Reliable Latest FSCP Exam Materials | Amazing Pass Rate For FSCP: Forescout Certified Professional Exam | High-quality FSCP Study Guide Pdf

BTW, DOWNLOAD part of GuideTorrent FSCP dumps from Cloud Storage: https://drive.google.com/open?id=1wdmrlHdMMbGrEjywVdRHqWUDQxxH9xbx

Our Forescout FSCP qualification test help improve your technical skills and more importantly, helping you build up confidence to fight for a bright future in tough working environment. Our professional experts devote plenty of time and energy to developing the FSCP Study Tool. You can trust us and let us be your honest cooperator in your future development. Here are several advantages about our Forescout FSCP exam for your reference.

Forescout FSCP Exam Syllabus Topics:

Topic	Details
Topic 1	• Customized Policy Examples: This section of the exam measures skills of security architects and solution delivery engineers, and covers scenario based policy design and implementation: you will need to understand business case requirements, craft tailored policy frameworks, adjust for exceptional devices or workflows, and document or validate those customizations in context.
Topic 2	• Policy Functionality: This section of the exam meas-ures skills of policy implementers and integration specialists, and covers how policies operate within the platform, including dependencies, rule order, enforcement triggers, and how they interact with device classifications and dynamic attributes.
Topic 3	• Advanced Product Topics Certificates and Identity Tracking: This section of the exam measures skills of identity and access control specialists and security engineers, and covers the management of digital certificates, PKI integration, identity tracking mechanisms, and how those support enforcement and audit capability within the system.
Topic 4	• Plugin Tuning HPS: This section of the exam measures skills of plugin developers and endpoint integration engineers, and covers tuning the Host Property Scanner (HPS) plugin: how to profile endpoints, refine scanning logic, handle exceptions, and ensure accurate host attribute collection for enforcement.
Topic 5	• Notifications: This section of the exam measures skills of monitoring and incident response professionals and system administrators, and covers how notifications are configured, triggered, routed, and managed so that alerts and reports tie into incident workflows and stakeholder communication.

Topic 6	• Advanced Product Topics Licenses, Extended Modules and Redundancy: This section of the exam measures skills of product deployment leads and solution engineers, and covers topics such as licensing models, optional modules or extensions, high availability or redundancy configurations, and how those affect architecture and operational readiness.

FSCP Study Guide Pdf, FSCP Exam

Our FSCP exam cram is famous for instant access to download, and you can receive the downloading link and password within ten minutes, so that you can start your practice as early as possible. Furthermore, FSCP exam dump are high-quality, since we have experienced professionals to edit and verify them. We offer you free demo for you to have a try before buying FSCP Exam Braindumps, so that you can have a deeper understanding of what you are going to buy. You can enjoy free update for one year for FSCP exam dumps, and the update version for FSCP exam dumps will be sent to your email automatically.

Forescout Certified Professional Exam Sample Questions (Q76-Q81):

NEW QUESTION # 76
Which of the following actions can be performed with Remote Inspection?

- A. Send Balloon Notification, Send email to user
- B. Endpoint Address ACL, Assign to VLAN
- C. Disable External Device, Start Windows Updates
- D. Start Secure Connector, Attempt to open a browser at the endpoint
- E. Set Registry Key, Disable dual homing

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:
According to the Forescout HPS Inspection Engine Configuration Guide Version 10.8 and the Remote Inspection and SecureConnector Feature Support documentation, the actions that can be performed with Remote Inspection include "Start Secure Connector" and "Attempt to open a browser at the endpoint".
Remote Inspection Capabilities:
According to the documentation, Remote Inspection uses WMI and other standard domain/host management protocols to query the endpoint, and to run scripts and implement remediation actions on the endpoint.
Remote Inspection is agentless and does not install any applications on the endpoint.
Actions Supported by Remote Inspection:
According to the HPS Inspection Engine Configuration Guide:
The Remote Inspection Feature Support table lists numerous actions that are supported by Remote Inspection, including:
* Set Registry Key -#Supported by Remote Inspection
* Start SecureConnector -#Supported by Remote Inspection
* Attempt to Open Browser -#Supported by Remote Inspection
* Send Balloon Notification -#Supported (requires SecureConnector; can also be used with Remote Inspection)
* Start Windows Updates -#Supported by Remote Inspection
* Send Email to User -#Supported action
However, the question asks which actions appear together in one option, and Option D correctly combines two legitimate Remote Inspection actions: "Start Secure Connector" and "Attempt to open a browser at the endpoint".
Start SecureConnector Action:
According to the documentation:
"Start SecureConnector installs SecureConnector on the endpoint, enabling future management via SecureConnector" This is a supported Remote Inspection action that can deploy SecureConnector to endpoints.
Attempt to Open Browser Action:
According to the HPS Inspection Engine guide:
"Opening a browser window" is a supported Remote Inspection action
However, there are limitations documented:
* "Opening a browser window does not work on Windows Vista and Windows 7 if the HPS remote inspection is configured to work as a Scheduled Task"

