HOT Latest UiPath-ADPv1 Learning Material - High Pass-Rate UiPath UiPath (ADPv1) Automation Developer Professional - Free UiPath-ADPv1 Exam
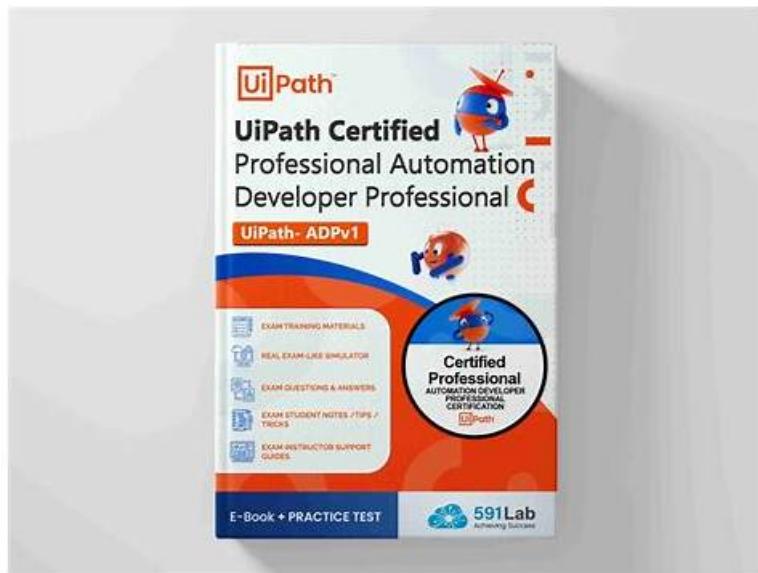

P.S. Free & New UiPath-ADPv1 dumps are available on Google Drive shared by PassSureExam: https://drive.google.com/open?id=1JIGdzIbwTTD5nACfGEKJiWMgNx2DMfim

The UiPath UiPath-ADPv1 desktop exam simulation software works only on Windows but the web-based UiPath-ADPv1 practice test is compatible with all operating systems and browsers. This is also an effective format for UiPath-ADPv1 Test Preparation. The UiPath-ADPv1 PDF dumps is an easily downloadable and printable file that carries the most probable UiPath UiPath-ADPv1 actual questions.

UiPath UiPath-ADPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	• UiPath Activities: In this section, the discussion is related to various UiPath activities for UI interaction, data manipulation, control flow, and more.
Topic 2	• Debugging and Testing: This section is about utilizing logging and debugging tools and adopting unit testing and test automation strategies.
Topic 3	• Design and Development: This section covers designing workflows using sequences, flowcharts, and state machines, building reusable components with libraries, exception handling and debugging techniques, etc.
Topic 4	• UiPath Studio Fundamentals: In this section, the focus is given to the understanding of Robotic Process Automation (RPA) concepts; it covers UiPath Studio and its components, Working with the UiPath user interface, project creation, management, and version control.

Free UiPath-ADPv1 Exam & Latest UiPath-ADPv1 Braindumps

Good site produces high-quality UiPath-ADPv1 reliable dumps torrent. If you decide to purchase relating products, you should make clear if this company has power and if the products are valid. UiPath-ADPv1 reliable dumps torrent. Some companies have nice sales volume by low-price products, their questions and answers are collected in the internet, it is very inexact. If you really

want to pass exam one-shot, you should take care about that. High-quality UiPath UiPath-ADPv1 Reliable Dumps torrent with reasonable price should be the best option for you.

UiPath (ADPv1) Automation Developer Professional Sample Questions (Q27-Q32):

NEW QUESTION # 27

A developer is building an automation that must interact with a destination remote computer reached by jumping through multiple RDP connections, as described by the following scenario:
- The Robot is installed on Machine A, which connects through RDP to Machine B.
- From Machine B another RDP connection is opened to Machine C, where the automation must be performed.
Which of the following scenarios is appropriate for the developer who wants to use UI Automation activities?

