2025 Itcertkr 최신 C_CPI_2506 PDF 버전 시험 문제집과 C_CPI_2506 시험 문제 및 답변 무료 공유:
<https://drive.google.com/open?id=1SS5AJqupDFBJPui7HcHHQXSJBzMS52K>

SAP인증 C_CPI_2506시험을 통과하여 자격증을 취득하여 IT 업계에서의 자신의 자리를 지키려면 많은 노력이 필요합니다. 회사일도 바쁜데 시험공부까지 스트레스가 장난아니게 싸이고 몸도 많이 상하겠죠. Itcertkr는 여러분을 위해 최신SAP인증 C_CPI_2506시험에 대비한SAP인증 C_CPI_2506덤프를 발채하였습니다. SAP인증 C_CPI_2506덤프는SAP인증 C_CPI_2506시험의 기출문제와 예상문제가 묶여져 있어 시험적중율이 굉장히 높습니다. 쉽게 시험을 통과하려면Itcertkr의 SAP인증 C_CPI_2506덤프를 추천합니다.

SAP C_CPI_2506 시험요강:

주제	소개
주제 1	• SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.

주제 2	Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
주제 3	Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
주제 4	SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.

C_CPI_2506시험대비 덤프 최신버전 & C_CPI_2506최신버전 시험대비 공부자료

Itcertkr의 SAP인증C_CPI_2506시험대비덤프는 실제시험문제 출제경향을 충분히 연구하여 제작한 완벽한 결과물입니다. 실제시험문제가 바뀌면 덤프를 제일 빠른 시일내에 업데이트하도록 하기에 한번 구매하시면 1년동안 항상 가장 최신의SAP인증C_CPI_2506시험덤프자료를 제공받을 수 있습니다.

최신 SAP Certified Associate C_CPI_2506 무료샘플문제 (Q49-Q54):

질문 # 49

What are the maturity levels of the SAP Integration Solution Advisory Method-ology? Note: There are 2 answers to this question.

- A. Implement your integration architectural strategy.
- B. Enable your integration structure.
- C. Assess your integration strategy
- D. Design your hybrid integration platform

정답: C,D

설명:

The maturity levels of the SAP Integration Solution Advisory Methodology are as follows:

Assess your integration strategy. This level helps you evaluate your current integration landscape and identify the gaps and challenges that need to be addressed.

Design your hybrid integration platform. This level helps you define your target integration architecture and select the best-fit integration technologies and tools for your scenarios.

Implement your integration architectural strategy. This level helps you execute your integration projects and deliver value to your business.

Enable your integration structure. This level helps you establish a governance model and best practices for your integration operations and maintenance. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

질문 # 50

Which SAP Integration Suite component delivers the Cloud Event to the "emis-s4hana-uc123" message queue?

- A. Process Integration
- B. Event Mesh
- C. Open Connector
- D. API Management

정답: B

설명:

In SAP Integration Suite, the component responsible for delivering Cloud Events to message queues is Event Mesh.

Event Mesh handles event-driven communication and manages message queues like emis-s4hana-uc123.

Process Integration (PI/PO) is on-premise middleware, not part of Integration Suite cloud services.

API Management handles APIs, not messaging events.

Open Connectors provides connectivity to third-party SaaS apps, not queue management.

Thus, the Cloud Event is delivered to the message queue via Event Mesh.

질문 # 51

You use an APIKey for authentication in an HTTPS API call. In which part of the Content Modifier is the APIKey included?

- A. Message body
- **B. Message header**
- C. Attachment
- D. Exchange property

정답: B

설명:

To use an API key for authentication in an HTTPS API call, you must include the API key in the message header of the content modifier step. The message header contains information related to the message, such as addressing, routing, or metadata. You can use the content modifier step to create or modify message headers using expressions or constants. The API key is typically passed as a value of a specific header field, such as Authorization or X-API-Key, depending on the API provider's requirements. You can use the Camel Simple Expression Language to access or construct the API key value from variables, properties, or system information. Reference: Content Modifier | SAP Help Portal, Using Camel Simple Expression Language | SAP Help Portal

질문 # 52

What do you use in an integration flow to handle unexpected errors?

- A. Status code checks
- B. Try-catch subprocesses
- **C. Exception-handling subprocesses**
- D. Exception handler integration flow elements

정답: C

설명:

In SAP Cloud Integration (part of Integration Suite), error handling within integration flows is implemented using:

Exception Subprocesses # Dedicated subprocesses triggered by an Error Start Event to handle unexpected runtime exceptions.

These allow logging, error notifications, or compensating logic.

Other options:

Try-Catch subprocesses # Not a modeling construct in SAP CPI.

Exception handler integration flow elements # Not a standard artifact; error handling is done with exception subprocesses.

Status code checks # Useful for response validation but not full error handling.

Thus, the correct answer is Exception-handling subprocesses.

질문 # 53

Which Clean Core Approach principle promotes the isolation of custom code from standard SAP functionality?

- **A. Maintain separation of concerns.**
- B. Prioritize code reusability.
- C. Enforce consistent coding standards.
- D. Promote modular design.

정답: A

The Clean Core Approach emphasizes keeping the SAP digital core free from modifications and isolating custom code: Separation of Concerns # Custom logic/extensions are isolated from SAP standard functionality, ensuring upgrades and innovations are not disrupted.

Other principles (modular design, coding standards, reusability) are good practices but not specifically tied to Clean Core's goal of isolating custom code.

Thus, the correct principle is Maintain separation of concerns.