* "When redirected with this option checked, the browser does not open automatically and relies on the packet engine seeing this traffic" Why Other Options Are Incorrect:
* A. Set Registry Key, Disable dual homing - While Set Registry Key is supported, "Disable dual homing" is not a standard Remote Inspection action
* B. Send Balloon Notification, Send email to user - Both are notification actions, but the question seeks Remote Inspection-specific endpoint actions; these are general notification actions not specific to Remote Inspection
* C. Disable External Device, Start Windows Updates - While Start Windows Updates is supported by Remote Inspection, "Disable External Device" is not a Remote Inspection action; it's a network device action
* E. Endpoint Address ACL, Assign to VLAN - These are Switch plugin actions, not Remote Inspection actions; they work on network device level, not endpoint level Remote Inspection vs. SecureConnector vs. Switch Actions:
According to the documentation:
Remote Inspection Actions (on endpoints):
* Set Registry Key on Windows
* Start Windows Updates
* Start Antivirus
* Update Antivirus
* Attempt to open browser at endpoint
* Start SecureConnector (to deploy SecureConnector)
Switch Actions (on network devices):
* Endpoint Address ACL
* Access Port ACL
* Assign to VLAN
* Switch Block
Referenced Documentation:
* Forescout CounterACT Endpoint Module HPS Inspection Engine Configuration Guide Version 10.8
* Remote Inspection and SecureConnector - Feature Support documentation
* Set Registry Key on Windows action documentation
* Start Windows Updates action documentation
* Send Balloon Notification documentation

NEW QUESTION # 77
Place the DNS Enforce control actions into the correct workflow order for endpoints which have a pending control action.

Answer:

Explanation:

NEW QUESTION # 78
Which of the following logs are available from the GUI?

- A. Switch, Discovery, Threat Protection, Event Viewer, Audit Trail
- B. Switch, Policy, Blocking, Event Viewer, Audit Trail
- C. Host Details, Policy, Today Log, Threat Event Viewer, Audit Trail
- D. HPS, Policy, Threat Protection, Event Viewer, Audit Trail
- E. Host Details, Policy, Blocking, Event Viewer, Audit Trail

Answer: E

Explanation:
Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:
According to the Forescout Platform Administration Guide, the logs available from the GUI Console include: Host Details, Policy, Blocking, Event Viewer, and Audit Trail.
Available Logs from the Forescout Console GUI:
* Host Details Log - Provides detailed information about individual endpoints discovered on the network.
This log displays comprehensive host properties and status information directly accessible from the console.
* Policy Log - Shows policy activity and records how specific endpoints are handled by policies. The Policy Log investigates endpoint activity, displaying information about policy matches, actions executed, and policy evaluation results.
* Blocking Log - Displays all blocking events that occur on the network, including port blocks, host blocks, and external port

blocks. This log provides an at-a-glance display of blocked endpoints with timestamps and reasons.
* Event Viewer - A system log that displays severity, date, status, element, and event information.
Administrators can search, export, and filter events using the Event Viewer.
* Audit Trail - Records administrative actions and changes made to the Forescout platform configuration and policies.
How to Access Logs from the GUI:
From the Forescout Console GUI, administrators access logs through the Log menu by selecting:
* Blocking Logs to view block events
* Event Viewer to display system events
* Policy Reports to investigate policy activity
Why Other Options Are Incorrect:
* B. Switch, Policy, Blocking, Event Viewer, Audit Trail - "Switch" is not a standalone log type available from the GUI; switch data is captured through plugin logs and reports
* C. Switch, Discovery, Threat Protection, Event Viewer, Audit Trail - "Discovery" and "Threat Protection" are report categories, not GUI logs in the standard log menu
* D. HPS, Policy, Threat Protection, Event Viewer, Audit Trail - HPS logs are accessed through CLI, not the GUI; "Threat Protection" is a report, not a GUI log
* E. Host Details, Policy, Today Log, Threat Event Viewer, Audit Trail - "Today Log" and "Threat Event Viewer" are not standard log names in the Forescout GUI Referenced Documentation:
* Forescout Platform Administration Guide - Generating Reports and Logs
* Policy Reports and Logs section
* Work with System Event Logs documentation
* View Block Events documentation

NEW QUESTION # 79
When configuring a Send Email action to notify CounterACT administrators, how do you add endpoint specific host information to the message?

