Salesforce Certified Experience Cloud Consultant Sample Questions (Q34-Q39):

NEW QUESTION # 34

A consultant needs to leverage ExperienceBundle for a deployment but is unable to view it. What is the most likely cause for this issue?

- A. The "Enable ExperienceBundle Metadata API" setting needs to be checked.
- B. A custom Experience template needs to be created.
- C. A change set containing the Network needs to be deployed.
- D. The experience has not yet been published.

Answer: A

Explanation:

The ExperienceBundle Metadata API allows you to retrieve, deploy, create, update, or delete an Experience Cloud site's metadata definition in a single API call. To use this API, you need to enable the "Enable ExperienceBundle Metadata API" setting in the Experience Cloud site's administration settings.

NEW QUESTION # 35

Universal Containers (UC) wants to create a do-it-yourself site for its existing and prospective customers. The site will contain articles, belong manuals, and FAQs. Users will be able to ask questions and answer other users' questions on the site. Which two Experience Cloud features should UC focus on as it starts building out the site?

Choose 2 answers

- A. Document Library Model (DLM)
- B. Content Delivery Network
- C. Guest user and public access settings
- D. Public Site Connect

Answer: B,C

Explanation:

To create a do-it-yourself site for its existing and prospective customers, UC should focus on two Experience Cloud features:

* Guest user and public access settings. These settings allow you to control what unauthenticated users can see and do on your site, such as viewing articles, manuals, and FAQs, or asking and answering questions.

* Content Delivery Network. This is a feature that allows you to improve the performance of your site by caching static resources, such as images, JavaScript, and CSS files. This can enhance the user experience and reduce the load on your server.

NEW QUESTION # 36

DreamHouse Realty recently created a site for potential buyers. The content is organized using topics.

Where can site users go to find out how current and popular a topic is?

- A. Topic's detail page
- B. Collaboration Dashboard
- C. Content Management Report
- D. Trending Topics Channel

Answer: A

Explanation:

To find out how current and popular a topic is, site users can go to the topic's detail page. The topic's detail page shows information such as the number of followers, the number of posts, and the last activity date of the topic. Site users can also see the related topics and subtopics, as well as filter the content by type or time range.

NEW QUESTION # 37

Ursa Major Solar is utilizing audience targeting for specific components in its portal.

Which two considerations regarding audience targeting are true? Calculator Choose 2 answers

- A. You can only have three audiences.
- B. Available domains are created in the Administration workspace and associated with a community through a custom URL.
- C. You can't assign audiences to the components in the template header and footer sections.
- D. You can't assign record-based criteria to a component or branding set.

Answer: C,D

Explanation:

Audience targeting allows you to display different content to different audiences based on criteria such as profile, location, domain, or user. However, there are some limitations of audience targeting, such as:

* You can't assign audiences to the components in the template header and footer sections. These sections are shared across all pages in your site and can't be customized for different audiences.

* You can't assign record-based criteria to a component or branding set. Record-based criteria are only available for page variations and navigation menu items.

NEW QUESTION # 38

The Experience Cloud site manager of Cloud Kicks has enabled reputation for its community members. As per the recommendation given by the Experience Cloud consultant, a decision was made to use the out of the box features.

Which two things happen automatically when the site manager enables automation? Choose 2 answers

- A. Inactive and active members are assigned default reputation points.
- B. Chatter influence is removed from the Contribution section on the Profile page.
- C. Customer portal members gain the ability to provide badges to other members.
- D. Default point system and set of reputation levels become available.

Answer: A,D

Explanation:

Reputation is a feature that allows you to reward community members for their contributions and engagement.

When you enable reputation for your community, some things happen automatically, such as:

* Inactive and active members are assigned default reputation points. Inactive members get zero points, while active members get 10 points.

* Default point system and set of reputation levels become available. You can use the default point system or customize it to suit your needs. You can also use the default reputation levels or create your own.
