EPIC EDI101 practice test is

very customizable and you can adjust its time and number of questions.

## **EPIC CEE: Bridges Interfaces Application Essentials Exam (2026 Version) Sample Questions (Q34-Q39):**

### **NEW QUESTION # 34**

What makes up the list of results reported from an Error Log Report?

- A. Messages
- B. Workqueues
- **C. Errors**
- D. Resolution Plans

**Answer: C**

Explanation:

The primary purpose of the Error Log Report is to provide a granular list of individual Error instances.

While these errors are linked to messages, the report result list displays the errors themselves, allowing analysts to see the specific failure reason, time, and error code for every occurrence.

### **NEW QUESTION # 35**

Why does Epic strongly recommend or require Patient Validation on incoming interfaces?

- A. Help maximize revenue
- B. File data into the system faster
- C. Prevent the creation of duplicate patients
- **D. Ensure data files to the correct patient**

**Answer: D**

Explanation:

Patient Validation is a critical safety feature. Its primary purpose is to cross-reference multiple identifiers (like Name, DOB, and Sex) received in a message against the record found via the ID. If the ID points to " John Doe " but the message text says " Jane Smith, " validation will fail and prevent clinical data from filing to the wrong patient record , which is a major patient safety risk.

### **NEW QUESTION # 36**

Which queue contains a list of messages waiting for a patient lock?

- A. Event Queue
- B. Data Queue
- **C. Holding Queue**
- D. Control Queue

**Answer: C**

Explanation:

If an incoming message arrives for a patient whose record is currently being edited by a user in Hyperspace, the record is " locked. "

Bridges cannot file to a locked record, so it places the message in the Holding Queue

. Once the user finishes their work and the lock is released, the message is moved back to the Data Queue to be filed.

### **NEW QUESTION # 37**

In a general table, what must be unique?

- A. None of these
- **B. Primary Key**
- C. Data Columns
- D. Table Name

**Answer: B**

Explanation:

Just like a standard database table, a General Table in Bridges relies on a Primary Key to uniquely identify each row of data. While multiple rows might share similar values in their data columns (Option D), the Primary Key itself must be unique to ensure the system can precisely retrieve the correct data during a lookup.

### NEW QUESTION # 38

Which documents can be shared with other software vendors interested in integrating with Epic interfaces?

- A. Interface Reference Guides in Hyperspace
- B. Interface Reference Guides in Galaxy
- C. Technical Specifications on open.epic.com
- D. EDI101 Training Companion

**Answer: C**

Explanation:

Epic maintains a public-facing portal (open.epic.com) specifically for third-party vendors and developers.

While Interface Reference Guides (IRGs) in Hyperspace or Galaxy contain proprietary information intended for Epic customers, the Technical Specifications on open.epic.com are designed to be shared to facilitate interoperability and standards-based integration.

### NEW QUESTION # 39

.....

In order to help you get EDI101 certification, many experts have worked hard for several years to formulate EDI101 exam torrent for all examiners. In such a way, our EDI101 study materials not only target but also cover all knowledge points. Our EDI101 practice materials also have a statistical analysis function to help you find out the deficiency in the learning process of EDI101 practice materials, so that you can strengthen the training for weak links. In this way, you can more confident for your success since you have improved your ability.
