#### **NEW QUESTION # 108**

When should the delimiter method be used in the Field Extractor?

- **A. When the events are separated by a consistent character or set of characters.**
- B. When the events need to be calculated using special characters.
- C. When the events need a regular expression to define the matching pattern.
- D. When the events do not have the correct permissions set.

## Answer: A

Explanation:

The delimiter method in the Field Extractor should be used when fields in events are separated consistently by a specific character (such as a comma, tab, or pipe). This method simplifies extraction without requiring complex regular expressions.
