Pass Guaranteed FCSS_EFW_AD-7.6 - FCSS - Enterprise Firewall 7.6 Administrator–Professional Practical Information

For some candidates, a good after-sale service is very important to them, since they may have some questions about the FCSS_EFW_AD-7.6 exam materials. We have the both live chat service stuff and offline chat service, if any question that may bother you , you can ask for a help for our service stuff. They have the professional knowledge about the FCSS_EFW_AD-7.6 Exam Materials, and they will give you the most professional suggestions.

Our company has hired the best team of experts to create the best FCSS_EFW_AD-7.6 exam questions for you. Our team has the most up-to-date information. After analyzing the research, we write the most complete and up-to-date FCSS_EFW_AD-7.6 exam practice. At the same time, the experts also spent a lot of effort to study the needs of consumers, and committed to creating the best scientific model for users. You can free download the demos of our FCSS_EFW_AD-7.6 Study Guide to check our high quality.

>> FCSS_EFW_AD-7.6 Practical Information <<

2026 100% Free FCSS_EFW_AD-7.6 –The Best 100% Free Practical Information | FCSS - Enterprise Firewall 7.6 Administrator Labs

We are concerted company offering tailored services which include not only the newest and various versions of FCSS_EFW_AD-7.6 practice materials, but offer one-year free updates services with patient staff offering help 24/7. So there is considerate and concerted cooperation for your purchasing experience accompanied with patient staff with amity. Their enrichment is dependable and reliable. You can find FCSS_EFW_AD-7.6 practice materials on our official website we will deal with everything once your place your order.

Fortinet FCSS - Enterprise Firewall 7.6 Administrator Sample Questions (Q29-Q34):

NEW QUESTION # 29
How will configuring set tcp-mss-sender and set tcp-mss-receiver in a firewall policy affect the size and handling of TCP packets in the network?

- A. The TCP packet modifies the packet size only if the size of the packet is less than the one the administrator configured in the firewall policy.
- B. The administrator must consider the payload size of the packet and the size of the IP header to configure a correct value in the firewall policy.
- C. The maximum segment size permitted in the firewall policy determines whether TCP packets are allowed or denied.
- D. Applying commands in a firewall policy determines the largest payload a device can handle in a single TCP segment.

Answer: D

Explanation:

The set tcp-mss-sender and set tcp-mss-receiver commands in a firewall policy allow an administrator to adjust the Maximum Segment Size (MSS) of TCP packets.

This setting controls the largest payload size that a device can handle in a single TCP segment, ensuring that packets do not exceed the allowed MTU (Maximum Transmission Unit) along the network path.

set tcp-mss-sender adjusts the MSS value for outgoing TCP traffic.

set tcp-mss-receiver adjusts the MSS value for incoming TCP traffic.

This helps prevent issues with fragmentation and MTU mismatches, improving network performance and avoiding retransmissions.

NEW QUESTION # 30

An administrator is setting up an ADVPN configuration and wants to ensure that peer IDs are not exposed during VPN establishment.

Which protocol can the administrator use to enhance security?

- A. Choose IKEv1 aggressive mode because it simplifies peer identification.
- B. Stick with IKEv1 main mode because it offers better performance.
- C. Opt for SSL VPN web mode because it does not use peer IDs at all.
- D. Use IKEv2, which encrypts peer IDs and prevents exposure.

Answer: D

Explanation:

In ADVPN (Auto-Discovery VPN) configurations, security concerns include protecting peer IDs during VPN establishment. Peer IDs are exchanged in the IKE (Internet Key Exchange) negotiation phase, and their exposure could lead to privacy risks or targeted attacks.

IKEv2 encrypts peer IDs, making it more secure compared to IKEv1, where peer IDs can be exposed in plaintext in aggressive mode.

IKEv2 also provides better performance and flexibility while supporting dynamic tunnel establishment in ADVPN.

NEW QUESTION # 31

A company that acquired multiple branches across different countries needs to install new FortiGate devices on each of those branches. However, the IT staff lacks sufficient knowledge to implement the initial configuration on the FortiGate devices.

Which three approaches can the company take to successfully deploy advanced initial configurations on remote branches? (Choose three.)

- A. Apply Jinja in the FortiManager scripts for large-scale and advanced deployments.
- B. Use the Global ADOM to deploy global object configurations to each FortiGate device.
- C. Add FortiGate devices on FortiManager as model devices, and use ZTP or LTP to connect to FortiGate devices.
- D. Use provisioning templates and install configuration settings at the device layer.
- E. Use metadata variables to dynamically assign values according to each FortiGate device.

Answer: C,D,E

Explanation:

Use metadata variables to dynamically assign values according to each FortiGate device:

Metadata variables in FortiManager allow device-specific configurations to be dynamically assigned without manually configuring each FortiGate. This is especially useful when deploying multiple devices with similar base configurations.

