13.4 or later and is supported only on compatible iPad models (e.g., iPad Pro, iPad Air 2 or later). iPhones (option B), Macs (option C), and Apple Watches (option D) don't support Shared iPad, as it's an iPad-specific feature. The Apple Platform Deployment Guide specifies the system requirements for Shared iPad.

NEW QUESTION # 48

Which feature allows IT administrators to manage VPN settings on a device?

- A. Configuration profiles
- B. iCloud
- C. MDM
- D. Find My

Answer: A

Explanation:

Configuration profiles enable IT administrators to manage VPN settings on a device, specifying details like server address, protocol (e.g., IKEv2, L2TP), and authentication methods (e.g., certificates, credentials). These profiles are deployed via MDM or manually, ensuring secure network access. Find My (option B) and iCloud (option C) are unrelated to VPN management. MDM (option D) is the system that delivers profiles, but the profiles themselves contain the VPN settings. The Apple Platform Deployment Guide details VPN configuration via profiles.

NEW QUESTION # 49

What's required to use content caching on a Mac?

- A. macOS 10.13 or later
- B. A VPN configuration
- C. Supervision
- D. An MDM solution

Answer: A

Explanation:

Content caching requires a Mac running macOS 10.13 (High Sierra) or later, enabling it to cache content like app updates and iCloud data for network efficiency. An MDM solution (option A) can manage caching settings but isn't required to enable it. Supervision (option C) is unrelated, as caching is a macOS feature, not a supervision requirement. A VPN configuration (option D) doesn't apply. The Apple Platform Deployment Guide specifies the macOS version requirement for content caching.

NEW QUESTION # 50

What must you download from Apple Business Manager and then upload to MDM to configure Managed Distribution of apps?

- A. A device token
- B. A private key certificate
- **C. A content token**
- D. A public key certificate

Answer: C

Explanation:

A content token links app licenses to MDM for distribution. The Apple Business Manager User Guide states, "To configure Managed Distribution, download the content token from Apple Business Manager and upload it to your MDM server. This token authorizes the MDM to manage and distribute apps to enrolled devices." Options B, C, and D are unrelated to app distribution.

Reference:

Apple Business Manager User Guide, "Apps and Books" section.

Mobile Device Management Protocol Reference, "App Management" section.

NEW QUESTION # 51

• • • • •

We are carrying out renovation about DEP-2025 test engine all the time to meet the different requirements of the diversified production market. Thus we have prepared three kinds of versions on DEP-2025 preparation materials. If you are used to study with paper-based materials you can choose the PDF version of our DEP-2025 Study Guide. If you would like to get the mock test before the real DEP-2025 exam you can choose the software version, and if you want to study in anywhere at any time then our online APP version is your best choice since you can download it in any electronic devices.
