If you are unfamiliar with our Health-Cloud-Accredited-Professional study materials, please download the free demos for your reference, and to some unlearned exam candidates, you can master necessities by our Health-Cloud-Accredited-Professional training guide quickly.

Salesforce Health Cloud Accredited Professional Sample Questions (Q94-Q99):

NEW QUESTION # 94

A pharma company wants to leverage Provider Search to help patients find nearby infusion clinics. Which Health Cloud tool should a consultant leverage to drive performance and scalability?

- A. Flow for Industries
- B. Pipeline Analytics

- C. Business Rules Engine
- D. Data Processing Engine

Answer: D

Explanation:

Comprehensive Detailed Step by Step Explanation with exact Extracts from Salesforce Health Cloud documents that you have with Reference Provider Search and Performance:

The Data Processing Engine (DPE) in Health Cloud enables fast, scalable searches across large provider directories. It is specifically designed for performance and scalability in Provider Search scenarios.

Extract:

"Health Cloud leverages the Data Processing Engine to deliver scalable, high-performance Provider Search for finding care locations and providers based on patient preferences and proximity."

- Health Cloud: Provider Search

Other Options:

Pipeline Analytics: Used for data insights, not real-time search.

Business Rules Engine: Handles rules/logic, not high-volume search.

Flow for Industries: Automates processes, but DPE is the correct scalable search tool.

Reference:

Health Cloud: Provider Search

NEW QUESTION # 95

Bloomington Caregivers is looking to migrate from Service Cloud to Health Cloud to take advantage of the prebuilt healthcare features and functionality.

Which three prerequisites should Bloomington Caregivers' administrators complete to successfully install the Health Cloud managed package in its org?

Choose 3 answers

- A. Log a support case to have person accounts enabled.
- B. Enable person accounts from Setup.
- C. Enable contacts to relate to multiple accounts.
- D. Enable Chatter settings from Setup.
- E. Make data protection details available in records.

Answer: C,D,E

NEW QUESTION # 96

Bloomington Caregivers would like to display patient information from both Salesforce standard objects and data from an external system.

Which three Health Cloud features should a consultant recommend the company use to display this on the patient record page?

Choose 3 answers

- A. Integration Procedures
- B. DataRaptors
- C. FlexCards
- D. Salesforce Flows
- E. Visualforce Pages

Answer: A,B,C

Explanation:

Step-by-Step Explanation:

* Health Cloud Best Practice for Displaying Internal and External Data:

* FlexCards(part of OmniStudio) can display data from multiple sources in a unified view on a patient record.

* Integration Proceduresconnect to external systems and bring in data (e.g., from EHRs or other sources).

* DataRaptorsextract and transform Salesforce data for display and use in FlexCards.

* Salesforce Documentation Reference:

* "FlexCards can display internal Salesforce data and call Integration Procedures or DataRaptors to bring in external or standard object data."-OmniStudio Standard Guide

* "Integration Procedures are used to retrieve and update data from external systems and can be invoked directly from FlexCards or OmniScripts."-OmniStudio Integration Procedures

* "DataRaptors map Salesforce data to and from FlexCards and Integration Procedures, enabling seamless display of patient information."-OmniStudio DataRaptors

* Other Options:

* Salesforce Flows: Good for automation but not for real-time display of combined external and internal data on record pages.

* Visualforce Pages: Legacy solution, not recommended for modern Health Cloud patient page display, and does not natively integrate with OmniStudio tools.

OmniStudio DataRaptors

NEW QUESTION # 97

Which Permission Set Licenses are required to utilize and access Health Cloud feature and functionalities? (Choose two)

- A. Health Cloud
- B. Health Cloud Permission Set License
- C. Health Cloud Platform
- D. Health Cloud for Community
- E. Health Cloud Standard

Answer: A,B

Explanation:

According to the Health Cloud Implementation Guide, the two permission set licenses that are required to utilize and access Health Cloud features and functionalities are Health Cloud and Health Cloud Permission Set License. Health Cloud is a base license that enables access to Health Cloud objects and tabs. Health Cloud Permission Set License is an add-on license that enables access to Health Cloud Lightning components and pages. Health Cloud for Community, Health Cloud Platform, and Health Cloud Standard are not valid permission set licenses for Health Cloud.

NEW QUESTION # 98

Bloomington Caregivers has set up Health Cloud and needs to analyze patient referrals through Salesforce reports and dashboards. Which Health Cloud unmanaged package should a consultant recommend to deliver a prebuilt dashboard and reports?

- A. Health Cloud Referral Management Reports
- B. Health Cloud Network Management Reports
- C. Health Cloud Member Referral Management Reports
- D. Health Cloud Reports for Patient Referral Management ...

Answer: D

Explanation:

B is correct because Health Cloud Reports for Patient Referral Management is an unmanaged package that delivers a prebuilt dashboard and reports for analyzing patient referrals. The dashboard shows metrics such as referral volume, referral status, referral source, and referral outcome. The reports provide more details on each metric and allow users to filter by various criteria.

NEW QUESTION # 99

.....
