Cisco Implementing Cisco Application Centric Infrastructure Sample

Questions (Q44-Q49):

NEW QUESTION # 44

An engineer has set the VMM resolution immediacy to pre-provision in a Cisco ACI environment.

No Cisco Discovery Protocol neighborship has been formed between the hypervisors and the ACI fabric leaf nodes. How does this affect the download policies to the leaf switches?

- A. No policies are downloaded because LLDP is the only supported discovery protocol.
- B. Policies are downloaded when the hypervisor host is connected to the VMM VDS.
- C. No policies are downloaded because there is no discovery protocol neighborship.
- D. Policies are downloaded to the ACI leaf switch regardless of Cisco Discovery Protocol neighborship.

Answer: D

Explanation:

Pre-provision - Specifies that a policy (for example, VLAN, VXLAN binding, contracts, or filters) is downloaded to a leaf switch even before a VM controller is attached to the virtual switch (for example, VMware VDS). This pre-provisions the configuration on the switch.
