2026 Realistic Google Cloud-Digital-Leader Exam Fee Pass Guaranteed Quiz

And if you still feel uncertain about the content, wondering whether it is the exact Cloud-Digital-Leader exam material that you want, you can free download the demo to check it out. You will be quite surprised by the convenience to have an overview just by clicking into the link, and you can experience all kinds of Cloud-Digital-Leader versions. Though the content of the Cloud-Digital-Leader exam questions is the same, but the displays vary to make sure that you can study by your favorite way.

Google Cloud Digital Leader Sample Questions (Q395-Q400):

NEW QUESTION # 395

Your company has multiple internal applications used by your employees. You also have to give access to certain vendors and contractors. What is a good option for you to adopt?

- A. Use an external identity provider that is famous and popular like Facebook or Twitter; that way, even your vendors and contractors will have an account there.
- B. Allow all users, especially contractors and vendors, to bring their own identities, like those at gmail.com
- C. Use an IDaaS (Identity as a Service) product that can centrally manage authentication and authorization for the applications.
- D. Keep the credentials separate for each application to reduce the blast radius in case of any issues.

Answer: C

Explanation:

Explanation

IDaaS - identity providers managed by the company give better control over security and privacy.

Security/access can be set granularly, while also being centralized. You don't have to manage multiple credentials.

NEW QUESTION # 396

You are currently managing workloads running on Windows Server for which your company owns the licenses. Your workloads are only needed during working hours, which allows you to shut down the instances during the weekend. Your Windows Server licenses are up for renewal in a month, and you want to optimize your license cost.

What should you do?

- A. Migrate the workloads to Compute Engine with a bring-your-own-license (BYOL) model
- **B. Migrate the workloads to Compute Engine with a pay-as-you-go (PAYG) model**
- C. Renew your licenses for an additional period of 2 years. Negotiate a cost reduction by committing to an automatic renewal of the licenses at the end of the 2 year period
- D. Renew your licenses for an additional period of 3 years. Renew your licenses for an additional period of 3 years. Negotiate a cost reduction with your current hosting provider wherein infrastructure cost is reduced when workloads are not in use

Answer: B

Explanation:

Explanation

The PAYG model is more convenient because you only pay for usage. And the case describes that the workloads are only run on certain days.

NEW QUESTION # 397

The government has mandated that companies in a particular section of healthcare must retain all the data they collect for a period of 10 years in case an audit needs to be done. Your client, who is in that industry, needs to follow regulations. In addition, your client wants to do an analysis of the data quite frequently in the first year. They also don't want to be liable for any data beyond year 10. What would recommend for your customer?

- A. Use Cloud Storage with nearline storage in year one and Coldline storage therea-ter. Use Object lifecycle management to move between storage types and delete them after 10 years.
- B. Use Cloud Storage with standard storage in year one and Coldline storage there-after. Set a Cloud Tasks to trigger for 1 year to change storage types and 10 years to delete the data.
- C. Use Cloud Storage with standard storage in year one and Coldline storage there-after. Set a Cloud Scheduler trigger for 1 year to change storage types and 10 years to delete the data.
- **D. Use Cloud Storage with standard storage in year one and archival storage therea-ter. Use Object lifecycle management to move between storage types and delete them after 10 years.**

Answer: D

Explanation:

Cloud storage supports Object Lifecycle Management. To support common use cases like setting a Time to Live (TTL) for objects, retaining noncurrent versions of objects, or "downgrading" storage classes of objects to help manage costs, Cloud Storage offers the Object Lifecycle Management feature.

Standard storage is recommended for frequently accessed data and Archive for data accessed less than once a year.

Nearline, Coldline, and Archive offer ultra-low-cost, highly-durable, highly available archival storage. For data accessed less than once a year, Archive is a cost-effective storage option for the long-term preservation of data. Coldline is also ideal for cold storage-data your business expects to touch less than once a quarter.

For warmer storage, choose Nearline: data you expect to access less than once a month, but possibly multiple times throughout the year.

NEW QUESTION # 398

You are a program manager in a company and handling a project and you need to create a virtual machine on google cloud console that will be very simple to set up, by flipping a bit via command, API, or with developer console that gives you 30 seconds to shut down when you're preempted, allow you to save your work that also helps in the company budget upto 70-80% of less charges than the regular VMs.

- **A. Preemptible Virtual Machines.**
- B. Bare Metal Solutions

- C. None of the above.
- D. Google Cloud VM Instances

Answer: A

Explanation:

Explanation

Preemptible VMs have all these features

Simple configuration

Create a preemptible instance simply by flipping a bit via command, API, or developer console.

Easy extensibility

Attach GPUs and local SSDs to preemptible instances for additional performance and savings.

Graceful shutdown

Compute Engine gives you 30 seconds to shut down when you're preempted, letting you save your work in progress for later.

Large scale computing

Spin up as many instances as you need and turn them off when you're done. You only pay for what you use.

Quickly reclaim capacity

Managed instance groups automatically recreate your instances when they're preempted (if capacity is available).

Fixed pricing

Preemptible VMs have fixed pricing up to 80% off regular instances. They show up on your bill separately so you'll see just how much you're saving.

NEW QUESTION # 399

An organization is using Compute Engine and wants to receive sustained-use discounts. What should the organization do?

- A. Nothing. Sustained use discounts are automatically applied.
- B. Commit to virtual machine usage for a one or three-year period.
- C. Choose preemptible or spot instances when creating virtual machines.
- D. Choose low-powered virtual machines.

Answer: B

NEW QUESTION # 400

.....

All kinds of exams are changing with dynamic society because the requirements are changing all the time.
