As far as we are concerned, the key to quick upward mobility lies in adapting your excellent personality to the style of the organization you are working in. Our PSE-Cortex exam materials embrace much knowledge and provide relevant PSE-Cortex Exam bank available for your reference, which matches your learning habits and produces a rich harvest of the PSE-Cortex exam knowledge. As long as you buy our PSE-Cortex study guide, you will be benefited from it!

Earning the PSE-Cortex certification demonstrates that an individual has a deep understanding of Palo Alto Networks' Cortex technologies and is capable of effectively implementing them in complex security environments. Palo Alto Networks System Engineer - Cortex Professional certification is an excellent way for security professionals to showcase their expertise and differentiate themselves in a highly competitive industry.

The PSE-Cortex exam covers various topics related to the Cortex platform, including Cortex XDR, Cortex Data Lake, Cortex Threat Intelligence, and Cortex Hub. Candidates who pass the PSE-Cortex Exam demonstrate their proficiency in implementing and managing the Cortex platform to protect their organization's network from advanced cyber threats. Palo Alto Networks System Engineer - Cortex Professional certification validates that a professional has the skills and knowledge required to use the Cortex platform effectively and efficiently.

Customized PSE-Cortex Lab Simulation & PSE-Cortex Reliable Test Pattern

In order to meet the needs of all customers that pass their exam and get related certification, the experts of our company have designed the updating system for all customers. Our PSE-Cortex exam question will be constantly updated every day. The IT experts of our company will be responsible for checking whether our PSE-Cortex Exam Prep is updated or not. Once our PSE-Cortex test questions are updated, our system will send the message to our customers immediately. If you use our PSE-Cortex exam prep, you will have the opportunity to enjoy our updating system and pass the PSE-Cortex exam.

The PSE-Cortex certification exam covers a wide range of topics, including Cortex Data Lake, Cortex XDR, Cortex XSOAR, and Cortex Certifications. Candidates are required to have a deep understanding of the Cortex platform, including its architecture, features, and capabilities. They must also be able to apply this knowledge to real-world scenarios and demonstrate their ability to design and deploy Cortex solutions that meet customer requirements. By earning the PSE-Cortex Certification, system engineers can demonstrate their expertise in the Cortex platform and differentiate themselves in the job market.

Palo Alto Networks System Engineer - Cortex Professional Sample Questions (Q29-Q34):

NEW QUESTION # 29

Which Cortex XSIAM feature can be used to onboard data sources?

- A. Playbook
- **B. Data Ingestion Dashboard**
- C. Asset Inventory
- D. Marketplace Integration

Answer: B

Explanation:

The Data Ingestion Dashboard in Cortex XSIAM is used to onboard data sources. It provides a centralized view for configuring and monitoring the ingestion of various data sources into the platform, making it easier to integrate and manage security data from different systems.

NEW QUESTION # 30

Which two log types should be configured for firewall forwarding to the Cortex Data Lake for use by Cortex XDR?(Choose two)

- **A. Analytics**
- **B. Security Event**
- C. Correlation
- D. HIP

Answer: A,B

NEW QUESTION # 31

What allows the use of predetermined Palo Alto Networks roles to assign access rights to Cortex XDR users?

- A. cloud identity engine
- **B. role-based access control**
- C. endpoint groups
- D. restrictions security profile

Answer: B

Explanation:

NEW QUESTION # 32

Which service helps identify attackers by combining world-class threat intelligence with Cortex XSIAM technology?

- A. Threat Intelligence Platform
- B. Virtual Desktop Infrastructure
- **C. Managed Threat Hunting**
- D. Cloud Identity Engine

Answer: C

Explanation:

Managed Threat Hunting combines world-class threat intelligence with Cortex XSIAM (Extended Security Intelligence and Automation Management) technology to help identify attackers. This service provides proactive threat hunting capabilities, allowing security teams to detect advanced threats and respond to potential attacks with the help of expert analysts and automated tools.

NEW QUESTION # 33

A customer has purchased Cortex XSOAR and has a need to rapidly stand up the product in their environment. The customer has stated that their internal staff are currently occupied with other projects.

Which Palo Alto Networks service offering should be recommended to the customer?

- **A. Onboarding**
