

100% Pass Quiz 2026 Accurate C-BW4H-2505: Knowledge SAP Certified Associate - Data Engineer - SAP BW/4HANA Points

SAP CERTIFICATION

If people buy and use the C-BW4H-2505 study materials with bad quality to prepare for their exams, it must do more harm than good for their exams, thus it can be seen that the good and suitable C-BW4H-2505 study materials is so important for people' exam that people have to pay more attention to the study materials. In order to help people pass the exam and gain the certification, we are glad to the C-BW4H-2505 Study Materials from our company for you.

SAP C-BW4H-2505 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Fundamentals: This section of the exam measures the foundational understanding of SAP Consultants and covers essential terms and concepts related to SAP BW • 4HANA and SAP Business Data Cloud. It focuses on the core framework and architecture necessary to navigate and work with these platforms.
Topic 2	<ul style="list-style-type: none"> • InfoObjects and InfoProviders: This section tests the knowledge of Data Engineers in working with InfoObjects and InfoProviders in SAP BW • 4HANA. It involves handling data structures used for organizing, storing, and accessing analytical data.
Topic 3	<ul style="list-style-type: none"> • SAP BW Query Design: This section of the exam assesses the ability of Data Engineers to create and run queries using SAP BW • 4HANA. It evaluates how well candidates can work with query components to retrieve and structure data effectively for reporting and analysis.

Topic 4	<ul style="list-style-type: none"> • SAP BW • 4HANA Project and the Modeling Process: This section of the exam assesses how Data Engineers guide and contribute to SAP BW • 4HANA projects. It includes knowledge of modeling workflows, project lifecycle stages, and collaboration strategies within project teams.
Topic 5	<ul style="list-style-type: none"> • SAP Analytics Tools and SAP Analytics Cloud: This section evaluates the skills of SAP Consultants in using tools like SAP Analytics Cloud, Lumira, and Analysis for Office to visualize and interpret data. It focuses on the consultant's ability to apply business intelligence tools within the SAP ecosystem.
Topic 6	<ul style="list-style-type: none"> • SAP BW • 4HANA Data Flow: This section of the exam measures the practical ability of SAP Consultants to load data within the SAP BW • 4HANA environment. It assesses familiarity with data movement and transformation processes across different layers of the system.
Topic 7	<ul style="list-style-type: none"> • Data Acquisition into SAP BW • 4HANA: This section tests how Data Engineers manage data integration into SAP BW • 4HANA from multiple sources. It covers essential knowledge of tools and processes used for data extraction, transformation, and loading into the SAP environment.
Topic 8	<ul style="list-style-type: none"> • Data Acquisition into SAP HANA: This section evaluates the capacity of SAP Consultants to integrate various data sources into SAP HANA. It assesses their ability to understand different ingestion techniques and ensure data accessibility for processing.
Topic 9	<ul style="list-style-type: none"> • SAP BW • 4HANA Modeling: This section targets the skills of Data Engineers in selecting appropriate modeling options and applying best practices like LSA++ within SAP BW • 4HANA. It focuses on designing scalable, high-performing data models.

C-BW4H-2505 test study engine & C-BW4H-2505 training questions & C-BW4H-2505 valid practice material

New latest SAP C-BW4H-2505 valid exam study guide can help you exam in short time. Candidates can save a lot time and energy on preparation. It is a shortcut for puzzled examinees to purchase C-BW4H-2505 valid exam study guide. If you choose our products, you only need to practice questions several times repeatedly before the real test. Our products are high-quality and high passing rate, and then you will obtain many better opportunities.

SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q63-Q68):

NEW QUESTION # 63

What should you consider when you set the High Cardinality flag for a characteristic? Note: There are 2 correct answers to this question.

- A. You cannot use navigation attributes for this characteristic.
- B. You cannot load more than 2 billion master data records for this characteristic.
- C. You cannot use this characteristic as an external characteristic in hierarchies.
- D. You cannot use this characteristic as a navigation attribute for another characteristic.

Answer: A,D

Explanation:

In SAP BW/4HANA, the High Cardinality flag is used to optimize the handling of characteristics with a very large number of distinct values (e.g., transaction IDs, timestamps). However, enabling this flag imposes certain restrictions on how the characteristic can be

used. Below is an explanation of the correct answers and why they are valid.

* A. You cannot use this characteristic as a navigation attribute for another characteristic.

* When the High Cardinality flag is set, the characteristic cannot serve as a navigation attribute for another characteristic. Navigation attributes are used to provide additional descriptive information for a characteristic, but high-cardinality characteristics are not suitable for this purpose due to their large size and potential performance impact.

* SAP BW/4HANA enforces this restriction to ensure optimal performance and avoid excessive memory consumption during query execution.

B). You cannot use navigation attributes for this characteristic.

Similarly, a characteristic with the High Cardinality flag cannot have navigation attributes assigned to it.

Navigation attributes add complexity and increase the volume of data processed during reporting, which is incompatible with the optimization goals of high-cardinality characteristics.

Reference: SAP BW/4HANA restricts the use of navigation attributes for high-cardinality characteristics to maintain efficient query performance.

Incorrect Options: C. You cannot load more than 2 billion master data records for this characteristic.

