최신 Accredited Professional AP-208 무료샘플문제 (Q48-Q53):

질문 # 48
Which three of these statements are true for Rollup By Lookup (RBL) in Financial Services Cloud?

- A. The Rollup By Lookup (RBL) configuration updates the corresponding RBL summaries at the diem and group levels
- B. An RBL (Rollup By Lookup) rule displays summary calculations of financial account information, such as account balances.
- C. Person Accounts need to be enabled in order to use the Rollup by Lookup functionality.
- D. Salesforce does not recommend or provide support for creation or customization of Financial Services Cloud RBL rules
- E. RBL rules do not require a lot of processing power.

정답：A,B,D

설명：
The following statements are true for Rollup By Lookup (RBL) in Financial Services Cloud:
An RBL (Rollup By Lookup) rule displays summary calculations of financial account information, such as account balances. You can use RBL rules to aggregate financial account data across different levels of client relationships.

The Rollup By Lookup (RBL) configuration updates the corresponding RBL summaries at the diem and group levels. You can use RBL configuration to define which fields are rolled up and howthey are calculated for each diem and group type.

Salesforce does not recommend or provide support for creation or customization of Financial Services Cloud RBL rules. RBL rules are complex and require extensive testing and validation. If you need to create or customize RBL rules, you should contact a certified Salesforce partner or consultant. Verified References: :

질문 # 49

A consultant is working with a new customer and has gained a firm understanding of their business processes and systems in preparation for implementing Salesforce Financial Services Cloud.

What should the consultant create as a deliverable for the current state business process?

- A. Word document telling the story of the process from the user's perspective
- B. An end-to-end visualjmap of the process using personas, systems, inputs, and outcomes
- C. An Excel spreadsheet with steps of the process as rows, and systems and personas in columns
- D. A Powerpoint deck wftJscreenshots of the current systems and callouts towhat is happening on each slide

정답: B

설명:

To document the current state business process for implementing Salesforce Financial Services Cloud, the consultant should create an end-to-end visual map of the process using personas, systems, inputs, and outcomes. A visual map is a tool that can help illustrate the flow of a business process from start to finish, showing the steps, decisions, and dependencies involved in each stage. A visual map can also include personas, systems, inputs, and outcomes to providemore context and detail for each step of the process. Personas are fictional characters that represent the different roles or users that participate in or interact with the process. Systems are the tools or applications that are used to perform or supportthe process. Inputs are the data or information that are required or provided for each step of the process. Outcomes are the results or outputs that are achieved or delivered by each step of the process. Verified References: : Salesforce Help Article 3 : Salesforce Help Article [4]

질문 # 50

Acorporate investment banking associate at Cumulus Capital works with a trusted analyst to create pitch books, analyze market data, and generate reports. The banking associate is looking to capture sensitive deal information in Salesforce. They wish to share the deal information with the trustedanalyst only, without giving access to Salesforce users up the management chain in the Role Hierarchy.

What should a consultant do in Salesforce to build the required sharing model for sensitive deal data?

- A. Use the Opportunity object to capture the deal data and use manual sharing to grant the analyst access.
- B. Use the Financial Deal object to captu
