The customer is God. PL-900 learning dumps provide all customers with high quality after-sales service. After your payment is successful, we will dispatch a dedicated IT staff to provide online remote assistance for you to solve problems in the process of download and installation. During your studies, PL-900 study tool will provide you with efficient 24-hour online services. You can email us anytime, anywhere to ask any questions you have about our PL-900 Study Tool. At the same time, our industry experts will continue to update and supplement PL-900 test question according to changes in the exam outline, so that you can concentrate on completing the review of all exam content without having to pay attention to changes in the outside world.

What to do after the exam?

If you pass your exam, you can enjoy your reputation in your field. You will find out that you will get more job offers than earlier. Consume this opportunity and get a rewarding career. What are you waiting for? Walk into the office with flying colors to your employers, feel proud of yourself because you are now certified. Visit our website for details.

Remember that feedback is the most important thing you can expect after completing the exam. Providing feedback after passing is very much important for us. **PL-900 Dumps** is the place you can get all your questions related to the Microsoft Power Platform Fundamentals exam that is asked in the real exam. Please share your valuable feedback on our platform if you are fully satisfied with our products and services. You can also view feedback publish by a successful community, studying from our exam dumps, and satisfaction with our products and services. Identify your weak points and take the help of our highly experienced experts to get the best marks.

Microsoft Power Platform is a collection of tools and services that provide users with the ability to create custom solutions for their business needs. With Power Apps, users can create custom mobile and web apps without having to write any code. Power BI allows users to create visualizations and reports from their data, while Power Automate enables users to automate repetitive tasks and processes. Together, these tools provide users with a powerful platform to build custom solutions for their organization.

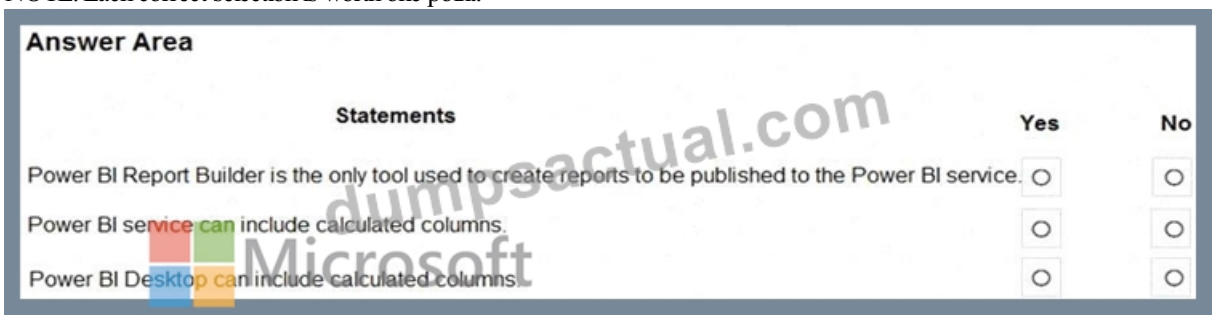
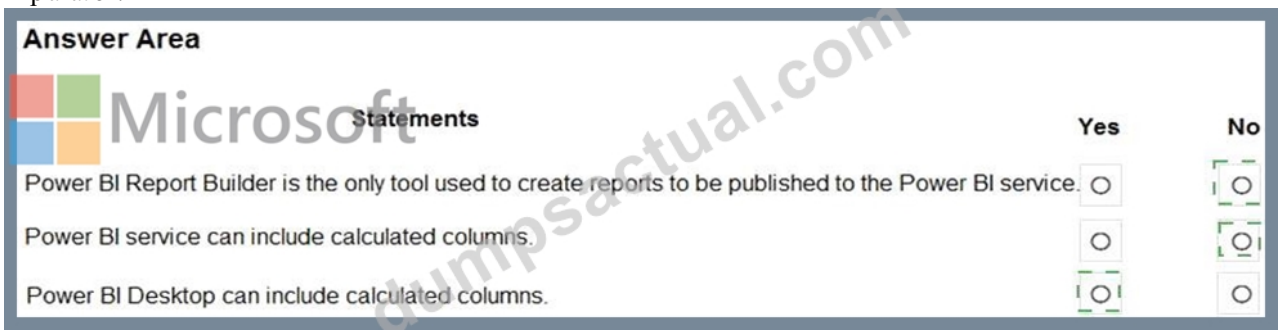
Microsoft Power Platform Fundamentals Sample Questions (Q312-Q317):

NEW QUESTION # 312
A company plans to implement Power Bl.
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

