Data-Cloud-Consultant Study Prep Materials Has Gained Wide Popularity among Different Age Groups - TestBraindump

As we all know that if we get a certificate for the exam, we will have more advantages in the job market. We have Data-Cloud-Consultant study guide for you to get the certificate quickly. Besides, we are pass guarantee, if you indeed fail the exam, we will be money back guarantee. Data-Cloud-Consultant Study Guide of us obtain many good feedbacks from our customers. Free demo of Data-Cloud-Consultant exam dumps are provided by us, you can have a try before you buy them, so that you can know the mode of the Data-Cloud-Consultant learning materials.

Salesforce Certified Data 360 Consultant (Data-Con-101) Sample Questions (Q85-Q90):

NEW QUESTION # 85

A consultant is integrating an Amazon S3 activated campaign with the customer's destination system.

In order for the destination system to find the metadata about the segment, which file on the S3 will contain this information for processing?

- A. The .zip file
- B. The .txt file
- **C. The json file**
- D. The .csv file

Answer: C

Explanation:

The file on the Amazon S3 that will contain the metadata about the segment for processing is B. The json file. The json file is a metadata file that is generated along with the csv file when a segment is activated to Amazon S3. The json file contains information such as the segment name, the segment ID, the segment size, the segment attributes, the segment filters, and the segment schedule. The destination system can use this file to identify the segment and its properties, and to match the segment data with the corresponding fields in the destination system. Reference: Salesforce Data Cloud Consultant Exam Guide, Amazon S3 Activation

NEW QUESTION # 86

A company stores customer data in Marketing Cloud and uses the Marketing Cloud Connector to ingest data into Data Cloud. Where does a request for data deletion or right to be forgotten get submitted?

- A. On the individual data profile in Data Cloud
- **B. through Consent API**
- C. In Data Cloud settings
- D. In Marketing Cloud settings

Answer: B

NEW QUESTION # 87

Northern Trail Outfitters (NTO) is getting ready to start ingesting its CRM data into Data Cloud.

While setting up the connector, which type of refresh should NTO expect when the data stream is deployed for the first time?

- A. Partial refresh
- B. Incremental
- **C. Full refresh**
- D. Manual refresh

Answer: C

Explanation:

* Data Stream Deployment: When setting up a data stream in Salesforce Data Cloud, the initial deployment requires a comprehensive data load.

* Types of Refreshes:

Incremental Refresh: Only updates with new or changed data since the last refresh.

Manual Refresh: Requires a user to manually initiate the data load.

Partial Refresh: Only a subset of the data is refreshed.

Full Refresh: Loads the entire dataset into the system.

* First-Time Deployment: For the initial deployment of a data stream, a full refresh is necessary to ensure all data from the source system is ingested into Salesforce Data Cloud.

* Reference:

Salesforce Documentation: Data Stream Setup

Salesforce Data Cloud Guide

NEW QUESTION # 88

A consultant is setting up a data stream with transactional data, Which field type should the consultant choose to ensure that leading zeros in the purchase order number are preserved?

- A. Serial
- B. Number
- **C. Text**

- D. Decimal

Answer: C

Explanation:

The field type Text should be chosen to ensure that leading zeros in the purchase order number are preserved. This is because text fields store alphanumeric characters as strings, and do not remove any leading or trailing characters. On the other hand, number, decimal, and serial fields store numeric values as numbers, and automatically remove any leading zeros when displaying or exporting the data. Therefore, text fields are more suitable for storing data that needs to retain its original format, such as purchase order numbers, zip codes, phone numbers, etc. Reference:

Zeros at the start of a field appear to be omitted in Data Exports

Keep First '0' When Importing a CSV File

Import and export address fields that begin with a zero or contain a plus symbol

NEW QUESTION # 89

A customer has two Data 360 orgs. A new configuration has been completed and tested for an Amazon S3 data stream and its mappings in one of the Data 360 orgs. What is recommended to package and promote this configuration to the customer 's second org?

- **A. Create a data kit.**
- B. Package as an AppExchange application.
- C. Use the Metadata API.
- D. Use the Salesforce CRM Connector.

Answer: A

Explanation:

The design point is to preserve source fidelity while shaping data only where Data 360 processing needs it.

Here, Create a data kit. fits because it changes the shape, keying, or refresh behavior at the Data 360 layer instead of forcing the source system to carry an analytics-specific design. In production, this keeps the upstream application simpler and gives the data team a repeatable way to prepare records for mapping, identity resolution, insights, or segmentation. The distractors fall short because they either move the problem into the wrong system, add needless duplication, ignore Data 360 object relationships, or rely on a feature built for a different lifecycle stage. In a real implementation, those choices usually create brittle pipelines, stale data, security exposure, or segments that look correct on paper but fail when activated. Thinking like an architect, the selected option places the logic where Data 360 can govern it and reuse it reliably.

NEW QUESTION # 90

.....

Our windows software and online test engine of the Data-Cloud-Consultant exam questions are suitable for all age groups. At the same time, our operation system is durable and powerful. So you totally can control the Data-Cloud-Consultant study materials flexibly. It is enough to wipe out your doubts now. If you still have suspicions, please directly write your questions and contact our online workers. And we will give you the most professions suggestions on our Data-Cloud-Consultant learning guide.
