최신 SAP Certified Associate C_SIGVT_2506 무료 샘플문제 (Q11-Q16):

질문 # 11

Which approach combines the Greenfield and Brownfield strategies?

- A. Cloud-Native Apps
- B. Hybrid Cloud
- C. Selective Data Transition
- D. Side-by-Side Migration

정답: C

설명:

Selective Data Transition (SDT) is a specialized approach that blends elements of both Greenfield (new implementation) and Brownfield (system conversion) strategies. This hybrid methodology allows organizations to selectively migrate configuration settings, historical data, and business processes from their existing systems into a new SAP S/4HANA environment. Unlike a pure Greenfield approach, which requires starting completely fresh, SDT preserves valuable components of the legacy system. At the same time, it avoids the full conversion requirements of a Brownfield approach, offering greater flexibility for reengineering processes and adopting SAP best practices.

SDT is especially useful for companies with multiple ERP systems or those undergoing large-scale consolidation. It enables harmonization of processes, data cleansing activities, and the adoption of standardized templates while still leveraging existing investment where beneficial.

The other options do not combine the two approaches. Cloud-native apps refer to development style; side-by-side migration describes extension patterns; hybrid cloud refers to infrastructure strategy. Selective Data Transition is the only transformation methodology that formally merges the strengths of both Greenfield and Brownfield.

질문 # 12

Which SAP LeanIX product helps organizations understand their current application landscape?

- A. SAP LeanIX Architecture and Road Map Planning
- B. SAP LeanIX Landscape Management
- C. SAP LeanIX Application Portfolio Management
- D. SAP LeanIX Onboarding Tracker

정답: C

설명:

Application Portfolio Management (APM) is the LeanIX product specifically designed to help organizations analyze their current application landscape. It provides an inventory of applications, lifecycle information, ownership details, technology stacks, and relationships to business capabilities. APM allows companies to evaluate redundancy, risks, and optimization opportunities. Other LeanIX modules support planning or governance but do not focus primarily on understanding the existing application portfolio.

질문 # 13

Which SAP service offering provides enhanced business transformation support with proactive insights and service SLAs?

- A. SAP Influence
- **B. SAP Preferred Success**
- C. SAP Customer Engagement Initiative
- D. SAP Partner Connect

정답: B

설명:

SAP Preferred Success is an advanced support program designed to strengthen cloud transformation outcomes. It provides proactive guidance, insight-driven recommendations, continuous adoption monitoring, and defined service-level agreements. These services help ensure that customers achieve value realization and maintain stable solution operations. The other programs focus on partner networks, feedback channels, or collaborative influence-not transformation-focused support with SLAs.

질문 # 14

What is the primary purpose of the Application Landscape Report in SAP LeanIX?

- A. Visualize data flow between systems
- B. Understand application data quality
- **C. Understand integration dependencies and their current status**
- **D. Identify active applications affected by the transformation**

정답: C,D

설명:

The Application Landscape Report in SAP LeanIX provides a consolidated view of all applications within the IT environment. It highlights which applications are active, which are impacted by transformation plans, and how they align with business capabilities. Additionally, it displays integration dependencies, helping stakeholders understand the connections between applications and the interfaces that may be influenced by change. While other reports focus on data quality or specialized views, this report centers on active applications and key integration relationships.

질문 # 15

Which of the following are dimensions of the clean core concept? Note: There are 3 correct answers to this question.

- **A. Configurations**
- **B. Processes**
- **C. Integrations**
- D. Applications
- E. Operations

정답: A,B,C
