## PMI Agile Certified Practitioner Sample Questions (Q327-Q332):

### NEW QUESTION # 327

Due to its complexity, a new team member struggles with developing a concise user story. What advice should the agile practitioner give to assist with developing the story?

- A. Discuss the story at the next retrospective
- B. Break the story up and focus on the most valuable parts
- C. Pick another story from the product backlog
- D. Hand the story over to a more experienced team member

**Answer: B**

Explanation:

Explanation/Reference:

### NEW QUESTION # 328

In a vision meeting, the vision for the project is defined and presented by the:

- A. project team
- B. management
- C. customer
- D. project manager

**Answer: C**

Explanation:

Explanation/Reference:

Explanation:

### NEW QUESTION # 329

What can the project team do to assist in achieving the organizational goal?

- A. Engage the project management office (PMO) to take responsibility for identifying lessons learned on projects.
- B. Perform a root cause analysis to identify alternative approaches for performing the next project.
- C. Maintain and review a lessons learned repository to improve delivery of future projects.
- D. Ask each team member to post corrective action to the backlog.

**Answer: C**

Explanation:

Capturing and reviewing lessons learned is a vital practice in both agile and traditional environments.

According to the PMI Agile Practice Guide (Section 5.6: Retrospectives) and PMBOK Guide (Lessons Learned Register), continuous learning from project execution helps teams and organizations improve predictability, quality, and efficiency.

Mike Griffiths in the PMI-ACP Exam Prep Book (Chapter 7: Continuous Improvement) highlights the importance of documenting insights and feeding them into future projects for organizational maturity.

\* Option A is correct: creating and reviewing a lessons learned repository supports organizational learning and better delivery.

\* Option B confuses issue tracking with structured learning.

\* Option C removes responsibility from the team-agile encourages team ownership of improvement.

\* Option D is helpful in some contexts but is not a repeatable organizational improvement tool like a lessons learned repository.

### NEW QUESTION # 330

In Agile risk management, a risk burndown chart is best used to:

- A. Illustrate the project risk profile and new and changing risks.
- B. Qualitatively analyze the probability of a risk occurring.
- C. Track progress on risk reduction of technical risks.
- D. Document the external risks that could impact the project.

**Answer: A**

Explanation:

Explanation/Reference:

### NEW QUESTION # 331

An agile team is unable to complete all its planned sprint user stories, which results in a decrease of its planned sprint velocity. What should the team do?

- A. Increase the duration of the next sprint to accommodate the incomplete user stories and maintain velocity.
- B. Re-estimate the incomplete stories for the next sprint because its relative size has changed.
- C. Work with the product owner to create a spike with another agile team.
- D. Re-estimate the sprint's completed stories to increase and adjust the sprint's velocity.
