

The SAFe-Agilist exam dumps are similar to real exam questions

QUESTION 1

Who facilitates the PO Sync meeting?

- A. Scrum Master
- B. Product Owner
- C. Business Owners
- D. Release Train Engineer

Correct Answer: D

Explanation/Reference:

The Release Train Engineer (RTE) typically facilitates a weekly (or more frequently, as needed) Scrum of Scrums (SoS) event. The SoS helps coordinate the dependencies of the ARTs and provides visibility into progress and impediments. The RTE, representatives from each team (often the Scrum Master), and others (where appropriate) meet to review their progress toward milestones and PI objectives, and dependencies among the teams. The event is timeboxed for 30-60 minutes and is followed by a "meet after" where individuals who want to do a deeper dive into specific problems can remain behind.

QUESTION 2

Which of the below is not a pillar of the SAFe House of Lean?

- A. Value
- B. Innovation
- C. Relentless Improvement
- D. Flow

Correct Answer: A

Explanation/Reference:

The SAFe House of Lean has Lean-Agile Leadership at the base, Value at the top and 4 pillars which are Respect for people and culture, Flow, Innovation and Relentless Improvement.

QUESTION 3

During PI Planning, which two tasks are part of the Scrum Master's role in the first team breakout? (Choose two.)

Multiple Selection

The SAFe-Agilist certification is highly valued by organizations that are adopting agile methodologies to improve their business processes and create value for their customers. SAFe 6 Agilist - Leading SAFe (SA) (6.0) certification validates a person's knowledge and expertise in implementing agile practices at scale, which is essential for driving organizational change and achieving business agility. The SAFe-Agilist certification is also a stepping stone for professionals who want to advance their careers in agile and pursue higher-level certifications, such as SAFe Program Consultant or SAFe Release Train Engineer.

The SAFe Agilist certification exam is a challenging exam that requires extensive preparation and study. Candidates must have a deep understanding of agile practices and the SAFe framework to pass the exam. SAFe-Agilist Exam is designed to test the candidate's ability to think critically, solve problems, and apply agile principles in real-world scenarios. Successful completion of the SAFe Agilist certification exam demonstrates the candidate's ability to lead and manage large-scale agile projects and is highly valued by employers in the industry.

Scaled Agile SAFe 6 Agilist - Leading SAFe (SA) (6.0) Sample Questions (Q76-Q81):

NEW QUESTION # 76

When should new approaches be anchored in an organization's culture?

- A. Culture change comes last because of changing work habits
- B. Culture change needs to happen before the SAFe implementation can begin
- C. Culture should not be changed because SAFe respects current culture
- D. Culture change comes right after a sense of urgency is created in the organization

Answer: A

Explanation:

SAFe follows Kotter's 8-step change model. The workbook notes:

"Culture change comes last, not first. It is the outcome, not the precondition, of a successful transformation.

Culture changes only after you have successfully demonstrated that the new way is superior to the old." This confirms that culture change follows behavioral change.

NEW QUESTION # 77

What is the focus of Lean Thinking?

- A. Reducing delays
- B. Moving to an iterative development process
- C. Ensuring respect for people and culture
- D. Implementing objective measures of progress

Answer: A

Explanation:

Reducing delays is the focus of Lean thinking. Lean thinking is a philosophy and a set of principles and practices that aim to eliminate waste and optimize value delivery. Waste is anything that does not directly contribute to customer value or that causes delays in delivering value. Delays are the primary cause of waste, as they increase inventory, risk, variability, overhead, and dissatisfaction. Reducing delays means minimizing the time between customer need and value delivery, which improves quality, efficiency, and customer satisfaction. NEW QUESTION # 78

According to SAFe Principle #10, what should the Enterprise do when markets and customers demand change?

- A. Apply development cadence and synchronization to operate effectively and manage uncertainty
- B. Create an Agile Release Train to focus on value

- C. Create a reliable decision-making framework to empower employees and ensure a fast flow of value
- D. Reorganize the network around the new value flow

Answer: D

Explanation:

SAFe Principle #10 emphasizes:

"Organize around value" and states that enterprises must continuously adjust their organizational structure to optimize for the flow of value when market demands change.

This means reorganizing the network around the new value flow is the recommended approach.

NEW QUESTION # 79

During the final plan review, Program risks are addressed using ROAM. What do the letters in ROAM represent?

- A. Owned, Mitigated, Active, Resolved
- B. Owned, Mitigated, Resolved, Accepted
- C. Resolved, Assigned, Mitigated, Owned
- D. Resolved, Owned, Approved, Mitigated

Answer: D

NEW QUESTION # 80

A confidence vote is taken at the end of PI Planning after dependencies are resolved and risks are addressed. What best describes the process of the confidence vote?

- A. The team's and the ARTs vote
- B. Each person votes
- C. The managers vote
- D. The Business Owners vote

Answer: A

Explanation:

According to the SAFe Agilist 6.0 domain of PI Planning, the confidence vote is a process where:

* Each team conducts a vote using their fingers (fist of five) or a digital tool for remote events

* The teams vote on the confidence level for the objectives as a set, and if confidence is high enough, the aggregate set of objectives becomes the committed ART plan

* The Release Train Engineer summarizes the team objectives into the ART PI objectives in a format suitable for management communication
