Microsoft AZ-900 Certification Exam is ideal for candidates who are interested in pursuing a career in cloud computing, particularly in Microsoft Azure. AZ-900 exam validates the candidate's understanding of the fundamental concepts of cloud computing and Azure services. Microsoft Azure Fundamentals certification is essential for individuals who work in IT, such as system administrators, network administrators, and developers, who are looking to expand their skills and knowledge in Azure cloud services.

Microsoft Azure Fundamentals Sample Questions (Q485-Q490):

NEW QUESTION # 485

You plan to map a network drive from several computers that run Windows 10 to Azure Storage. You need to create a storage solution in Azure for the planned mapped drive. What should you create?

- A. a Files service in a storage account
- B. a virtual machine data disk
- C. a Blobs service in a storage account
- D. an Azure SQL database

Answer: A

NEW QUESTION # 486

Match the term to the correct definition.

Instructions: To answer, drag the appropriate term from the column on the left to its description on the right.

Each term may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Azure Government		An organization that defines international standards across all industries.
GDPR		An organization that defines standards used by the United States government.
ISO		A European policy that regulates data privacy and data protection.
NIST		A dedicated public cloud for federal and state agencies in the United States.

Answer:

Explanation:

Azure Government	ISO	An organization that defines international standards across all industries.
GDPR	NIST	An organization that defines standards used by the United States government.
ISO	GDPR	A European policy that regulates data privacy and data protection.
NIST	Azure Government	A dedicated public cloud for federal and state agencies in the United States.

Explanation

ISO	An organization that defines international standards across all industries.
NIST	An organization that defines standards used by the United States government.
GDPR	A European policy that regulates data privacy and data protection.
Azure Government	A dedicated public cloud for federal and state agencies in the United States.

Section: Understand Security, Privacy, Compliance and Trust

NEW QUESTION # 487

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Azure Security Center can monitor Azure resources and on-premises resources.	<input type="radio"/>	<input type="radio"/>
All Azure Security Center features are free.	<input type="radio"/>	<input type="radio"/>
From Azure Security Center, you can download a Regulatory Compliance report.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
Azure Security Center can monitor Azure resources and on-premises resources.	<input checked="" type="radio"/>	<input type="radio"/>
All Azure Security Center features are free.	<input type="radio"/>	<input checked="" type="radio"/>
From Azure Security Center, you can download a Regulatory Compliance report.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation

Statements

Microsoft

Yes

No

Azure Security Center can monitor Azure resources and on-premises resources.

All Azure Security Center features are free.

From Azure Security Center, you can download a Regulatory Compliance report.

Box 1: Yes

Azure Security Center is a unified infrastructure security management system that strengthens the security posture of your data centers, and provides advanced threat protection across your hybrid workloads in the cloud - whether they're in Azure or not - as well as on premises.

Box 2: No

Only two features: Continuous assessment and security recommendations, and Azure secure score, are free.

Box 3: Yes

The advanced monitoring capabilities in Security Center also let you track and manage compliance and governance over time. The overall compliance provides you with a measure of how much your subscriptions are compliant with policies associated with your workload.
