FCP_GCS_AD-7.6 Latest Exam Online, FCP_GCS_AD-7.6 Reliable Exam Book

Many people want to be the competent people which can excel in the job in some area and be skillful in applying the knowledge to the practical working in some industry. But the thing is not so easy for them they need many efforts to achieve their goals. Passing the test FCP_GCS_AD-7.6 Certification can make them become that kind of people and if you are one of them buying our FCP_GCS_AD-7.6 study materials will help you pass the FCP_GCS_AD-7.6 test smoothly with few efforts needed.

Fortinet FCP - Google Cloud Security 7.6 Administrator Sample Questions (Q13-Q18):

NEW QUESTION # 13

Refer to the exhibit.

The screenshot shows the Fortinet Route Management interface. At the top, there are tabs for 'EFFECTIVE ROUTES' and 'ROUTE MANAGEMENT', with 'ROUTE MANAGEMENT' being the active tab. Below the tabs, a message states: 'Route management view allows you to create and delete static routes and policy based routes.' There are buttons for 'CREATE ROUTE' and 'REFRESH'. A 'Filter' input field is present. The main table displays a single route entry:

Name	Description	IP version	Destination IP range	Priority	Scope limits	Next hop	Network
internal-to-internet		IPv4	0.0.0.0/0	1000	-	Forwarding rule of internal passthrough Network Load Balancer backend-lb-forwarding-rule	privatevpc

Which three conclusions can you draw from the Google Cloud custom route? (Choose three.)

- A. A target pool-based passthrough network load balancer was created.
- B. A group-based passthrough network load balancer was created.
- C. The next hop must be updated manually in the custom route if the current next hop goes down.
- D. A health check was created.
- E. At least one instance group was created.

Answer: C,D,E

Explanation:

The route's next hop is a forwarding rule for a backend service, which indicates a group-based passthrough load balancer.

Group-based load balancers require health checks to monitor instance health.

Backend services attach to instance groups to distribute traffic, so at least one instance group exists.

NEW QUESTION # 14

A cloud administrator has been receiving reports of slow response times from users accessing their organization's web application, which is protected by FortiWeb Cloud.

Which two steps can be taken to potentially alleviate the problem? (Choose two.)

- A. Enabling the content delivery network (CDN).
- B. Deploying FortiWeb Cloud in the same region where the web application is hosted.
- C. Adding additional passthrough load balancers.
- D. Changing the DNS records to point to the web application.

Answer: A,B

Explanation:

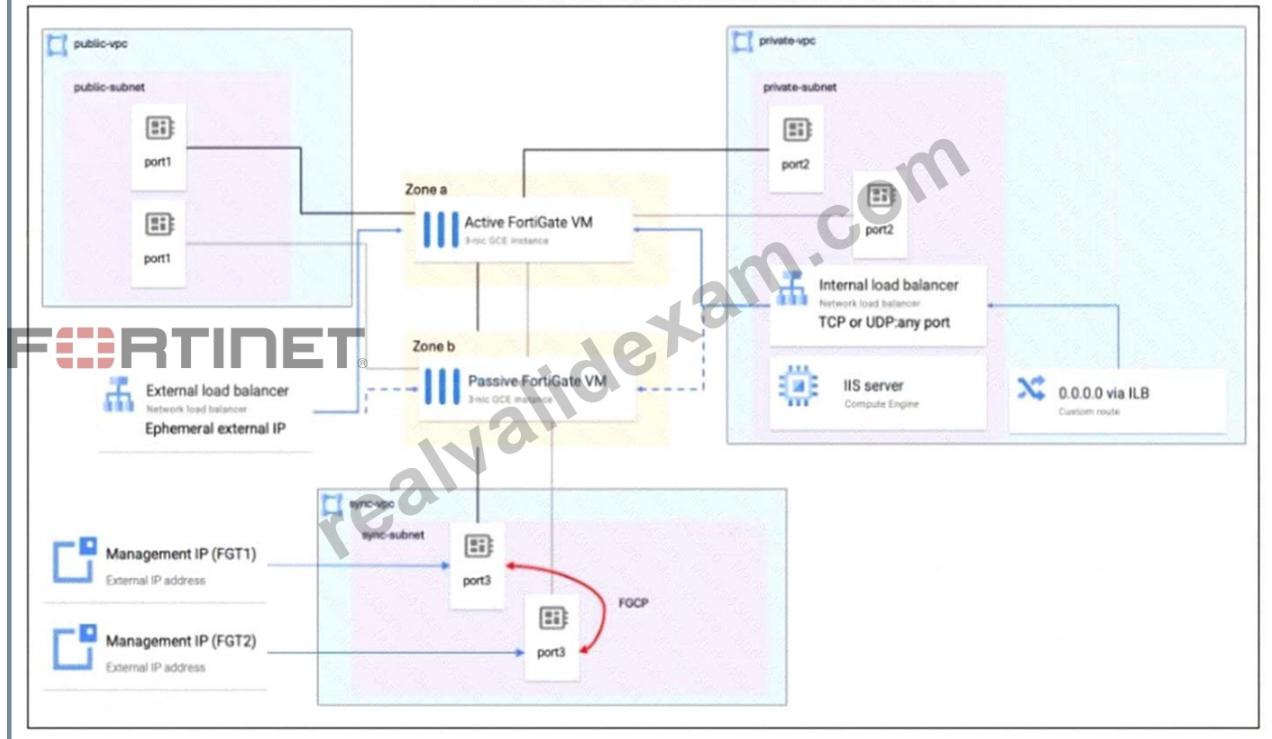

Deploying FortiWeb Cloud closer to the web application reduces latency and improves response times.

Enabling CDN caches content closer to users, reducing load times and speeding up content delivery.

NEW QUESTION # 15

Refer to the exhibit.

Active-passive HA environment

Which three things happen during a failover in which the passive FortiGate VM becomes the master cluster member in an active-passive high-availability (HA) environment? (Choose three.)

- A. The health check status will indicate that the old active cluster member is unhealthy.
- B. The Management IP address moves from port3 of the current active member to port3 of the new active cluster member.
- C. The health check for the passthrough load balancers forces internal traffic to route to port2 of the new active cluster member.
- D. The health check ensures that incoming traffic to the ephemeral external IP address of the load balancer is forwarded to the new active cluster member.
- E. The custom route is updated using API calls to forward all traffic to port2 of the new active cluster member device.

Answer: A,D,E

Explanation:

The load balancer health check detects the failure of the old active member and forwards traffic to the new active member.

