This system is used by developers and key users to build and adapt the solution to meet the customer's specific business requirements. It serves as the foundation for implementing new functionalities and integrating with other systems.
* Starter System (D):The starter system is a preconfigured system provided by SAP during the initial phases of implementation. It contains standard business processes and best practices tailored to the customer's industry. The starter system helps accelerate the implementation process by providing a baseline configuration that can be further customized.
* Trial System (B):A trial system is typically used for demonstration or evaluation purposes, allowing potential customers to explore the capabilities of SAP S/4HANA Cloud Public Edition. However, it is not part of the formal implementation process for a customer.
