Then they compile new questions and answers of the study materials according to the new knowledge parts. At last, they reorganize the PL-300 learning questions and issue the new version of the study materials. Once the newest test syllabus of the PL-300 Exam appear on the official website, our staff will quickly analyze them and send you the updated version. So our PL-300 guide materials deserve your investment.

Microsoft PL-300 Exam is a valuable certification for professionals who want to demonstrate their expertise in using Microsoft Power BI for data analysis. Passing the exam validates a candidate's skills and knowledge in using Power BI to create effective data models, reports, and visualizations, and to perform advanced data analysis using DAX and Power Query.

Microsoft Power BI Data Analyst Sample Questions (Q440-Q445):

NEW QUESTION # 440

You are creating a query to be used as a Country dimension in a star schema.
A snapshot of the source data is shown in the following table.

Country	City
USA	Seattle
USA	New York
USA	Denver
UK	Manchester
UK	London
Japan	Tokyo
Brazil	Rio
Brazil	Sao Paulo

You need to create the dimension. The dimension must contain a list of unique countries. Which two actions should you perform? Each correct answer presents part of the solution.

- A. Delete the Country column.
- B. Remove duplicates from the City column.
- C. Remove duplicates from the table.
- **D. Delete the City column.**
- **E. Remove duplicates from the Country column.**

Answer: D,E

Explanation:

Explanation

To create a dimension table for Country from your source data, you need to perform these two actions³⁴:

- * Delete the City column. You don't need this column for your Country dimension, as it is not a descriptive attribute of Country. You can create another dimension table for City if you want to use it in your analysis.
- * Remove duplicates from the Country column. You want to have a list of unique countries in your dimension table, so you need to remove any duplicate values from this column.

NEW QUESTION # 441

Your company plans to completely separate development and production assets such as datasets, reports, and dashboards in Microsoft Power BI.

You need to recommend an application lifecycle strategy. The solution must minimize access to production assets and prevent end users from viewing the development assets.

What should you recommend?

- A. Create production reports in a separate workspace that uses a shared dataset from the development workspace. Grant the end users access to the production workspace.
- B. In one workspace, create separate copies of the assets and append DEV to the names of the copied assets. Grant the end users access to the workspace.
- **C. Create a workspace for development and a workspace for production. From the production workspace, publish an app.**
- D. Create one workspace for development. From the new workspace, publish an app for production.

Answer: C

Explanation:

Explanation

Use different work stages (Development, Test, and Production).

Deploy from the Development workspace.

NEW QUESTION # 442

You have a query named All Sales that imports sales data into a Power BI model.

You plan to create a star schema by separating columns into separate queries and performing further transformations. The solution must meet the following requirements:

* Use All Sales as the source for three other queries named Sales Fact Product Dimension, and Customer Dimension.

* Minimize maintenance effort.

What should you do to create the Sales Fact query, and for which query should you clear Enable load? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

To create Sales Fact:

- Duplicate the All Sales query.
- Duplicate the Customer Dimension query.
- Reference the All Sales query.**
- Reference the Customer Dimension query.

Clear Enable data load for:

- All Sales**
- Customer Dimension
- Product Dimension
- Sales Fact

Answer:

Explanation:

Answer Area

To create Sales Fact:

- Duplicate the All Sales query.
- Duplicate the Customer Dimension query.
- Reference the All Sales query.**
- Reference the Customer Dimension query.

Clear Enable data load for:

- All Sales**
- Customer Dimension
- Product Dimension
- Sales Fact

NEW QUESTION # 443

You have a Microsoft Power BI workspace.

You need to grant the user capabilities shown in the following table.

User name	Microsoft Task
User1	Create and publish apps.
User2	Publish reports to the workspace and delete dashboards.

The solution must use the principle of least privilege.

Which user role should you assign to each user? To answer, drag the appropriate roles to the correct users.

Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Roles

Admin Contributor Member Viewer

Answer Area

User1:

User2:

Answer:

Explanation:

Roles

Admin Contributor Member Viewer

Answer Area

User1:

User2:

Explanation:

User 1 = Member