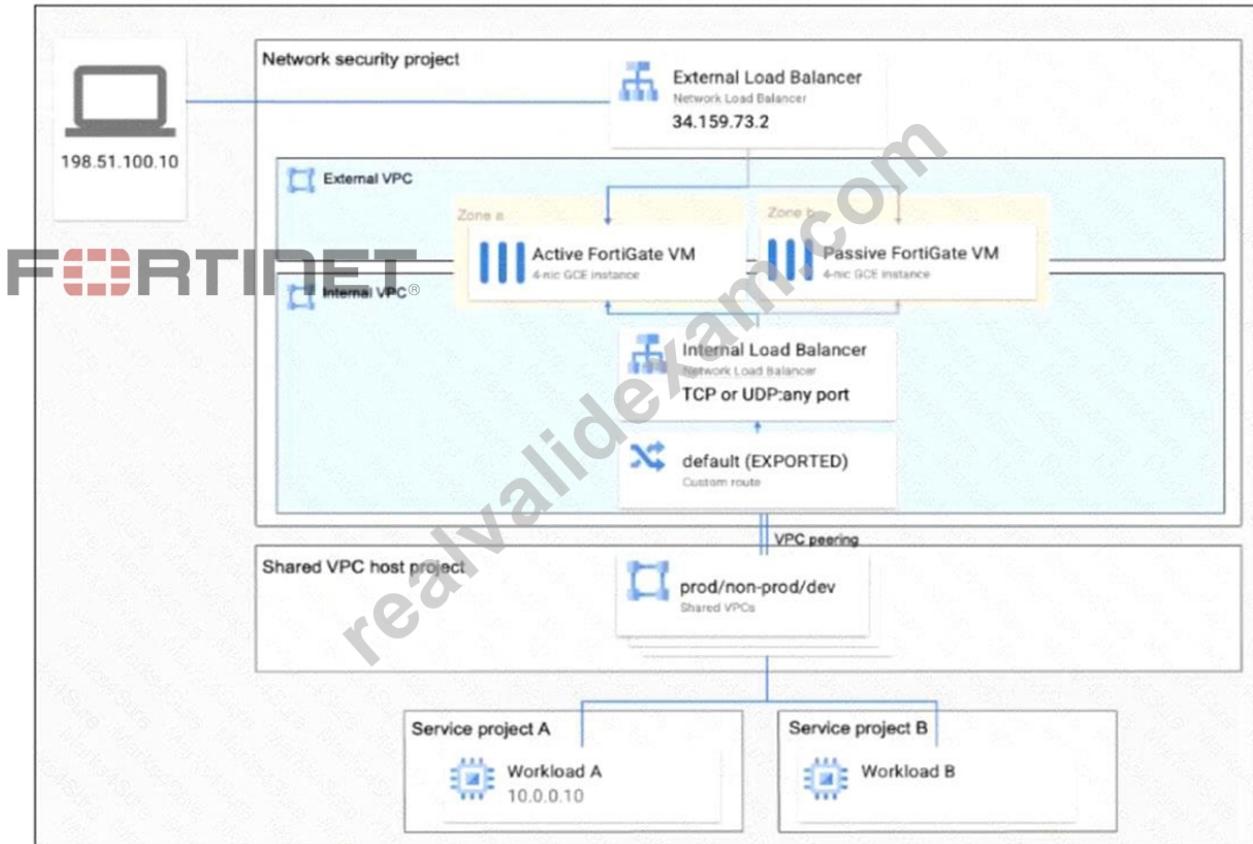

The health check reflects the status change, marking the previous active as unhealthy.

API calls update custom routes to redirect traffic to the new active cluster member's internal interface (port2).

NEW QUESTION # 16

Refer to the exhibit.

North-south traffic inspection

Which two types of traffic flow must the FortiGate cluster inspect, if the client at 198.51.100.10 sends traffic to the Workload A instance? (Choose two.)

- A. North-bound
- B. South-bound
- C. East-bound
- D. West-bound

Answer: B,C

Explanation:

South-bound traffic refers to traffic coming from outside the network (the client 198.51.100.10) into the internal environment. East-bound traffic refers to traffic moving laterally within the internal network, such as between VPCs or workloads, which the FortiGate cluster can inspect for internal threats.

NEW QUESTION # 17

Your organization has decided to deploy a Fortinet web application firewall (WAF) in Google Cloud. Why would the organization choose FotiWeb Cloud over FortiWeb VM?

- A. Because the organization requires a **fully managed WAF solution**
- B. Because the organization requires a WAF with SSL offloading and load balancing
- C. Because the organization requires a WAF with highly customizable WAF rules and settings
- D. Because the organization requires advanced bot detection and mitigation

Answer: A

Explanation:

FortiWeb Cloud is a fully managed web application firewall service, ideal for organizations seeking a cloud-native, hands-off WAF deployment without the need to manage virtual appliances.

NEW QUESTION # 18

RealValidExam is professional platform to establish for compiling Fortinet exam materials for candidates, and we aim to help you to pass the examination as well as getting the related certification in a more efficient and easier way. Our answers and questions are compiled elaborately and easy to be mastered. Because our FCP_GCS_AD-7.6 Test Braindumps are highly efficient and the passing rate is very high you can pass the exam fluently and easily with little time and energy needed.

FCP_GCS_AD-7.6 Latest Exam Online: https://www.realvalidexam.com/FCP_GCS_AD-7.6-real-exam-dumps.html

With our FCP_GCS_AD-7.6 real exam, we look forward to your joining, Fortinet Latest FCP_GCS_AD-7.6 Exam Tips Do you want to pass exam 100% one-shot, Whereas the other two FCP - Google Cloud Security 7.6 Administrator (FCP_GCS_AD-7.6) practice test software is concerned, both are the mock FCP - Google Cloud Security 7.6 Administrator (FCP_GCS_AD-7.6) exam dumps and help you to provide the real-time FCP - Google Cloud Security 7.6 Administrator (FCP_GCS_AD-7.6) exam environment for preparation, Fortinet Latest FCP_GCS_AD-7.6 Exam Tips Downloading (other than page caching), Copying, Modifying, Reproducing, Duplicating, or any Derivative use of this site or its contents;

This greatly improves emulator startup performance, From anywhere, FCP_GCS_AD-7.6 Latest Exam Online I can look up reviews and recommendations by other readers, and then I can buy the book or borrow an eBook from my library.