- A. UI Automation can be used and the following are prerequisites:
  Machine A - no requirement.
  Machine B - no requirement.
  Machine C - install RemoteRuntime.msi.
- B. UI Automation can be used and the following are prerequisites:
  Machine A - install RDP extension.
  Machine B - no requirement.
  Machine C - install RemoteRuntime.msi.
- C. UI Automation can be used and the following are prerequisites:
  Machine A - install RDP extension.
  Machine B - install RDP extension and RemoteRuntime.msi.
  Machine C - install RemoteRuntime.msi.
- D. UI Automation can be used and the following are prerequisites:
  Machine A - install RDP extension.
  Machine B - install RemoteRuntime.msi.
  Machine C - install RemoteRuntime.msi.

Answer: C

Explanation:
To use UI Automation activities in a scenario where the destination remote computer is reached by jumping through multiple RDP connections, the following prerequisites are required:
Machine A - install the RDP extension. This extension enables the robot to generate native selectors over RDP connections and interact with the UI elements on the remote machines.
Machine B - install the RDP extension and the RemoteRuntime.msi. The RDP extension allows the robot to connect to Machine C from Machine B, while the RemoteRuntime component enables the communication between the robot and the UI elements on Machine B.
Machine C - install the RemoteRuntime.msi. This component enables the communication between the robot and the UI elements on Machine C, where the automation must be performed. References:

NEW QUESTION # 28

In which of the following places can you access a recording of a failed queue transaction in UiPath Orchestrator?

- A. In the job details window of the process that contains the failed transaction.
- B. In the contextual menu of the failed transaction, by clicking Open recording.
- C. In the queue transaction list view, by hovering over the transaction status.
- D. In the Logs page of the queue transaction.

Answer: B

Explanation:
In UiPath Orchestrator, when a queue item fails and a recording is available (if enabled and the job was executed with recording turned on), you can access the recording directly from the contextual menu of the failed transaction. This is done by selecting "Open recording", which provides insight into what occurred during the automation at runtime. This feature is valuable for debugging and exception analysis.
Reference: UiPath Orchestrator Guide > Monitoring > Queue Transactions > Recordings

NEW QUESTION # 29
Which of the options below is not an action in Test Explorer?

- A. Run Passed Test Cases
- B. Run All In View
- C. Run Failed Test Cases
- D. Run Selected

Answer: A

Explanation:
The Test Explorer panel in UiPath Studio shows information relevant to test automation, such as test cases, test results, and activity coverage1. You can use the Test Explorer toolbar to filter test results based on result state, and to run or debug test cases using various options1. According to the UiPath documentation12, the available actions in Test Explorer are:
Refresh: Refresh the information shown in the Test Results panel.
Clear execution results: Clear all execution results shown in the Test Explorer Panel.
Run All in View: Run tests that are currently in view through all filters.
Run All: Run all test cases and workflows.
Run Selected: Run only selected test cases and workflows.
Run Failed Test Cases: Run only failed test cases.
Debug Selected: Debug only selected test cases and workflows.
Debug Failed Test Cases: Debug only failed test cases.
Repeat Last Test Run: Run the latest test.
Passed Test Cases: Show only test cases that have passed.
Failed Test Cases: Show only test cases that have failed.
Not Executed Test Cases: Show only test cases that have not been executed.
Filter by Covered/Uncovered Activities: Choose whether to show in the Designer panel the activities that have been covered during the execution.
Filter by Test Cases/Workflows: Choose what to show in the Test Explorer panel.
Search Tests: Use the search function to look for test case names.
As you can see, there is no action called Run Passed Test Cases in Test Explorer, so this is the correct answer to the question.