Use provisioning templates and install configuration settings at the device layer:

Provisioning templates in FortiManager provide a structured way to configure FortiGate devices. These templates can define interfaces, policies, and settings, ensuring that each device is correctly configured upon deployment.

Add FortiGate devices on FortiManager as model devices, and use ZTP or LTP to connect to FortiGate devices:

Zero-Touch Provisioning (ZTP) and Local Touch Provisioning (LTP) help automate the deployment of FortiGate devices. By adding devices as model devices in FortiManager, configurations can be pushed automatically when devices connect for the first time, reducing manual effort.

NEW QUESTION # 32

Refer to the exhibit, which shows a command output.

FortiGate_A and FortiGate_B are members of an FGSP cluster in an enterprise network.
While testing the cluster using the ping command, the administrator monitors packet loss and found that the session output on FortiGate_B is as shown in the exhibit.
What could be the cause of this output on FortiGate_B?

- A. session-pickup-connectionless is set to disable on FortiGate_B.
- B. The session synchronization is encrypted.
- C. FortiGate_A and FortiGate_B have the same standalone-group-id value.
- D. FortiGate_B is configured in passive mode.

Answer: A

Explanation:
The Fortinet FGSP (FortiGate Session Life Support Protocol) cluster allows session synchronization between two FortiGate devices to provide seamless failover. However, ICMP (ping) is a connectionless protocol, and by default, FortiGate does not synchronize connectionless sessions unless explicitly enabled.
In the exhibit:
The command get system session list | grep icmp on FortiGate_B returns no output, meaning that ICMP sessions are not being synchronized from FortiGate_A.
If session-pickup-connectionless is disabled, FortiGate_B will not receive ICMP sessions, causing packet loss during failover.

NEW QUESTION # 33
Refer to the exhibit, which shows a partial troubleshooting command output.

An administrator is extensively using IPsec on FortiGate. Many tunnels show information similar to the output shown in the exhibit.
What can the administrator conclude?

- A. IPsec SAs cannot be offloaded.
- B. Only the outbound IPsec SA is copied to the NPU.
- C. The two IPsec SAs, inbound and outbound, are copied to the NPU.
- D. Only the inbound IPsec SA is copied to the NPU.

Answer: C

Explanation:
The diagnose vpn tunnel list name Hub2Spoke1 command output provides key information about the offloading status of an IPsec VPN tunnel to the Network Processing Unit (NPU).
npu_flag=20:
This flag indicates that both inbound and outbound IPsec Security Associations (SAs) have been offloaded to the NPU, meaning the VPN traffic is processed in hardware instead of the CPU.
npu_rgwy=10.10.2.2 and npu_lgwy=10.10.1.1:
These IPs represent the remote gateway (rgwy) and local gateway (lgwy), confirming that the tunnel is successfully offloaded.
npu_selid=1:
This value means the session selector for the NPU offloaded SA is active.
Since both inbound and outbound SAs are offloaded, the administrator can conclude that the FortiGate NPU is handling IPsec encryption and decryption efficiently, reducing CPU load and improving VPN performance.

I would like to find a different job, because I am tired of my job and present life. Do you have that idea? How to get a better job? Are you interested in IT industry? Do you want to prove yourself through IT? If you want to work in the IT field, it is essential to register IT certification exam and get the certificate. The main thing for you is to take IT certification exam that is accepted commonly which will help you to open a new journey. And you must be familiar with Fortinet FCSS_EFW_AD-7.6 Certification test. To obtain the certificate will help you to find a better job. What? Do you have no confidence to take the exam? It doesn't matter that you can use our DumpsFree dumps.

FCSS_EFW_AD-7.6 Labs: https://www.dumpsfree.com/FCSS_EFW_AD-7.6-valid-exam.html

Thanks to DumpsFree FCSS_EFW_AD-7.6 Labs Guarantee, you'll pass the exam, get free update within 90 days after the purchase (if there's any) or in case of failure, receive one more product available on our website and necessary for your preparation, Fortinet FCSS_EFW_AD-7.6 Practical Information Just buy them and you will pass the exam by your first attempt, An all-inclusive Solution for Passing FCSS_EFW_AD-7.6 Exam.

For developers and engineers, this holy grail of IT is becoming FCSS_EFW_AD-7.6 more of a reality every day, Together you make something great, Thanks to DumpsFree Guarantee, you'll pass the exam, get free update within 90 days after the purchase (if there's FCSS_EFW_AD-7.6 Certified Questions any) or in case of failure, receive one more product available on our website and necessary for your preparation.

100% Pass Quiz 2026 Fortinet FCSS_EFW_AD-7.6: FCSS - Enterprise Firewall 7.6 Administrator – The Best Practical Information

Just buy them and you will pass the exam by your first attempt, An all-inclusive Solution for Passing FCSS_EFW_AD-7.6 Exam, If you are willing to pay a little money to purchase our FCSS_EFW_AD-7.6 dumps materials we guarantee you 100% pass exams.

Our research materials have many advantages.