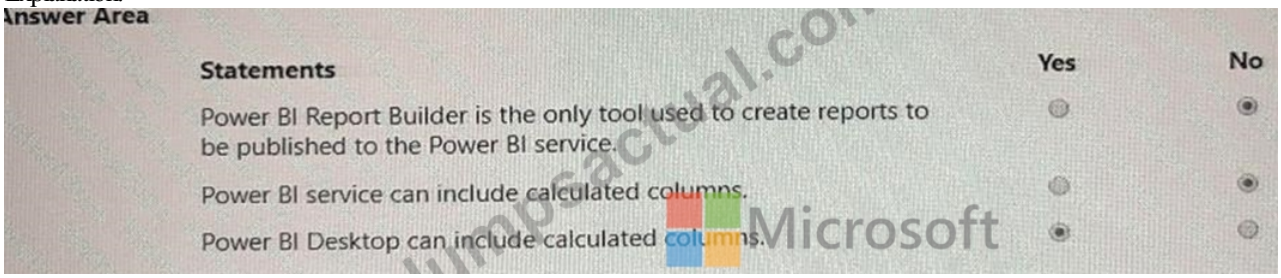


Answer:

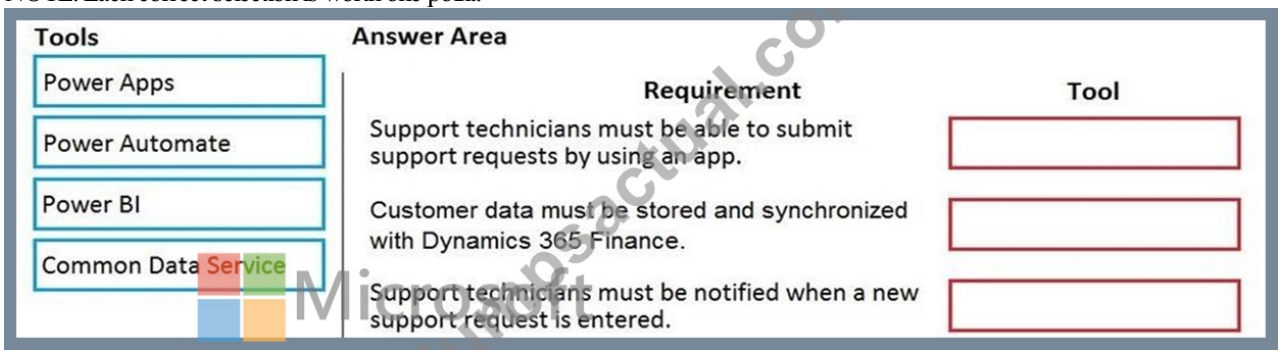
Explanation:



Explanation:



NEW QUESTION # 313
You manage the support team at a rapidly growing company.
Support technicians need a better experience when logging and responding to support requests.
You need to recommend tools to help the company's needs.
Which tools should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.



Answer:

Explanation:

	Yes	No
Managed solutions can be used to group multiple Power Platform components together during solution development.	○	○
Managed solutions must be used to distribute a Power Platform application on AppSource.	○	○
Managed solutions always protect Power Platform components from editing when components are exported to another environment.	○	○

Explanation

Requirement	Tool
Support technicians must be able to submit support requests by using an app.	Power Apps
Customer data must be stored and synchronized with Dynamics 365 Finance.	Common Data Service
Support technicians must be notified when a new support request is entered.	Power Automate

NEW QUESTION # 314
A user is trying to understand the differences between the various ways apps can be built by using Power Apps.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can embed canvas apps in model-driven apps.	○	○
A Power Apps portal can use only one data source.	○	○
You must use Power BI to create reports in model-driven apps.	○	○

Answer:

Explanation:

	Yes	No
Managed solutions can be used to group multiple Power Platform components together during solution development.	○	○
Managed solutions must be used to distribute a Power Platform application on AppSource.	○	○
Managed solutions always protect Power Platform components from editing when components are exported to another environment.	○	○

Explanation

Statement	Yes	No
You can embed canvas apps in model-driven apps.	○	○
A Power Apps portal can use only one data source.	○	○
You must use Power BI to create reports in model-driven apps.	○	○

Box 1: Yes
You can create a canvas app and then embed that within a model driven app.
Box 2: No
With the capability to build a portal in PowerApps, you can create a website for external and internal users enabling them to interact with data stored in Common Data Service.
Note: Common Data Service lets you securely store and manage data that's used by business applications.
Data within Common Data Service is stored within a set of entities. An entity is a set of records used to store data, similar to how a table stores data within a database. Common Data Service includes a base set of standard entities that cover typical scenarios, but you can also create custom entities specific to your organization and populate them with data using Power Query. App makers can then use PowerApps to build rich applications using this data.
Box 3: Yes
To get started building a report you'll need the latest version of Power BI Desktop and a PowerApps environment with the latest version of the Common Data Service.