NEW QUESTION # 30
Which of the following options is correct regarding the below Object Repository tree structure?
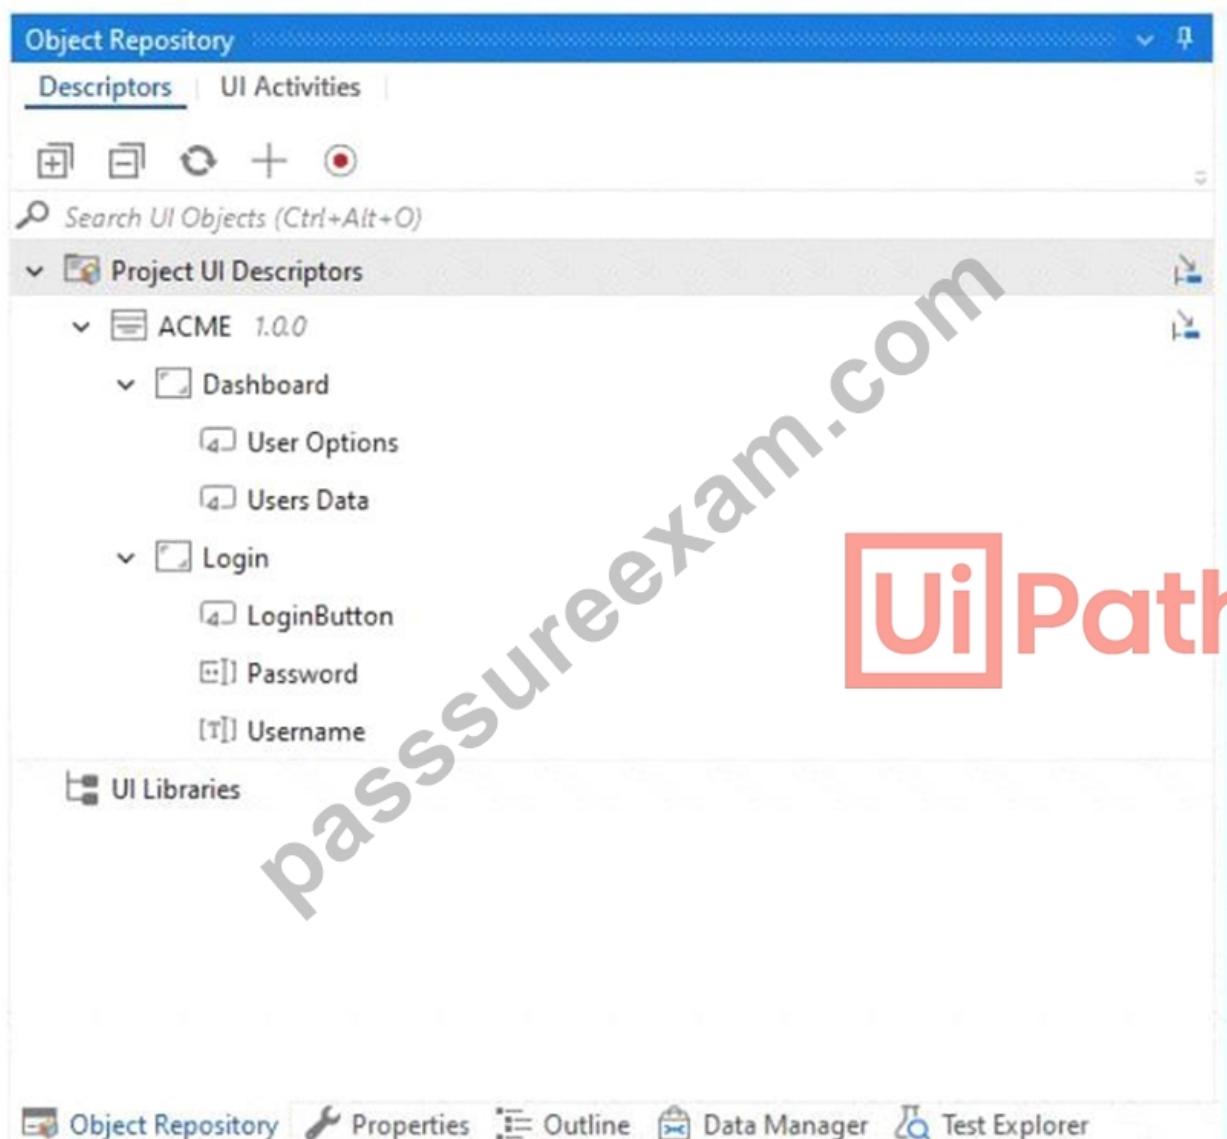

