Veeam Certified Engineer VMCE V12 Exam With Complete Solutions 2024

Veeam Certified Engineer V12 (VMCE) Certification Answer: The VMCE certification is documented proof that an administrator or engineer has the necessary level of expertise to protect an organization's data with the Veeam Data Platform. The Veeam Certified Engineer V12 exam is a certification assessment designed to verify candidates meet the level of competence required for certification. The exam assesses knowledge of and ability to deploy, manage, and maintain scalable Veeam infrastructures and understand the key features and components of Veeam Data Platform. The exam has been developed in line with 12.0.0.1420 build capabilities.

Candidate Profile Answer: This certification is for anyone responsible for protecting data with Veeam Data Platform. To qualify for a Veeam certification exam, candidates must attend the Veeam Backup & Replication V12: Configure, Manage and Recover training course through a Veeam Authorized Education Center (VMAEC).

VMCE Exam Details Answer: The exam consists of 60 multiple choice items, 50 of which are scored. The Veeam Certified Engineer V12 exam uses a scoring scale of 300 – 900 with a cut score of 720. On completing the exam, candidates receive a score report. On achieving a passing score, candidates receive their certificate, digital badge, and priority access to technical support. Test takers have 75 minutes to take the exam. A 15-minute time extension is available when the exam is delivered in regions where the local language is not English. The exam is available in English (US). The exam is delivered through Pearson VUE test centers or on their Online Proctored Platform.

You can use this format of Veeam Certified Engineer v12 (VMCE_v12) actual questions on your smart devices. In addition to the Veeam Certified Engineer v12 (VMCE_v12) PDF dumps, we also offer Veeam Certified Engineer v12 (VMCE_v12) practice exam software. You will find the same ambiance and atmosphere when you attempt the real Veeam VMCE_v12 exam.

Veeam VMCE_v12 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Virtual machine backup: This section of the exam covers protecting the VMware and Hyper V to safeguard VMware that follows SLAs.
Topic 2	<ul style="list-style-type: none">Moving or copying backups: This section of the exam covers use cases for backup processes using VeeamMover.
Topic 3	<ul style="list-style-type: none">Veeam Backup Enterprise Manager: The section describes the use cases for Veeam Backup Enterprise Manager.

Topic 4	<ul style="list-style-type: none"> • Veeam Data Platform: This section deals with the identification and description of the goal of each major product in the Veeam Data Platform.
Topic 5	<ul style="list-style-type: none"> • Core components: This section of the exam covers exploring the functionality of Veeam Backup & Replication and system requirements.
Topic 6	<ul style="list-style-type: none"> • Risk scenarios: This section covers exploring various risk scenarios and identifying the type of risks we may face in the environment.
Topic 7	<ul style="list-style-type: none"> • Scale-out Backup Repository: This section of the exam covers the description of the architecture, placement policies, and data tiers.
Topic 8	<ul style="list-style-type: none"> • Transport modes: This section aims to analyze different methods to collect and read data from the production environment.
Topic 9	<ul style="list-style-type: none"> • Verifying recoverability: This section of the exam covers the creation of automated tests to ensure recoverability from backups and replicas.
Topic 10	<ul style="list-style-type: none"> • Backup copies: This section ensures the process of recoverability and adheres to the 3-2-1 Rule with backup copy processes.
Topic 11	<ul style="list-style-type: none"> • Unstructured data backup: This section is about highlighting vital features required to protect unstructured data.
Topic 12	<ul style="list-style-type: none"> • Incident Response Planning: This section of the exam covers integrating Veeam Backup and Replication into the incident response strategy.
Topic 13	<ul style="list-style-type: none"> • Initial security considerations: This section defines ways and tools to secure the Veeam backup server.
Topic 14	<ul style="list-style-type: none"> • Recovery scenarios and features: This section covers the impact of various recovery procedures and choosing the most viable recovery technique.
Topic 15	<ul style="list-style-type: none"> • Enacting a recovery: This section is about getting practice in recovering various recoveries with diverse data.

New Veeam VMCE_v12 Test Price & Dump VMCE_v12 Collection

The whole world of VMCE_v12 preparation materials has changed so fast in the recent years because of the development of internet technology. We have benefited a lot from those changes. In order to keep pace with the development of the society, we also need to widen our knowledge. If you are a diligent person, we strongly advise you to try our VMCE_v12 real test. You will be attracted greatly by our VMCE_v12 practice engine. .

