

Interactive Arch-303 Questions, Pass Arch-303 Test Guide

BONUS!!! Download part of VCE4Plus Arch-303 dumps for free: https://drive.google.com/open?id=1sOeppfTzFc4HBdNGEGCk8IKwWKf_oSLx

Are you tired of preparing different kinds of exams? Are you stuck by the aimless study plan and cannot make full use of sporadic time? Are you still overwhelmed by the low-production and low-efficiency in your daily life? If your answer is yes, please pay attention to our Arch-303 guide torrent, because we will provide well-rounded and first-tier services for you, thus supporting you obtain your dreamed Arch-303 certificate and have a desired occupation. There are some main features of our products and we believe you will be satisfied with our Arch-303 test questions.

I know you must want to get a higher salary, but your strength must match your ambition! The opportunity is for those who are prepared! Arch-303 exam questions can help you improve your strength! You will master the most practical knowledge in the shortest possible time. It is also very easy if you want to get the Arch-303 certificate. As long as you buy our Arch-303 study braindumps and practice step by step, you are bound to pass the exam.

>> **Interactive Arch-303 Questions** <<

Covers 100% Composite Exams Arch-303 Critical Information

If you follow the steps of our Arch-303 exam questions, you can easily and happily learn and ultimately succeed in the ocean of learning. And our Arch-303 exam questions can help you pass the Arch-303 exam for sure. Choosing our Arch-303 exam questions actually means that you will have more opportunities to be promoted in the near future. We are confident that in the future, our Arch-303 Study Tool will be more attractive and the pass rate will be further enhanced. For now, the high pass rate of our Arch-303 exam questions is more than 98%.

Salesforce Certified B2C Commerce Architect Sample Questions (Q67-Q72):

NEW QUESTION # 67

The Client identifies that a segment of customers need to see some products on the site that other customers should not be able to access. All products are maintained within one catalog but in separate categories. A custom attribute will be used on the Profile

system object to identify customers that belong to this special segment. A customer group will be made that is qualified for by this Profile custom attribute. The storefront will be customized to include navigation to relevant categories for this customer group. Unfortunately during technical review the Client points out that the business teams have raised a concern with maintenance and want to use a shared navigation within the catalog and not use separate categories.

Which item should the Architect suggest to efficiently fulfil this new requirement while maintaining scalability?

- **A. Customize the Storefront to modify the search result that if the user is in the customer group then the result includes those products appropriately.**
- B. Customize the Storefront to use a hidden search refinement that if the user is in the customer group then the result includes those products with a new custom attribute.
- C. Customize the Storefront to use separate storefront catalogs with the same navigation that if the customer is in the customer group gets assigned products appropriately.
- D. Customize the Storefront to use a hidden search refinement and modify the customer group to be qualified for by a new product custom attribute

Answer: A

Explanation:

The optimal solution for this requirement is to modify the search results dynamically based on the user's customer group membership. This approach:

- * Ensures that all users can navigate the same catalog and categories without seeing separate categories for special segments.
- * Dynamically includes or excludes products from search results based on the user's membership in the special segment, effectively using existing catalog structures while personalizing product visibility.
- * Maintains scalability by leveraging existing catalog and category infrastructure without needing additional custom attributes for navigation purposes.

This method aligns with best practices for creating personalized customer experiences in B2C Commerce without complicating catalog management.

NEW QUESTION # 68

A company that is a shoe-producer is doing Salesforce B2C Commerce implementation. In their Enterprise Resource Planning (ERP) system, the products are marked as being one of three types: boots, sandals, and sneakers. The business requirements based on the type are:

- * The messaging on Product Detail page is different
- * Customers are able to filter their Product Search Results

The customer's operations team asks about the format in which to send this value in the catalog.

Which data type should the Architect specify for this attribute in the Data Mapping document?

- A. A custom attribute of type string containing comma separated values.
- B. A custom attribute type set-of-string containing multiple values.
- **C. A custom attribute of type enum-of-string (single selectable value)**
- D. A custom attribute of type enum-of-string (multiselectable value).

Answer: C

Explanation:

For the shoe producer implementing Salesforce B2C Commerce, the attribute used to specify the type of shoes (boots, sandals, sneakers) should be set as a single selectable value, hence the use of an enum-of-string type. This data type allows for the selection of one option from a predefined list, which is ideal for cases where each product can only be categorized into one type. This ensures that data integrity is maintained while providing clear and distinct categorization that can easily be used for filtering on the Product Search Results page and for customized messaging on the Product Detail page.

