## Fortinet FCP\_FGT\_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently.</li> </ul>

## Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q53-Q58):

### NEW QUESTION # 53

Refer to the exhibit, which shows a firewall policy to enable active authentication.

When attempting to access an external website using an active authentication method, the user is not presented with a login prompt. What is the most likely reason for this situation?

- A. The Remote-users group is not added to the Destination.
- B. No matching user account exists for this user.
- C. The Remote-users group must be set up correctly in the FSSO configuration.
- D. The Service DNS is required in the firewall policy.

**Answer: D**

Explanation:

DNS is usually used by HTTP so that people can use domain names for websites, instead of their IP address. DNS is allowed because it is a base protocol and will most likely be required to initially see proper authentication protocol traffic... However, the DNS service must still be defined in the policy as allowed, in order for it to pass.

### NEW QUESTION # 54

Which two statements about equal-cost multi-path (ECMP) configuration on FortiGate are true? (Choose two.)

- A. If SD-WAN is enabled, you can configure routes with unequal distance and priority values to be part of ECMP.
- B. If SD-WAN is enabled, you control the load balancing algorithm with the parameter load-balance-mode.
- C. If SD-WAN is disabled, you configure the load balancing algorithm in config system settings.
- D. If SD-WAN is disabled, you can configure the parameter v4-ecmp-mode to volume-based.

**Answer: B,D**

Explanation:

When SD-WAN is disabled, FortiGate supports volume-based ECMP mode via the v4-ecmp-mode parameter.

When SD-WAN is enabled, the load balancing algorithm is controlled by the load-balance-mode parameter within the SD-WAN configuration.

#### NEW QUESTION # 55

What are two features of FortiGate FSSO agentless polling mode? (Choose two.)

- A. FortiGate does not support workstation check.
- B. FortiGate uses the AD server as the collector agent.
- C. FortiGate uses the SMB protocol to read the event viewer logs from the DCs.
- D. FortiGate directs the collector agent to use a remote LDAP server.

**Answer: B,C**

Explanation:

FortiGate uses the SMB protocol to read the event viewer logs from the DCs → In agentless polling mode, FortiGate connects directly to the AD domain controllers using SMB to collect logon events.

FortiGate uses the AD server as the collector agent → There is no external FSSO collector; instead, the FortiGate itself polls the AD servers, effectively treating them as the source of logon information.

#### NEW QUESTION # 56

Refer to the exhibit. Which two statements about the FortiGuard connection are true? (Choose two.)

```
FortiGate # diagnose debug rating
Locale      : English

Service     : Web-filter
Status:     : Enable
License     : Contract
\
Num. of servers : 1
Protocol    : https
Port       : 8888
Anycast    : Disable
Default servers : Not included

```

- A. FortiGate identified the FortiGuard Server using DNS lookup.
- B. FortiGate is using the default port for FortiGuard communication.
- C. You can configure unreliable protocols to communicate with FortiGuard Server.
- D. The weight increases as the number of failed packets rises.

**Answer: B,D**

Explanation:

FortiGuard web filtering, DNS filtering, and antispam service.fortiguard.net uses a proprietary protocol over UDP port 53 or 8888  
securewf.fortiguard.net uses HTTPS over ports 443, 53, or 8888.

The weight value reflects server reliability. It decreases with good performance and increases as packet loss or failures rise, meaning higher weight indicates more failures.

#### NEW QUESTION # 57

Refer to the exhibits. The exhibits show the application sensor configuration and the Excessive- Bandwidth and Apple filter details. Based on the configuration, what will happen to Apple FaceTime if there are only a few calls originating or incoming?

2	<b>VEND</b> Apple	Filter	<input type="checkbox"/> Monitor

- A. Apple Face Time will be allowed, based on the Apple filter configuration.
- B. Apple Face Time will be allowed only if the Apple filter in Application and Filter Overrides is set to Allow.
- C. Apple Face Time will be blocked, based on the Excessive-Bandwidth filter configuration.
- D. Apple Face Time will be allowed, based on the Video/Audio category configuration.

Answer: A

Explanation:

Apple FaceTime normally falls under Video/Audio and could be blocked by the Excessive- Bandwidth filter. However, in this configuration, an override is applied under the Apple vendor filter with Monitor action. Overrides take precedence over general filter actions. Therefore, FaceTime will not be blocked; instead, it will be monitored, and since only a few calls are made (not excessive bandwidth usage), it will be allowed based on the Apple filter configuration.