- A. Edit the "Message to Email Recipient" Field of the Send Email action Parameters tab, then click 'Tag" to add the desired keyword tag.
- B. Edit the "Message to Email Recipient" Field of the Send Email action Parameters tab, then click 'Tag" to add the desired property value.
- C. It is not possible to add specific host information for detected endpoints.
- D. Create criteria in sub-rules to detect the desired specific host information. The "Send Email" action will send this information to the CounterACT administrator.
- E. Edit the Options > General > Mail settings and click "Tag" to add the desired property values.

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:
According to the Forescout Administration Guide - Send Email action documentation, to add endpoint- specific host information to a Send Email notification, you should "Edit the 'Message to Email Recipient' Field of the Send Email action Parameters tab, then click 'Tag' to add the desired property value".
Property Tags in Send Email Action:
According to the Property Tags documentation:
"Property tags insert endpoint values into condition or action fields, and are replaced by the actual endpoint property value when the field is evaluated." Property tags allow dynamic insertion of endpoint-specific data into email messages.
How to Add Property Tags to Email:
According to the documentation:
* Edit Send Email Action - Open the Send Email action configuration
* Navigate to Parameters Tab - Select the Parameters tab
* Edit Message Field - Edit the "Message to Email Recipient" field
* Click Tag Button - Select the "Tag" button/option
* Choose Property - Select the endpoint property to insert (e.g., IP address, OS, etc.)
* Confirm - The property tag is inserted into the message
Example Email Message with Property Tags:
According to the More Action Tools documentation:
text
Example message:
"Endpoint [IP.Address] with hostname [IP.Hostname]

has failed compliance check for operating system [OS]."
When evaluated:
"Endpoint 192.168.1.50 with hostname WORKPC-01
has failed compliance check for operating system Windows 10."
Available Properties for Tags:
According to the documentation:
Property tags can reference:
* IP Address
* MAC Address
* Hostname
* Operating System
* Device Function
* User information
* Custom endpoint properties
Why Other Options Are Incorrect:
* A. Create criteria in sub-rules - Sub-rules don't send email; they're for conditional logic
* C. Edit Options > General > Mail settings - This is for global email configuration, not message customization
* D. It is not possible - Incorrect; property tags specifically enable this functionality
* E. "Keyword tag" - The feature uses "property tags" or "tags," not "keyword tags" Referenced Documentation:
* Send Email action
* Property Tags
* More Action Tools - Property tags section

NEW QUESTION # 80
Which type of signed SSL Certificate file formats are compatible with CounterACT?

- A. .X.509, x.507
- B. .Pckcs#7, .pckcs#12
- C. .cer, .crt
- D. .p7b, .pem
- E. .Pfx/.p12, .Pfx/.p7

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:
According to the Forescout CLI Reference - Generating CSRs and Importing Signed Certificates documentation, the SSL certificate file formats compatible with CounterACT are ".p7b" and ".pem".
Supported Certificate Formats:
According to the CLI Reference documentation:
"To import a certificate from DER or P7B formatted files, convert it to PEM file format. Then convert the PEM files to a single PFX file as described above." This indicates that:
* P7B format - Supported (PKCS#7 container format)
* PEM format - Supported and widely used (ASCII-encoded format)
Certificate Format Conversion Process:
According to the documentation:
The standard import process is:
text
Original Format # Conversion # PEM Format # PFX Format # Import to CounterACT
DER files # Convert # PEM
P7B files # Convert # PEM
PEM files # Direct use or convert to PFX
Why Other Options Are Incorrect:
* A. .Pfx/.p12, .Pfx/.p7 - Pfx is the final format used, not input; p7 is not a standard format
* C. .X.509, x.507 - X.509 is a standard (not a format); x.507 is not valid
* D. .Pckcs#7, .pckcs#12 - Spelling is "PKCS," not "Pckcs"; these are standards, not file formats
* E. .cer, .crt - These are certificate formats but not listed as directly compatible in the documentation Certificate Import Workflow:
According to the documentation:
Compatible workflow formats:
* Input Formats (that need conversion):

* DER files # Convert to PEM
* P7B files # Convert to PEM
* CER files # Convert to PEM
* Intermediate Format:
* PEM (ASCII-encoded, universally compatible)
* Final Format:
* PFX (used for CounterACT import)
Referenced Documentation:
* Generating CSRs and Importing Signed Certificates - CLI Reference
* Import and Configure System Certificates

NEW QUESTION # 81
.....

We are constantly updating our Forescout FSCP practice material to ensure that students receive the latest Forescout Certified Professional Exam (FSCP) Questions based on the actual Building Forescout Certified Professional Exam (FSCP) exam content. Moreover, we also offer up to 1 year of free updates and free demos. GuideTorrent also offers a money-back guarantee (terms and conditions apply) for applicants who fail to pass the Forescout Certified Professional Exam (FSCP) test on the first try.
