You can download a free demo of SAP C_TS414_2023 PDF dumps and practice software before buying.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q52-Q57):

NEW QUESTION # 52

You want to create a certificate for an outbound delivery. At which level can you create the certificate?

- A. Material level
- B. Delivery item level
- C. Delivery header level
- D. Shipping point level

Answer: B

Explanation:

In SAP S/4HANA QM, outgoing quality certificates are generated for outbound deliveries (e.g., inspection type 10 or 11) to provide quality data to customers:

* Delivery Item Level (C): Certificates are created at the delivery item level (transaction QC20) because each item in a delivery (VL01N) can have unique materials, batches, and inspection results requiring specific certificate data. The certificate profile (transaction QC01) is assigned to material/customer combinations, and the system generates certificates per item based on this linkage (SPRO > QM > Quality Certificates > Outgoing).

* Material Level (A): Certificates aren't created at the material master level; they're tied to specific delivery transactions.

* Shipping Point Level (B): Shipping points manage logistics, not certificate granularity.

* Delivery Header Level (D): While the delivery header exists, certificates are item-specific to reflect individual material quality.

Thus, "Delivery item level" is the correct answer. References: SAP Help Portal - "Outgoing Quality Certificates"; SAP S/4HANA QM User Guide - "Certificate Creation".

NEW QUESTION # 53

How does the system handle equipment and functional locations in an inspection lot in calibration inspection?

- A. As a material
- B. As a inspection point
