Oracle Planning 2025 Implementation Professional
QUESTION & ANSWERS

Visit Now: <https://www.dumps-certify.com>

What's more, part of that TestkingPass 1z0-1080-25 dumps now are free: <https://drive.google.com/open?id=1JMEVvVhZfy-qG-HORBjkT1o5NLP3j6p>

TestkingPass's Oracle 1z0-1080-25 practice exam software tracks your performance and provides results on the spot about your attempt. In this way, our Oracle Planning 2025 Implementation Professional (1z0-1080-25) simulation software encourages self-analysis and self-improvement. Questions in the Oracle 1z0-1080-25 Practice Test software bear a striking resemblance to those of the real test.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.
Topic 2	<ul style="list-style-type: none">Report on EPM data: This section of the exam measures the skills of a Planning Administrator and covers using reporting tools to analyze data stored in EPM applications.
Topic 3	<ul style="list-style-type: none">Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.

Topic 4	<ul style="list-style-type: none"> • Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.
Topic 5	<ul style="list-style-type: none"> • Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Topic 6	<ul style="list-style-type: none"> • Create and manage navigation flows: This section of the exam measures the skills of an EPM Consultant and involves organizing navigation flows to simplify user interaction in Planning.
Topic 7	<ul style="list-style-type: none"> • Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.
Topic 8	<ul style="list-style-type: none"> • Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.
Topic 9	<ul style="list-style-type: none"> • Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 10	<ul style="list-style-type: none"> • Report on Planning Data: This section of the exam measures the skills of a Planning Administrator and focuses on generating reports to analyze and present Planning data effectively.
Topic 11	<ul style="list-style-type: none"> • Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.
Topic 12	<ul style="list-style-type: none"> • Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.
Topic 13	<ul style="list-style-type: none"> • Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.
Topic 14	<ul style="list-style-type: none"> • Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Topic 15	<ul style="list-style-type: none"> • Creating System Reports: This section of the exam measures the skills of a Planning Administrator and focuses on system-generated reports that provide insights into application activity.
Topic 16	<ul style="list-style-type: none"> • Explain required and user-defined dimensions; how dimension hierarchies impact Planning
Topic 17	<ul style="list-style-type: none"> • Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of an EPM Consultant and includes creating interactive forms and dashboards and setting up navigation flows for a better user experience.
Topic 18	<ul style="list-style-type: none"> • Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 19	<ul style="list-style-type: none"> • Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.
Topic 20	<ul style="list-style-type: none"> • This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 21	<ul style="list-style-type: none"> • Build validation rules: This section of the exam measures the skills of an EPM Consultant and includes creating rules that validate data entry in forms.
Topic 22	<ul style="list-style-type: none"> • Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system.

Topic 23	<ul style="list-style-type: none"> • Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flexible planning and modeling needs.
Topic 24	<ul style="list-style-type: none"> • Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.
Topic 25	<ul style="list-style-type: none"> • Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.

Pass 1z0-1080-25 Exam with Reliable 1z0-1080-25 Real Dumps by TestkingPass

In today's era, knowledge is becoming more and more important, and talents are becoming increasingly saturated. In such a tough situation, how can we highlight our advantages? It may be a good way to get the test 1z0-1080-25 certification. In fact, we always will unconsciously score of high and low to measure a person's level of strength, believe that we have experienced as a child by elders inquire achievement feeling, now, we still need to face the fact. Our society needs all kinds of comprehensive talents, the 1z0-1080-25 Study Materials can give you what you want, but not just some boring book knowledge, but flexible use of combination with the social practice.

Oracle Planning 2025 Implementation Professional Sample Questions (Q23-Q28):

NEW QUESTION # 23

As an Identify domain administrator, you can manage users in Oracle Identity Management and assign predefined roles to users while creating them. When a user has access to Cloud EPM Planning, Service Administrators can grant roles to many users at the same time. Which two statements are true about user and group security?

- A. Assigning roles at the business process level can reduce the access rights of users.
- B. Service users and groups cannot be members of groups maintained in Access Control.
- C. Access control lists predefined roles as groups.
- D. Assigning roles at the business process level can only enhance the access rights of users.

Answer: C,D

NEW QUESTION # 24

Which four job types can be scheduled in Planning?

- A. Import Data and Export Data
- B. Data map
- C. Promote Planning Unit
- D. Create Snapshot
- E. Merge Data Slices
- F. Refresh Database

Answer: A,B,E,F

NEW QUESTION # 25

Which three are Navigation Flow customization categories?

- A. Group
- B. Global
- C. User
- D. Artifact
- E. Role

Answer: A,B,E

Explanation:

In Oracle Planning 2024, Navigation Flows can be customized to tailor the user interface and experience based on specific categories. The three customization categories supported are Role, Group, and Global:

* A. Role: Navigation Flows can be customized for specific user roles (e.g., Planner, Administrator), allowing different layouts or access to cards based on job functions.

