To ensure the best quality of each format, we have tapped the services of experts. They thoroughly analyze Endpoint Administrator MD-102 Exam's content, Microsoft MD-102 past tests, and add the MD-102 real exam questions in our three formats.

Microsoft Endpoint Administrator Sample Questions (Q285-Q290):

NEW QUESTION # 285

You have a Microsoft 365 subscription that contains two users named User1 and User2. You need to ensure that the users can perform the following tasks:

- * User1 must be able to create groups and manage users.
- * User2 must be able to reset passwords for non-administrative users.

The solution must use the principle of least privilege.

Which role should you assign to each user? To answer, drag the appropriate roles to the correct users. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□

Explanation:

□

Microsoft 365 or Office 365 subscription comes with a set of admin roles that you can assign to users in your organization using the Microsoft 365 admin center. Each admin role maps to common business functions and gives people in your organization permissions to do specific tasks in the admin centers1.

To ensure that User1 can create groups and manage users, you should assign the User Administrator role to User1. This role allows User1 to create and manage all aspects of users and groups, including resetting passwords for non-administrative users1.

To ensure that User2 can reset passwords for non-administrative users, you should assign the Helpdesk Administrator role to User2. This role allows User2 to reset passwords, manage service requests, and monitor service health for non-administrative users1.

NEW QUESTION # 286

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

You have 20 computers that run Windows 10 and are joined to Microsoft Azure Active Directory (Azure AD).

You plan to replace the computers with new computers that run Windows 10. The new computers will be joined to Azure AD.

You need to ensure that the desktop background, the favorites, and the browsing history are available on the new computers.

Solution: You configure roaming user profiles.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

Instead: Enterprise State Roaming provides users with a unified experience across their Windows devices and reduces the time needed for configuring a new device.

<https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-enable>

NEW QUESTION # 287

You implement the planned changes for Connection1 and Connection2

How many VPN connections will there be for User1 when the user signs in to Device 1 and Device2? To answer select the appropriate options in the answer area.

NOTE; Each correct selection is worth one point.

☐

Answer:

Explanation:

☐ Explanation:

☐

NEW QUESTION # 288

Your company uses Microsoft Intune to manage devices.

You need to ensure that only Android devices that use Android work profiles can enroll in Intune.

Which two configurations should you perform in the device enrollment restrictions? Each correct answer presents part of the solution.

NOTE Each correct selection is worth one point.

- A. From Platform Settings, set Android Enterprise (work profile) to Allow.
- B. From Platform Settings, set Android device administrator Personally Owned to Allow
- C. From Platform Settings, set Android device administrator Personally Owned to Block.
- D. From Platform Settings, set Android device administrator to Block.

Answer: A,C

Explanation:

Explanation

To ensure that only Android devices that use Android work profiles can enroll in Intune, you need to perform two configurations in the device enrollment restrictions. First, you need to set Android device administrator Personally Owned to Block. This prevents users from enrolling personal Android devices that use device administrator mode. Second, you need to set Android Enterprise (work profile) to Allow. This allows users to enroll corporate-owned or personal Android devices that use work profiles.

<https://docs.microsoft.com/en-us/mem/intune/enrollment/enrollment-restrictions-set>

NEW QUESTION # 289

You have a Microsoft 365 subscription that uses Microsoft Intune.

You need to ensure that you can deploy apps to Android Enterprise devices.

What should you do first?

- A. Configure the Partner device management settings.
- B. Add a certificate connector.
- C. Create a configuration profile.
- D. Link your managed Google Play account to Intune.

Answer: D

Explanation:

Connect your Intune account to your Managed Google Play account.

Managed Google Play is Google's enterprise app store and sole source of applications for Android Enterprise in Intune. You can use Intune to orchestrate app deployment through Managed Google Play for any Android Enterprise scenario (including personally-owned work profile, dedicated, fully managed, and corporate-owned work profile enrollments).