NEW QUESTION # 69

A developer is remotely fetching the reviews for a product.

Assume that it's an HTTP GET request and caching needs to be implemented, what consideration should the developer keep in mind for building the caching strategy?

- **A. Cached remote include with cache of the HTTP service**
- B. Remote include with caching only the reviews
- C. Cache the HTTP service request

- D. Use custom cache

Answer: A

Explanation:

For efficient caching of HTTP GET requests used to fetch product reviews, the best practice is to use a cached remote include combined with caching of the HTTP service itself (Answer D). This method involves caching the output of the remote service call at the service layer and reusing it for subsequent requests. This approach minimizes the number of calls to the remote service, reduces load times, and ensures that the displayed reviews are up-to-date as per the cache's freshness settings. It optimally balances the performance benefits of caching with the need to keep content like reviews current.

NEW QUESTION # 70

A company manages its regional operations as separate businesses. The regional sites (Site A and Site B) operate with:

- * Separate realms
- * Different code bases
- * Different category navigation menus
- * Frequent updates on category structure

The requirement from the business is to provide hreflang link tags on category pages pointing to the same category on the other regional site. Example HTML for one of these links as displayed on Site A is:

Which solution should the Architect choose while keeping performance in mind?

- A. Create a new custom attribute on the Category. Populate the attribute with the other entire site URLs corresponding to locales in JSON Format. Use the attribute to display the hreflang link tag.
- **B. Create a new custom object type. Populate the hreflang mapping for each category and locale in this custom object. Use the custom object to display the hreflang link tag.**
- C. Create additional locales in all realms. Create a new custom attribute on the category that is localized. Populate the attribute with the other site URLs and use it to display the hreflang tag.
- D. Create a custom Business Manager module. Ask the business to maintain the hreflang link tags for each regional site in this Business Manager module.

Answer: B

Explanation:

For a multi-regional setup with different realms and frequent updates, using a custom object to manage hreflang mappings offers flexibility and scalability. Custom objects can efficiently store URL mappings for each category across different locales, making it easier to manage and update as category structures change.

This method allows for centralized control over hreflang mappings and simplifies maintenance compared to other options which might involve more complex integrations or manual updates.

NEW QUESTION # 71

The Client is creating a new Storefront and their requirements include:

- * ApplePay support
- * Log in through a standard OAuth2 social media account
- * One Click checkout process
- * A/B testing for promotions

Which two items require technical documentation for customizing the Storefront Reference Architecture?

Choose 2 answers

- A. A/B testing for promotions
- **B. One Click checkout process**
- C. ApplePay support
- **D. log in through a standard OAuth2 social media account**

Answer: B,D

Explanation:

For customizing the Storefront Reference Architecture to meet specific requirements, the following items would require detailed technical documentation:

- * Option A (One Click checkout process): Implementing a one-click checkout process involves significant customization to

streamline the checkout flow, potentially requiring integration with payment providers and modifications to the user session management.

* Option C (Log in through a standard OAuth2 social media account): Integrating OAuth2 for social media logins involves handling authentication tokens, user sessions, and potentially syncing user data with the B2C Commerce profiles, all of which require detailed security and integration documentation.

These customizations require careful planning and implementation to ensure they work seamlessly with existing Storefront Reference Architecture components and meet security standards.

NEW QUESTION # 72

.....

Do you want to pass Arch-303 exam and get the related certification within the minimum time and effort? If you would like to give me a positive answer, you really should keep a close eye on our website since you can find the best Arch-303 study material in here--our Arch-303 Training Materials. We have helped millions of thousands of candidates to prepare for the Arch-303 exam and all of them have got a fruitful outcome, we believe you will be the next winner as long as you join in us!

Pass Arch-303 Test Guide: <https://www.vce4plus.com/Salesforce/Arch-303-valid-vce-dumps.html>

The test engine appeals to IT workers because it is a simulation of the formal test and you can feel the atmosphere of the Arch-303 dumps actual test, More importantly, it is necessary for these people to choose the convenient and helpful Arch-303 test questions as their study tool in the next time, You may wonder how to pass Arch-303 valid test in a short time.

A prototype does not necessarily implement features Arch-303 in the same way the final application will, Pethuru Raj, Ph.D, The test engine appeals to IT workers because it is a simulation of the formal test and you can feel the atmosphere of the Arch-303 Dumps actual test.
