Cisco Securing Email with Cisco Email Security Appliance Sample Questions (Q201-Q206):

NEW QUESTION # 201

Refer to the exhibit. An engineer needs to change the existing Forged Email Detection message filter so that it references a newly created dictionary named 'Executives'.

What should be done to accomplish this task?

- A. Change "support" to "Executives".
- B. Change fed' to "Executives".
- C. Change "from" to "Executives".
- D. Change "TESF" to "Executives".

Answer: A

Explanation:

<https://www.ciscolive.com/c/dam/r/ciscolive/us/docs/2019/pdf/BRKSEC-2240.pdf>

NEW QUESTION # 202

An administrator identifies that, over the past week, the Cisco ESA is receiving many emails from certain senders and domains which are being consistently quarantined. The administrator wants to ensure that these senders and domain are unable to send anymore emails.

Which feature on Cisco ESA should be used to achieve this?

- A. blocklist
- B. incoming mail policies
- C. S/MIME Sending Profile
- D. safelist

Answer: B

Explanation:

The appliance enforces your organization's policies for messages sent to and from your users through the use of mail policies. These are sets of rules that specify the types of suspect, sensitive, or malicious content that your organization may not want entering or leaving your network. This content may include:

- spam
- legitimate marketing messages
- graymail
- viruses
- phishing and other targeted mail attacks
- confidential corporate data
- personally identifiable information
