## H13-527\_V5.0 Valid Examcollection, Test H13-527\_V5.0 Engine

To ensure your 100% satisfaction, H13-527\_V5.0 free demo are available for the certification exam you're going to take before you purchased. All our H13-527\_V5.0 dumps collection is quite effectively by millions of people that passed H13-527\_V5.0 Real Exam and become professionals in IT filed. You will never regret choosing our H13-527\_V5.0 test answers as your practice materials because we will show you the most authoritative study guide.

## Huawei HCIP-Cloud Computing V5.0 Sample Questions (Q37-Q42):

### NEW QUESTION # 37

Which of the following descriptions of the corresponding relationship between Port and Subnet in Neutron is correct?

- A. N:N

- B. N: 1
- C. 1:1
- **D. 1:N**

**Answer: D**

#### NEW QUESTION # 38

In Huawei Cloud Stack, the installation and upgrade tool stores deployment information when creating a new installation. When expanding/upgrading, it can obtain existing information from CIDB, and then store new data after completing expansion/upgrading, thus ensuring that CMDB obtains data in a timely manner.

- A. False
- **B. True**

**Answer: B**

#### NEW QUESTION # 39

In OpenStack, Nova-Scheduler filters and determines which physical host to allocate virtual machine instances to. The allocation process is mainly divided into two steps, filtering and ().

**Answer:**

Explanation:  
Weights

#### NEW QUESTION # 40

In Huawei Cloud Stack, which of the following descriptions of elastic cloud servers and traditional servers are correct? (Multiple choice)

- **A. Elastic cloud servers are easier to obtain than traditional servers**
- B. Traditional servers are more secure than elastic cloud servers
- **C. Elastic cloud servers are easier to expand than traditional servers**
- D. Traditional servers are more reliable than elastic cloud servers

**Answer: A,C**

#### NEW QUESTION # 41

Which of the following scenarios is not suitable for resource sets in HUAWEI CLOUD Stack?

- A. Dividing resources of different projects in a VDC
- B. Simplifying batch authorization of finance department resources
- **C. Managing the services or resources of branches across regions**
- D. Isolating R & D test resources from production services in the same VDC

**Answer: C**

Explanation:

The correct answer is B. Managing the services or resources of branches across regions . In HUAWEI CLOUD Stack, resource sets are primarily used as an internal organizational and authorization tool within a tenant or VDC . They are well suited for grouping resources by department , project , or environment , such as production versus test resources. This means options A , C , and D are all typical and appropriate use cases because they involve structuring and controlling resources inside the same logical management domain.

()

By contrast, managing services or resources of branches across regions is broader than the normal scope of a resource set. Cross-region branch management usually involves higher-level multi-region organizational constructs, regional administration, or broader tenant/VDC design rather than simply creating a resource set.

Resource sets help refine governance inside an established tenant structure; they are not the main mechanism for organizing geographically distributed branch operations across regions.

So after correcting the wording, the scenario that is not suitable for resource sets is B, because it describes a cross-region management requirement that typically belongs to a higher-level cloud planning and governance model rather than a resource-set grouping function. Therefore, the verified answer is B.

## NEW QUESTION # 42