Veeam Certified Engineer v12 Sample Questions (Q107-Q112):

NEW QUESTION # 107

Veeam ONE has been installed and configured. The infrastructure contains five Veeam Backup & Replication servers. The administrator needs to check the remaining capacity on each of the backup repository servers.

Where can they see this information?

- A. Under Infrastructure View, look up the backup repository servers to see the guest disk space.
- B. Under Infrastructure View, look up the Veeam Backup & Replication servers to see the guest disk space.
- C. Under Business View, look up the backup repository servers to see the remaining capacity.
- D. Under Data Protection View, look up the backup repository servers to see the remaining capacity

Answer: D

Explanation:

In Veeam ONE, the remaining capacity of each backup repository server can be viewed under the Data Protection View. This section provides detailed information about the storage utilization and remaining capacity of backup repositories, allowing administrators to effectively monitor and manage storage resources. References: Veeam ONE User Guide, Veeam ONE Data Protection View Documentation

NEW QUESTION # 108

A Backup Administrator needs to create a fully functional VM at a secondary location in an isolated network.

The VM should not require manual editing or modifications to the configuration. Which of the following jobs could the Backup Administrator use? Choose two options.

- A. VM Copy
- B. Backup
- C. SureBackup
- D. Replication
- E. VeeamZip
- F. Configuration Backup

Answer: A,D

Explanation:

Explanation

NEW QUESTION # 109

An engineer needs to be able to perform all functions without needing to access the backup server locally or over remote desktop. What should the engineer do?

- A. Install the Veeam console on the engineer's desktop.
- B. Use SSH to connect to the Veeam Backup & Replication server.
- C. Install the required Veeam Explorers locally
- D. Use Enterprise Manager to connect to the Veeam Backup & Replication server.

Answer: A

Explanation:

By default, the Veeam Backup & Replication console is installed on the backup server automatically when you install Veeam Backup & Replication. You do not need to install the console manually.

However, in addition to the default console, you can install the Veeam Backup & Replication console on a dedicated machine to access the backup server remotely. You can install as many remote consoles as you need.

NEW QUESTION # 110

An administrator needs to dynamically add VMware VMs that have a custom application installed to a backup job. How can this job be created?

- A. Use the RESTful API to scan the VM inventory for machines that match the criteria.
- B. Modify a custom CSV file to be scanned before the start of each job.
- C. Create a backup job based on vSphere tags.
- D. In Enterprise Manager, create a dynamic group of VMs that contain both tags.

Answer: C

Explanation:

To dynamically include VMware VMs with a custom application installed in a backup job, the most efficient approach is C: Create a backup job based on vSphere tags. VMware vSphere tagging allows administrators to assign metadata to VMs, making it easier to categorize and manage them according to various criteria, such as application type, department, or any custom criteria relevant to the organization. Veeam Backup & Replication can leverage these tags to dynamically include VMs in backup jobs. By setting up a backup job to include VMs tagged with a specific identifier related to the custom application, any VM tagged accordingly will be

automatically included in the backup job. This approach simplifies management, ensures consistency, and allows for the flexible and dynamic grouping of VMs based on changing criteria without the need for manual adjustments to the backup job configuration.

NEW QUESTION # 111

The configuration database is corrupted, and the backup administrator wants to recover the data. Which configuration restore mode should be used?

- A. Failover
- B. Instant Recovery
- C. Migrate
- D. Restore

Answer: D

Explanation:

In the event that the Veeam Backup & Replication configuration database is corrupted, the appropriate action to take is to perform a configuration restore. Veeam Backup & Replication allows you to back up and restore its configuration database. The Restore option should be used to recover the data from a configuration backup.

This process will restore the configuration database from the backup file, which includes information about backup jobs, repository settings, and more. Instant Recovery, Failover, and Migrate are not appropriate options for recovering a corrupted configuration database. Instant Recovery is used to quickly restore a VM to a running state, Failover is used for High Availability in case a VM fails, and Migrate is used to move VMs from one host or storage to another.

NEW QUESTION # 112

• • • • •

Here in this Desktop practice test software, the Veeam Certified Engineer v12 (VMCE_v12) practice questions given are very relevant to the actual Veeam Certified Engineer v12 (VMCE_v12) exam. It is compatible with Windows computers. Pass4Test provides its valued customers with customizable Veeam Certified Engineer v12 (VMCE_v12) practice exam sessions. The Veeam Certified Engineer v12 (VMCE_v12) practice test software also keeps track of the previous Veeam VMCE_v12 practice exam attempts.