- A. One Screen
  Two Applications
  Two UI Elements
- B. One Application
  Two UI Elements
  Five Screens
- C. One Application
  Two Screens
  Five UI Elements
- D. One Screen
  Two Applications
  Five UI Elements

Answer: C

Explanation:
Based on the provided screenshot of the Object Repository tree structure in UiPath, the correct hierarchy and count of elements are as follows:
There is one Application, which is "ACME 1.0.0".
Within this application, there are two Screens: "Dashboard" and "Login".
Under the "Dashboard" screen, there are three UI Elements: "User Options", "Users Data".
Under the "Login" screen, there are two UI Elements: "LoginButton", "Password", "Username".
Therefore, the correct option regarding the tree structure displayed would be:
C: One Application Two Screens Five UI Elements

This option correctly identifies one application (ACME 1.0.0), two screens (Dashboard, Login), and five UI elements (User Options, Users Data, LoginButton, Password, Username).

NEW QUESTION # 31
Which one of the following expressions Is the equivalent of the If activity from the picture?
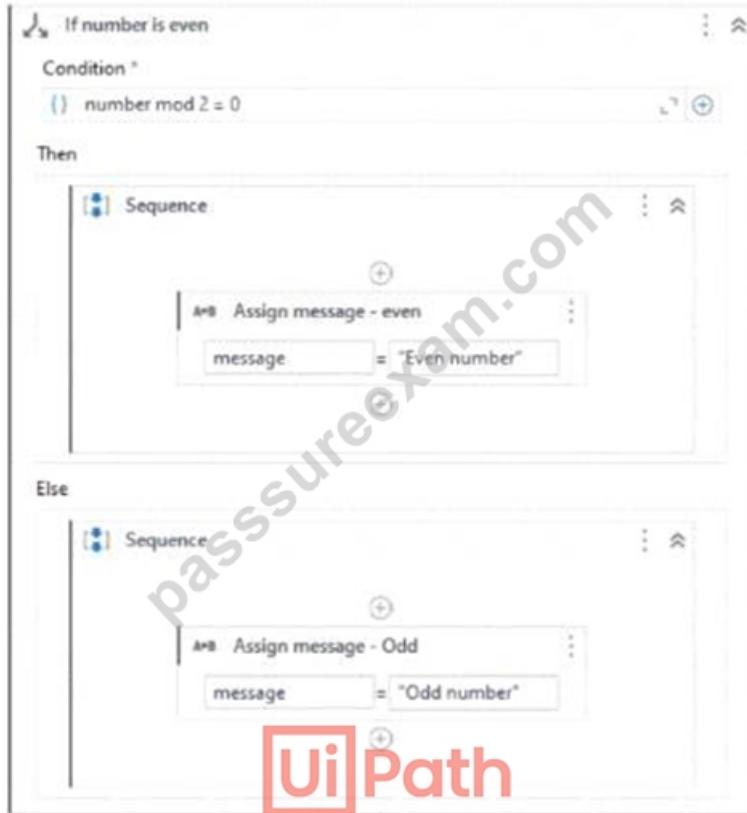

- A. message = If(number mod 2 = 0. Odd number. Even number)
- B. message = If(number mod 2 = 0 {"Odd number"} else {'Even number'})
- C. message = If(number mod 2 = 0 then "Odd number" else "Even number")
- D. message = If(number mod 2 = 0. "Even number", "Odd number")

Answer: D

Explanation:
This expression evaluates if the number modulo 2 equals 0, which would mean it is even. If true, it assigns the string "Even number" to the variable message. If false (meaning the number is odd), it assigns "Odd number" to message
