Dumps Plat-Admn-201 Reviews & Books Plat-Admn-201 PDF

If you want to get something done, just roll up your sleeves and do it. If you want to clear Plat-Admn-201 exam, let our training online files help you. The more difficult the thing is the more important and useful it is. Salesforce Plat-Admn-201 training online files help your difficult thing become simple. Professionals be professionals! People can be defeated, but can't be beat. If you are determined to get a IT certification, you should not give up if you fail exam. Our Plat-Admn-201 Training Online files will be the right exam materials for your choice.

Salesforce Certified Platform Administrator Sample Questions (Q42-Q47):

NEW QUESTION # 42

The administrator at Universal Containers is creating a flow with several steps. How can the administrator check their work as they are developing the flow?

- A. Perform the same steps manually via the UI
- **B. Use the Debug tool in the flow builder**
- C. Use debug logs found in Setup
- D. Use debug logs in the Developer Console

Answer: B

NEW QUESTION # 43

Cloud Kicks has three teams of customer service reps that use a custom field on the Case object to populate the team assigned to manage the tickets. The customer support manager would like a Custom Dashboard to show data specific to each team. What should a Platform Administrator do to meet this requirement?

- A. Create separate Dashboards for each Customer Support team.
- B. Add Cross Filters to switch between the three customer service teams.
- C. Create a Dashboard with widgets specific to each team.
- **D. Create a Dashboard that uses Dashboard filters to show specific team data.**

Answer: D

Explanation:

To avoid the administrative burden of creating and maintaining multiple identical dashboards for different teams, a Platform Administrator should use Dashboard Filters. By adding a filter based on the "Team Assigned" custom field, the administrator can create a single dashboard that the manager can toggle between "Team A," "Team B," and "Team C". Each time a filter value is selected, all components on the dashboard that use that field (or a mapped equivalent) will automatically refresh to show the data relevant only to that team. Creating separate dashboards (Option A) is inefficient and leads to "dashboard sprawl". Adding specific widgets for every team on one dashboard (Option B) would result in a cluttered and confusing interface. Cross Filters (Option D) are a reporting feature used to filter records based on their relationship to other objects, not a dashboard-level viewing tool.

NEW QUESTION # 44

A sales manager at Cloud Kicks would like a dashboard to emphasize some important data and tell a more compelling data story to the sales reps. How should a Platform Administrator achieve this for the sales manager?

- A. Use the Highlights Panel.
- **B. Use a Text Widget.**
- C. Assign a new Task to each rep.
- D. Send out a mass email.

Answer: B

Explanation:

In Salesforce Lightning Dashboards, Text Widgets allow administrators to add descriptive text, titles, and custom narratives directly alongside data visualizations. This is a key feature for "telling a compelling data story" because it allows the admin to provide context, explain the significance of certain charts, or provide instructions and motivational messages to the team. By adding text widgets, a dashboard moves from being a collection of raw charts to a guided analytical experience. The Highlights Panel (Option C) is a feature of Record Pages, not Dashboards.

Assigning tasks (Option B) or sending mass emails (Option D) are communication methods but do not enhance the visual or narrative quality of the dashboard itself. Text widgets empower administrators to highlight trends and call out specific goals, making the data more actionable and easier to interpret for the sales reps.

NEW QUESTION # 45

Users have reported that the new Lightning account record page is loading very slowly. Which feature should a Platform Administrator use to determine the cause of the performance issues?

- A. Lightning Usage App
- **B. Lightning App Builder Analytics**
- C. Lightning Page Visibility Rule
- D. Lightning Analytics

Answer: B

Explanation:

The Lightning App Builder includes a built-in Analysis tool (often referred to as Page Analysis or Analytics) that provides administrators with a performance score for a record page. This tool evaluates the page's metadata and components to identify factors that contribute to slow load times, such as having too many fields in a single section, using complex related lists, or including multiple heavy Lightning Web Components. It provides specific suggestions, such as using "Dynamic Forms" to break up the page or moving less-used components into separate tabs to improve the "time to interact" for the user. The Lightning Usage App (Option B) provides broad metrics on adoption and browser usage across the whole org but does not offer granular, component-level performance analysis for a single record page. Visibility Rules (Option C) are for showing/hiding content, not for technical performance auditing.

NEW QUESTION # 46

One of the sales managers at Universal Containers will be going on leave for several months.

The executives want to make sure the sales manager does not log in to Salesforce while on leave. What should a Platform Administrator do to ensure the user is not able to log in while on leave?

- A. Reassign the user's license during leave.
- B. Restrict Login IP Addresses for the profile.
- **C. Freeze the user's account.**
- D. Change the Login Hours for the profile.

Answer: C

Explanation:

When a user needs to be temporarily prevented from logging in--but their records, role, and historical data need to remain intact--the best practice is to Freeze the user. Freezing an account stops the user from accessing the system immediately without "Deactivating" them. Deactivation can be problematic if the user is a "running user" for dashboards or is part of active hierarchy logic that might break if the account is disabled. Freezing is a simple "one-click" action on the user record. Reassigning the license (Option A) would require deactivating the user first.

Changing login hours (Option B) or IP addresses (Option D) at the profile level would impact all users assigned to that profile, not just the individual manager on leave. Freezing provides a targeted and temporary solution for managing individual user access.

NEW QUESTION # 47

.....

You only need 20-30 hours to learn Plat-Admn-201 exam torrent and prepare the Plat-Admn-201 exam. Many people, especially the in-service staff, are busy in their jobs, learning, family lives and other important things and have little time and energy to learn and prepare the Plat-Admn-201 exam.
