You can use our CV0-004 Exam Prep

immediately after you purchase them, we will send our product within 5-10 minutes to you.

CompTIA Cloud+ (2025) Sample Questions (Q256-Q261):

NEW QUESTION # 256

Following a ransomware attack, the legal department at a company instructs the IT administrator to store the data from the affected virtual machines for a minimum of one year.

Which of the following is this an example of?

- A. Integrity
- B. Encryption
- **C. Retention**
- D. Recoverability

Answer: C

Explanation:

The instruction by the legal department to store data from the affected virtual machines for a minimum of one year is an example of data Retention. Retention policies are often driven by regulatory compliance requirements and dictate how long certain types of data must be kept before they can be securely disposed of.

NEW QUESTION # 257

A company is developing a new web application that requires a relational database management system with minimal operational overhead. Which of the following should the company choose?

- A. A database migration service
- B. A database installed on a virtual machine
- C. A hybrid database setup
- **D. A managed SQL database on the cloud**

Answer: D

Explanation:

For a new web application that requires a relational database management system with minimal operational overhead, the company should choose a managed SQL database on the cloud. Managed databases provide automated backups, patching, and other management tasks, reducing the administrative burden.

The use of managed services, like managed databases, to minimize operational overhead is a strategic decision in cloud computing covered in CompTIA Cloud+.

NEW QUESTION # 258

An administrator needs to provide a backup solution for a cloud infrastructure that enables the resources to run from another data center in case of a outage. Connectivity to the backup data center is via a third-party, untrusted network. Which of the following is the most important feature required for this solution?

- A. Deduplication
- B. Compression
- C. Replication
- D. Labeling
- **E. Encryption**

Answer: E

Explanation:

When backing up data that will traverse a third-party, untrusted network, encryption is the most important feature to ensure the confidentiality and integrity of the data. Encryption will protect the data from potential interception or tampering during transit to the backup data center. References: CompTIA Cloud+ Guide to Cloud Computing (ISBN: 978-1-64274-282-2)

NEW QUESTION # 259

Which of the following AI/ML technologies consumes text input to discern tone?

- A. Computer vision
- **B. Sentiment analysis**
- C. Text recognition
- D. Visual recognition

Answer: B

Explanation:

Sentiment analysis is an AI/ML technology that processes text to determine the tone. It helps in understanding the sentiments behind the words by analyzing the text input, which can be positive, negative, or neutral. Reference: CompTIA Cloud+ Study Guide (Exam CV0-004) - Chapter on Cloud Technologies and Applications

NEW QUESTION # 260

A cloud solution needs to be replaced without interruptions. The replacement process can be completed in phases, but the cost should be kept as low as possible. Which of the following is the best strategy to implement?

- A. Blue-green
- B. Canary
- C. In-place
- **D. Rolling**

Answer: D

Explanation:

A rolling strategy is the best to implement when needing to replace a cloud solution without interruptions and keeping costs low. This approach updates or replaces parts of the system gradually with minimal downtime and allows for a phased implementation. Reference: CompTIA Cloud+ Study Guide (Exam CV0-004) - Chapter on Cloud Deployment and Provisioning

NEW QUESTION # 261

.....

Which one is your favorite way to prepare for the exam, PDF, online questions or using simulation of exam software?
