2026 Microsoft Professional DP-203 Valid Test Dumps

We guarantee that you can enjoy the premier certificate learning experience under our help with our DP-203 prep guide since we put a high value on the sustainable relationship with our customers. First of all we have fast delivery after your payment in 5-10 minutes, and we will transfer DP-203 guide torrent to you online, which mean that you are able to study as soon as possible to avoid a waste of time. Besides if you have any trouble coping with some technical and operational problems while using our DP-203 Exam Torrent, please contact us immediately and our 24 hours online services will spare no effort to help you solve the problem in no time. As a result what we can do is to create the most comfortable and reliable customer services of our DP-203 guide torrent to make sure you can be well-prepared for the coming exams.

Microsoft Data Engineering on Microsoft Azure Sample Questions (Q180-

Q185):

NEW QUESTION # 180

You are deploying a lake database by using an Azure Synapse database template.

You need to add additional tables to the database. The solution must use the same grouping method as the template tables.

'Which grouping method should you use?

- A. partition style
- B. facts and dimensions
- **C. business area**
- D. size

Answer: C

Explanation:

Business area: This is how the Azure Synapse database templates group tables by default. Each template consists of one or more enterprise templates that contain tables grouped by business areas. For example, the Retail template has business areas such as Customer, Product, Sales, and Store123. Using the same grouping method as the template tables can help you maintain consistency and compatibility with the industry-specific data model.

NEW QUESTION # 181

You have a trigger in Azure Data Factory configured as shown in the following exhibit.

□ Use the drop-down menus to select the answer choice that completes each statement based upon the information presented in the graphic.

Answer:

Explanation:

□ Explanation:

NEW QUESTION # 182

You are designing a real-time dashboard solution that will visualize streaming data from remote sensors that connect to the internet.

The streaming data must be aggregated to show the average value of each 10-second interval. The data will be discarded after being displayed in the dashboard.

The solution will use Azure Stream Analytics and must meet the following requirements:

- * Minimize latency from an Azure Event hub to the dashboard.
- * Minimize the required storage.
- * Minimize development effort.

What should you include in the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point

Answer:

Explanation:

□ Explanation

NEW QUESTION # 183

You have an Azure subscription linked to an Azure Active Directory (Azure AD) tenant that contains a service principal named ServicePrincipal1. The subscription contains an Azure Data Lake Storage account named adls1. Adls1 contains a folder named Folder2 that has a URI of <https://adls1.dfs.core.windows.net/container1/Folder1/Folder2/>.

ServicePrincipal1 has the access control list (ACL) permissions shown in the following table.

□ You need to ensure that ServicePrincipal1 can perform the following actions:

Traverse child items that are created in Folder2.

Read files that are created in Folder2.

The solution must use the principle of least privilege.

Which two permissions should you grant to ServicePrincipal1 for Folder2? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Default - Write
- B. Default - Execute
- C. Access - Read
- D. Access - Execute
- E. Access - Write
- F. Default-Read

Answer: B,F

Explanation:

Execute (X) permission is required to traverse the child items of a folder.

There are two kinds of access control lists (ACLs), Access ACLs and Default ACLs.

Access ACLs: These control access to an object. Files and folders both have Access ACLs.

Default ACLs: A "template" of ACLs associated with a folder that determine the Access ACLs for any child items that are created under that folder. Files do not have Default ACLs.

Reference:

<https://docs.microsoft.com/en-us/azure/data-lake-store/data-lake-store-access-control>

NEW QUESTION # 184

You have an Azure subscription that contains an Azure Synapse Analytics dedicated SQL pool named Pool 11 and a storage account. The storage account contains a blob container. The blob container contains multiple CSV files.

You plan to load the files into Pool1 by using the following code.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 185

.....
