The CISM exam is designed for professionals who have experience in information security management and are looking to advance their careers in this field. CISM exam covers four domains: Information Security Governance, Risk Management, Information Security Program Development and Management, and Information Security Incident Management. Each domain focuses on a particular aspect of information security management, and the exam requires candidates to demonstrate their knowledge and

understanding of each domain.

The CISM exam consists of 150 multiple-choice questions that cover four key domains: Information Security Governance, Risk Management, Information Security Program Development and Management, and Information Security Incident Management. Candidates are required to have a minimum of five years of experience in information security, with at least three years of experience in the role of information security manager. In addition to passing the exam, candidates must adhere to the ISACA Code of Professional Ethics and maintain continuing education requirements to maintain their certification. The CISM Certification is an excellent option for individuals seeking to advance their careers in the field of information security management.

- C. remove the need to involve senior managers in the response process.
- D. provide the team with practical experience in responding to incidents.

Answer: A

NEW QUESTION # 541

Which of the following has the GREATEST impact on efforts to improve an organization's security posture?

- A. Regular reporting to senior management
- B. Well-documented security policies and procedures
- C. Automation of security controls
- **D. Supportive tone at the top regarding security**

Answer: D

NEW QUESTION # 542

What will have the HIGHEST impact on standard information security governance models?

- **A. Complexity of organizational structure**
- B. Organizational budget
- C. Distance between physical locations
- D. Number of employees

Answer: A

Explanation:

Explanation

Information security governance models are highly dependent on the overall organizational structure. Some of the elements that impact organizational structure are multiple missions and functions across the organization, leadership and lines of communication. Number of employees and distance between physical locations have less impact on information security governance models since
