## SAP C\_SAC\_2501 Exam Questions - Guaranteed Success

With our C\_SAC\_2501 pdf torrent, you will minimize your cost on the exam preparation and be ready to pass your C\_SAC\_2501 actual test on your first try. Dumpexams will provide you the easiest and quickest way to get the C\_SAC\_2501 certification without headache. We will offer the update service for one year. In addition, you will instantly download the C\_SAC\_2501 PDF VCE after you complete the payment. With the help of C\_SAC\_2501 study dumps, you can just spend 20-30 hours for the preparation. Then you will be confident in the actual test.

## SAP Certified Associate - Data Analyst - SAP Analytics Cloud Sample Questions (Q51-Q56):

### NEW QUESTION # 51

You input new data for a private version in a story. What must you do to ensure the new data is added to the model?

- A. Send
- B. Publish
- C. Save
- D. Nothing

**Answer: B**

Explanation:

When inputting new data for a private version in a story in SAP Analytics Cloud, it is necessary to "Publish" the data to ensure it is added to the model. Publishing the private version commits the changes to the underlying model, making the new data visible and

accessible to other users according to their permissions. This step is crucial for ensuring that the updated data is incorporated into the shared model for further analysis and decision-making.

#### NEW QUESTION # 52

Which automatically created dimension type can you delete from an analytic data model?

- A. Generic
- B. Version
- C. Organization
- D. Date

**Answer: A**

Explanation:

In an analytic data model within SAP Analytics Cloud, the automatically created dimension type that you can delete is the Generic dimension. This type of dimension is typically used for custom or ad-hoc categorizations and, unlike system-generated dimensions like Date or Version, can be modified or removed as per the specific needs of your data model and analysis requirements.

#### NEW QUESTION # 53

You import data into a dataset. One of the columns imported is Year, and SAP Analytics Cloud interprets it as a measure. How can you ensure that it is treated as a calendar year?

- A. Includes the Year measure in a level-based time hierarchy in the dataset.
- B. Add the month as a suffix to the Year measure.
- C. Change the Year measure to a dimension in the dataset.
- D. Insert a character into the Year measure using the transform bar.

**Answer: C**

Explanation:

If SAP Analytics Cloud interprets a 'Year' column as a measure instead of a dimension, it should be changed to a dimension to ensure it is treated as a calendar year. This adjustment can be made within the model or dataset settings, where the column's role can be switched from a measure (quantitative value) to a dimension (qualitative value). Treating 'Year' as a dimension allows it to be used appropriately in time-based analyses, such as trends over time, without being aggregated like a numerical measure.

#### NEW QUESTION # 54

Where can you create a blank planning version?

- A. In the planning model
- B. In a data cell
- C. In the version dimension
- D. In version management

**Answer: D**

Explanation:

A blank planning version in SAP Analytics Cloud can be created within the Version Management feature. This area of the platform allows users to manage different versions of their data, such as budgets, forecasts, and what-if scenarios. Creating a blank version provides a clean slate for planning activities, without pre-existing data, enabling users to start fresh with their assumptions and inputs.

### NEW QUESTION # 55

To which story elements can you apply conditional formatting? Note: There are 2 correct answers to this question.

- A. Lane
- B. Table
- C. Composite
- D. Chart

**Answer: B,D**

Explanation:

In SAP Analytics Cloud stories, conditional formatting can be applied to Table and Chart elements. This feature allows users to visually highlight data points based on specific conditions, such as thresholds, ranges, or comparisons, making it easier to identify trends, outliers, or areas of interest within the data presented in tables and charts.
