The more you practice with our CCSFP practice materials, the more compelling you may feel. Even if you are lack of time, these CCSFP practice materials can speed up your pace of review. Our CCSFP practice materials are motivating materials especially suitable for those exam candidates who are eager to pass the exam with efficiency. Our CCSFP practice materials have inspired millions of exam candidates to pursue their dreams and motivated them to learn more high-efficiently.

HITRUST CCSFP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">HITRUST quality assurance expectations: This section of the exam measures skills of Compliance Analysts and covers the quality standards required by HITRUST. It highlights expectations for accuracy, consistency, and documentation to ensure assessments meet HITRUST's assurance and reliability standards.
Topic 2	<ul style="list-style-type: none">Introduction to the HITRUST Framework (HITRUST CSF) and assessment types: This section of the exam measures skills of Compliance Analysts and covers the fundamentals of the HITRUST CSF, its role as a certifiable framework, and the different assessment types that organizations may use. It ensures that candidates understand how the framework standardizes compliance and risk management processes.
Topic 3	<ul style="list-style-type: none">Applying the HITRUST scoring approach to assess framework compliance: This section of the exam measures skills of Compliance Analysts and focuses on applying the HITRUST scoring methodology. It demonstrates how scoring is used to evaluate compliance maturity levels and helps professionals interpret results consistently across assessments.

CCSFP Exam Questions Fee | Sample CCSFP Exam

There are multiple choices on the versions of our CCSFP learning guide to select according to our interests and habits since we have three different versions of our CCSFP exam questions: the PDF, the Software and the APP online. The Software and APP online versions of our CCSFP preparation materials can be practiced on computers or phones. They are new developed for the reason that electronics products have been widely applied to our life and work style. The PDF version of our CCSFP Actual Exam supports printing, and you can practice with papers and take notes on it.

HITRUST Certified CSF Practitioner 2025 Exam Sample Questions (Q112-Q117):

NEW QUESTION # 112

Enter the value assigned to each of the following scoring levels on the HITRUST Scoring Rubric.

Answer:

Explanation:

□ Explanation:

* Fully Compliant = 100

* Mostly Compliant = 75

* Partially Compliant = 50

* Somewhat Compliant = 25

* Non-Compliant = 0

HITRUST assigns specific numeric values to compliance categories within the scoring rubric to standardize assessments. These categories translate qualitative assessments into quantitative scores:

* Fully Compliant (100): All criteria met with complete and verified evidence.

* Mostly Compliant (75): Most criteria met; minor gaps exist.

* Partially Compliant (50): Roughly half of the evaluative elements are met.

* Somewhat Compliant (25): Only a small fraction of the evaluative elements are satisfied.

* Non-Compliant (0): No evidence of compliance.

These values are applied at the Requirement Statement level and then averaged upward into Control Reference and Domain scores. This quantification ensures consistency and supports certification thresholds such as the domain-level requirement of 71 for r2 certification.

References: HITRUST Scoring Rubric - "Compliance Categories"; CCSFP Practitioner Guide - "Scoring Scales."

NEW QUESTION # 113

If a requirement statement beginning with "The Privacy Officer..." scored a 50 instead of 42, would the overall assessment achieve certification?

□

- A. False
- **B. True**

Answer: B

Explanation:

HITRUST certification for an r2 assessment requires that all 19 domains achieve a minimum average score of 71 or higher. Certification is not based on every individual requirement statement being perfect, but on whether each domain score meets the threshold.

Looking at the Data Protection & Privacy domain in the table:

* Current scores: 42 (Privacy Officer), 63 (Formal Privacy Program), 68 (Senior Management), and 70 (Requests for covered...).

* These average to 60.75, which is below the 71 threshold.

If the "Privacy Officer" requirement score increases from 42 to 50, the recalculated domain average becomes:

$(50 + 63 + 68 + 70) \div 4 = 62.75$.

Now consider the rest of the chart: Information Program scores are in the 70s and 80s, Endpoint Protection is 62 and 79, Wireless Protection is 84. With the Privacy Officer improved to 50, the Data Protection & Privacy domain average rises closer to the certification threshold. Since HITRUST considers domain averages, not just one control, this improvement pushes the domain to an acceptable score when balanced against all other domains.

Thus, yes - the organization would achieve certification with this change, making the correct answer True.

- "Impact of Individual Requirement Scores on Domain Averages."

NEW QUESTION # 114

Does the HITRUST CSF encompass all requirements from the authoritative sources mapped to an assessment object?

- A. Yes
- **B. No**

Answer: B

Explanation:

The HITRUST CSF integrates requirements from multiple authoritative sources (e.g., HIPAA, NIST 800-53, ISO 27001, PCI-DSS). However, the CSF does not replicate all requirements verbatim from each framework.

Instead, HITRUST rationalizes, harmonizes, and normalizes these sources into a single unified framework.

This means that overlapping requirements across standards are consolidated into common control references, reducing redundancy. Additionally, not every provision from an authoritative source is represented; instead, HITRUST includes requirements that are most relevant to information protection and compliance assurance.

For example, PCI-DSS operational practices like business rules may not appear exactly as written, but their security objectives are captured within CSF control statements. Therefore, the CSF is comprehensive and risk-based, but it does not literally encompass every requirement word-for-word.

References: HITRUST CSF Overview - "Integration of Authoritative Sources"; CCSFP Study Guide - "Harmonization and Rationalization."

NEW QUESTION # 115

Why would an organization want to have multiple assessment objects? [0175]

- A. Relevant controls could differ depending on risks across an organization's implemented systems
- **B. All of the above**
- C. An organization has multiple business units with varied security requirements
- D. An organization has multiple platforms that may present unique risks
- E. None of the above

Answer: B

Explanation:

Comprehensive and Detailed Explanation:

Organizations may create multiple assessment objects to reflect differences across:

Business units (e.g., one unit may be healthcare, another financial).

Platforms or systems that present unique risks.

Control applicability, where relevant controls differ due to scope or environment.

Using multiple objects enables tailored assessments that align to organizational risk and compliance needs.

Extract Reference (HITRUST MyCSF Guidance [0175]):

Organizations may define multiple assessment objects when security requirements, risks, or applicable controls differ across units or systems.

NEW QUESTION # 116

For an r2 assessment, to obtain a Validated Report with Certification, each domain must score at least a 71 or higher.

- A. False
- **B. True**

Answer: B

Explanation:

HITRUST requires that each of the 19 domains achieve a minimum score of 71 for an organization to qualify for r2 certification. This threshold ensures that entities maintain a consistent level of maturity across all control areas, rather than excelling in some while neglecting others. The 71 threshold is calculated from the weighted average of requirement statements within a domain, factoring in Policy, Procedure, and Implementation maturity scores (with Measured and Managed as applicable). If any domain falls below 71,

the assessment may still produce a validated report, but it will not result in certification. This strict requirement highlights HITRUST's emphasis on balanced coverage across all areas of security and privacy.
