

# Free PDF 2026 Databricks Newest Databricks-Machine-Learning-Professional: Practice Databricks Certified Machine Learning Professional Mock

DOWNLOAD the newest ValidDumps Databricks-Machine-Learning-Professional PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1XShCDMIgjNBzW4IWZteUjclZYWqeUr1t>

The ValidDumps is committed to offering updated and verified Databricks-Machine-Learning-Professional exam practice questions all the time. To achieve this objective the ValidDumps has hired a team of experienced and qualified Databricks-Machine-Learning-Professional Exam experts. They work together and put all their expertise to update and verify Databricks Databricks-Machine-Learning-Professional exam questions.

## Databricks Databricks-Machine-Learning-Professional Exam Syllabus Topics:

| Topic   | Details   |
|---------|---|
| Topic 1 | <ul style="list-style-type: none"> <li>Describe concept drift and its impact on model efficacy</li> <li>Describe summary statistic monitoring as a simple solution for numeric feature drift</li> </ul>                   |
| Topic 2 | <ul style="list-style-type: none"> <li>Identify a use case for HTTP webhooks and where the Webhook URL needs to come</li> <li>Identify advantages of using Job clusters over all-purpose clusters</li> </ul>              |
| Topic 3 | <ul style="list-style-type: none"> <li>Identify less performant data storage as a solution for other use cases</li> <li>Describe why complex business logic must be handled in streaming deployments</li> </ul>           |
| Topic 4 | <ul style="list-style-type: none"> <li>Test whether the updated model performs better on the more recent data</li> <li>Identify when retraining and deploying an updated model is a probable solution to drift</li> </ul> |
| Topic 5 | <ul style="list-style-type: none"> <li>Describe model serving deploys and endpoint for every stage</li> <li>Identify scenarios in which feature drift and or label drift are likely to occur</li> </ul>                   |
| Topic 6 | <ul style="list-style-type: none"> <li>Identify which code block will trigger a shown webhook</li> <li>Describe the basic purpose and user interactions with Model Registry</li> </ul>                                    |

## Databricks-Machine-Learning-Professional Study Tool, Reliable Databricks-Machine-Learning-Professional Test Simulator

ValidDumps is website that can take you access to the road of success. ValidDumps can provide the quickly passing Databricks certification Databricks-Machine-Learning-Professional exam training materials for you, which enable you to grasp the knowledge of the certification exam within a short period of time, and pass Databricks Certification Databricks-Machine-Learning-Professional Exam for only one-time.

## Databricks Certified Machine Learning Professional Sample Questions (Q188-Q193):

### NEW QUESTION # 188

Which of the following lists all of the model stages are available in the MLflow Model Registry?

- A. None. Staging. Production. Archived
- B. Staging. Production. Archived
- C. Development. Staging. Production
- D. None. Staging. Production
- E. Development. Staging. Production. Archived

**Answer: A**

### NEW QUESTION # 189

How can you save a trained Spark ML PipelineModel?

- A. pipeline.save()
- B. pipeline.persist()
- C. pipelineModel.write().save()
- D. pipeline.store()

**Answer: C**

Explanation:

Example:

```
pipelineModel.write().overwrite().save("/model")
```

### NEW QUESTION # 190

Label drift occurs where there is a change in which element?

- A. The relationship between input variables and target variables
- B. The distribution of the predicted target given by the model
- C. The distribution of a target variable
- D. The distribution of an input variable

**Answer: C**

Explanation:

Label drift refers to a change in the distribution of the target variable over time. This means the frequencies or proportions of classes or target values shift, which can impact model performance even if the input feature distributions remain unchanged.

### NEW QUESTION # 191

After a data scientist noticed that a column was missing from a production feature set stored as a Delta table, the machine learning engineering team has been tasked with determining when the column was dropped from the feature set. Which SQL command can be used to accomplish this task?

- A. DESCRIBE HISTORY
- B. HISTORY
- C. DESCRIBE
- D. VERSION

- E. TIMESTAMP

**Answer: A**

### NEW QUESTION # 192

A data scientist wants to remove the star\_rating column from the Delta table at the location path. To do this, they need to load in data and drop the star\_rating column.

Which of the following code blocks accomplishes this task?

- A. `spark.read.format("delta").table(path).drop("star_rating")`
- B. `spark.read.format("delta").load(path).drop("star_rating")`
- C. Delta tables cannot be modified
- D. `spark.sql("SELECT * EXCEPT star_rating FROM path")`
- E. `spark.read.table(path).drop("star_rating")`

**Answer: E**

### NEW QUESTION # 193

.....

Due to busy routines, applicants of the Databricks Certified Machine Learning Professional (Databricks-Machine-Learning-Professional) exam need real Databricks Certified Machine Learning Professional (Databricks-Machine-Learning-Professional) exam questions. When they don't study with updated Databricks Databricks-Machine-Learning-Professional practice test questions, they fail and lose money. If you want to save your resources, choose updated and actual Databricks Certified Machine Learning Professional (Databricks-Machine-Learning-Professional) exam questions of ValidDumps.
