We will be happy to assist you with any questions regarding our products. Our ArcGIS Utility Network Associate 2024 (EUNA_2024) practice exam software helps to prepare applicants to practice time management, problem-solving, and all other tasks on the standardized exam and lets them check their scores. The Esri EUNA_2024 Practice Test results help students to evaluate their performance and determine their readiness without difficulty.

The only use of the internet is to validate the product license for the EUNA_2024 practice exam software. If you are not online, you can still practice for the Esri EUNA_2024 exam questions thanks to this feature of Braindumpsqa's EUNA_2024 Exam simulation software. As a result, the EUNA_2024 desktop-based practice test software is a particularly useful option for customers who do not constantly have access to the internet.

Free Sample EUNA_2024 Questions, Real EUNA_2024 Questions

Our goal is to help you save both time and money by providing you with the EUNA_2024 updated exam questions. Keep up the good work on preparing for the Esri EUNA_2024 test with our actual Esri EUNA_2024 Dumps. We are so confident that you will succeed on the first try that we will return your money according to the terms and conditions if you do not.

Esri ArcGIS Utility Network Associate 2024 Sample Questions (Q66-Q71):

NEW QUESTION # 66

A utility company wants to represent a transformer mounted on a power pole in ArcGIS Pro. Which type of association should be configured?

- A. Connectivity association
- B. Containment association
- C. Structural attachment association

Answer: C

Explanation:

Structural attachments model domain features (transformers) attached to structures (power poles).

NEW QUESTION # 67

Before making major schema changes in ArcGIS Pro, which storage option should be used to back up a utility network?

- A. Branch versioned replica
- B. Service definition file
- **C. Asset package**

Answer: C

Explanation:

Asset packages capture the schema, rules, and properties, making them the correct backup option.

NEW QUESTION # 68

An engineer is configuring a two-terminal device, a pressure reducing valve, in a water network. Which inputs are required for this terminal configuration?

- A. Asset group and network category only
- B. Service territory and feature dataset
- **C. Name, direction, terminal definitions (In/Out), default path**

Answer: C

Explanation:

Two-terminal configurations require name, directionality, terminal details, and default path.

NEW QUESTION # 69

ArcGIS Utility Network includes a diagram function to visually represent network connectivity. Which elements compose a utility network diagram?

- **A. Rules, layouts, and layer definitions**
- B. Asset groups, terminals, and network categories
- C. Subnetworks, tiers, and ranks

Answer: A

Explanation:

Diagrams are built from rules (logic), layouts (arrangement), and layer definitions (symbolization).

NEW QUESTION # 70

A utility company needs to represent a pump inside a lift station as part of its water network in ArcGIS Pro. Which type of association should be used to represent this content-container relationship?

- A. Connectivity association
- B. Structural attachment association
- **C. Containment association**

Answer: C

Explanation:

Containment associations model content within containers, such as pumps within a lift station or pipes inside a casing.