* C. Group: Customization can be applied to user groups, enabling administrators to assign tailored navigation flows to predefined sets of users based on their team or department.

* E. Global: Global customization applies to all users across the application, serving as the default navigation flow unless overridden by Role or Group settings.

* B. User: This is incorrect because Oracle Planning does not support navigation flow customization at the individual user level- customizations are broader, targeting roles or groups.

* D. Artifact: This is incorrect because "Artifact" refers to application components (e.g., forms, rules) managed in migration, not a category for navigation flow customization.

The Oracle documentation confirms that Role, Group, and Global are the three levels at which navigation flows can be customized, providing flexibility in how users interact with the Planning application.

NEW QUESTION # 26

Which two features can help users create business rules?

- A. Add calculations in calculation script syntax by switching to Script Mode.
- B. Rules are represented graphically in a flow chart into which you can drag and drop components to design the rule.
- C. Add calculations by using preformed system templates, such as clearing data, copying data, aggregating data, and so on.
- D. Design sophisticated rules that solve use cases that normal business rules cannot solve by using Groovy business rules.

Answer: C,D

Explanation:

In Oracle Planning 2024 Implementation, business rules are essential for automating calculations, data manipulations, and complex logic within the application. The platform provides multiple features to assist users in creating these rules efficiently, as outlined in the Oracle documentation. The two features that directly help users create business rules are:

* A. Add calculations by using preformed system templates, such as clearing data, copying data, aggregating data, and so on: Oracle Planning offers predefined system templates that simplify rule creation. These templates enable users to quickly implement common operations like clearing data, copying data between dimensions, or aggregating data without writing complex code from scratch. This feature is particularly useful for users who may not have advanced scripting skills, as it provides a guided, template-driven approach to rule design.

* C. Design sophisticated rules that solve use cases that normal business rules cannot solve by using Groovy business rules: Groovy business rules extend the capabilities of standard business rules by allowing users to write custom logic using the Groovy scripting language. This feature is designed for advanced use cases, such as dynamic calculations based on runtime conditions or complex data manipulations that go beyond the scope of traditional rules. It empowers users to address specialized business requirements efficiently.

* B. Add calculations in calculation script syntax by switching to Script Mode: While Script Mode exists and allows users to write calculations using a script-based syntax (e.g., Essbase calc scripts), it is not highlighted as a primary "feature" for creating business rules in the Oracle Planning 2024 context. It is more of a mode of operation rather than a distinct feature assisting rule creation.

* D. Rules are represented graphically in a flow chart into which you can drag and drop components to design the rule: Although graphical rule design was a feature in older Hyperion Planning versions (e.g., Calculation Manager's graphical interface), Oracle Planning 2024 documentation does not emphasize a drag-and-drop flowchart interface as a current primary method for rule creation. Instead, it focuses on templates and Groovy scripting.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Working with Business Rules" (docs.oracle.com, updated 2024). This section details the use of "system templates for calculations" and "Groovy business rules" as key features for rule creation.

* Oracle Planning 2024 Implementation Study Guide: Confirms that predefined templates (e.g., for clearing or aggregating data) and Groovy rules are core features to assist users in designing business rules.

NEW QUESTION # 27

Which statement describes Strategic Modeling?

- A. It is used to quickly model and evaluate financial scenarios, and offers out-of-the-box treasury capabilities.
- B. It is used to strategically manage and analyze finances at any business level with built-in dashboards.
- C. It is used to model the flow of data by defining strategic rules for sharing data between modules.
- D. It is used to develop driver-based strategic plans and generate core financial statements.

Answer: A

Explanation:

Strategic Modeling in Oracle Planning 2024 is a module designed to enable rapid modeling and evaluation of financial scenarios, such as mergers, acquisitions, or long-term strategic plans. It provides a flexible framework for simulating "what-if" scenarios and includes out-of-the-box treasury capabilities, such as cash flow forecasting, debt scheduling, and interest rate calculations, which are critical for strategic financial planning.

* A. It is used to model the flow of data by defining strategic rules for sharing data between modules:

Incorrect. This describes data integration (e.g., via data maps), not Strategic Modeling, which focuses on scenario analysis.

* B. It is used to develop driver-based strategic plans and generate core financial statements: Incorrect.

While it supports driver-based planning, generating core financial statements is more aligned with the Financials module, not Strategic Modeling's primary focus.

* C. It is used to strategically manage and analyze finances at any business level with built-in dashboards:

Incorrect. This is too broad and aligns more with the overall Planning application, not specifically Strategic Modeling.

* D. It is used to quickly model and evaluate financial scenarios, and offers out-of-the-box treasury capabilities: Correct. This matches the module's purpose of rapid scenario modeling and its treasury-related features.

The Oracle documentation highlights Strategic Modeling's role in scenario analysis and its treasury tools, making D the accurate description.