This statement is incorrect. The High Cardinality flag is specifically designed to handle characteristics with very large numbers of distinct values, including scenarios where the number of master data records exceeds 2 billion.

Reference: SAP BW/4HANA supports high-cardinality characteristics to manage massive datasets efficiently, leveraging SAP HANA's in-memory capabilities.

D). You cannot use this characteristic as an external characteristic in hierarchies.

While high-cardinality characteristics are not typically used in hierarchies due to their size and complexity, there is no explicit restriction preventing them from being used as external characteristics in hierarchies.

Reference: SAP BW/4HANA allows high-cardinality characteristics to be included in hierarchies, but their usage should be carefully evaluated to avoid performance issues.

Conclusion: The correct answers are A. You cannot use this characteristic as a navigation attribute for another characteristic and B.

You cannot use navigation attributes for this characteristic, as these restrictions are imposed to optimize performance and memory usage for high-cardinality characteristics in SAP BW/4HANA.

NEW QUESTION # 64

You have an existing field-based data flow that follows the layered scalable architecture (LSA++) concept. To meet a new urgent business requirement for field you want to leverage a hierarchy of an existing characteristic without changing the transformation. How can you achieve this? Note: There are 2 correct answers to this question.

- A. Add the characteristic to the DataStore object (advanced)
- B. Assign hierarchy properties to the field in the BW Query
- C. Associate the field with the characteristic in the Composite Provider
- D. Associate the field with the characteristic in the Open ODS View

Answer: C,D

NEW QUESTION # 65

Which external hierarchy properties can be changed in the query definition? Note: There are 3 correct answers to this question.

- A. Time dependency
- B. Position of child nodes
- C. Display text nodes
- D. Sort direction
- E. Exp to level

Answer: C,D,E

Explanation:

In SAP Data Engineer - Data Fabric, particularly when working with hierarchies in query definitions, external hierarchies are used to organize and structure data in a meaningful way for reporting and analysis. External hierarchies are predefined hierarchies that can be integrated into queries, and certain properties of these hierarchies can be adjusted within the query definition to meet specific reporting requirements.

* B. Sort direction

* The sort direction determines the order in which the hierarchy nodes are displayed in the query results. You can choose to sort the hierarchy in ascending or descending order based on node names, key values, or other attributes. This property is adjustable in the query definition to allow flexibility in how the data is presented to end users.

* In SAP BW (Business Warehouse) and SAP Data Engineer - Data Fabric, sorting options for hierarchies are available in the query designer under the hierarchy settings.

C). Exp to level

The "Exp to level" property allows you to specify the depth to which the hierarchy should be expanded when displayed in the query results. For example, if you set "Exp to level" to 3, the hierarchy will automatically expand to show all nodes up to the third level.

This is useful for controlling the granularity of data displayed without requiring manual expansion by the user.

Reference: In SAP BW Query Designer, this property is part of the hierarchy display settings and can be configured during query design.

D). Display text nodes

The "Display text nodes" property controls whether text nodes (descriptive labels) are shown alongside the hierarchy nodes in the query output. Text nodes provide additional context or descriptions for each node, making the hierarchy easier to interpret for end users.

Reference: This property is commonly used in SAP BW and SAP Data Engineer - Data Fabric to enhance the readability of hierarchical data in reports.

Incorrect Options:A. Position of child nodes

The position of child nodes within a hierarchy is determined by the hierarchy's structure and cannot be altered in the query definition. It is a fixed property defined during the creation of the hierarchy in the backend system.

Reference: SAP documentation specifies that structural properties like node positions are not modifiable at the query level.

E). Time dependency

Time dependency is a characteristic of the hierarchy itself, indicating whether the hierarchy changes over time (e.g., organizational structures that evolve). This property is defined during the creation of the hierarchy and cannot be changed in the query definition.

Reference: SAP BW and SAP Data Engineer - Data Fabric treat time-dependent hierarchies as static entities in the query context, meaning their time dependency cannot be altered dynamically.

Conclusion:The three correct answers-Sort direction,Exp to level, andDisplay text nodes-are properties that can be modified in the query definition to customize the presentation of external hierarchies. These adjustments provide flexibility in how hierarchical data is displayed and analyzed, enhancing the usability of reports and dashboards in SAP Data Engineer - Data Fabric environments.

NEW QUESTION # 66

For which scenarios do you use the SAP HANA model focus? Note: There are 2 correct answers to this question.

- A. Define calculations using geospatial functions.
- B. Load snapshots using ABAP CDS Views.
- C. Define ABAP Managed Database Procedures in data flows.
- D. Build views procedures using SQL script.

Answer: A,D

NEW QUESTION # 67

In a BW query with cells, you need to overwrite the initial definition of a cell. Which cell types can you use?

Note: There are 2 correct answers to this question.

- A. Selection cell
- B. Help cell
- C. Formula cell
- D. Reference cell

Answer: A,C

NEW QUESTION # 68

.....

SAP C-BW4H-2505 certified examinations questions are collected and edited by latest exam teaching program and real test questions materials. We are engaged in updating our training materials constantly. If you are afraid that once you purchase our current version of C-BW4H-2505 Certified examinations questions, then there is new update version, current version will be out, please rest assured that you can download free our latest version one we release new version within one year.
