NEW QUESTION # 162

You're a Slack Org Owner at Acme Inc. Several employees report that public channels are difficult to search and find. This results in channel sprawl or duplicative channels being created by employees. The Slack experience is now noisy and confusing. You need a solution to address this while still enabling members to create channels quickly.

What should you do?

(Select the best answer.)

- A. Post a list of global org-wide public channels in your Slack announcement channels to create awareness amongst employees.
- B. Pin your organization's Slack Etiquette Guide to the org-wide Slack tips and tricks channel.
- C. Create a process to request public channel creation through Slack admins.
- **D. Create and communicate a channel naming and creation policy that includes channel structure and naming convention for your organization.**

Answer: D

Explanation:

Slack recommends setting and communicating a strong channel naming and creation policy to improve discoverability and reduce confusion.

According to Slack best practices for channel management:

"A consistent channel naming convention helps employees find information more easily and prevents the creation of duplicative channels. A documented and communicated policy ensures that channel creators follow structure guidelines without needing admin intervention." Pinning guides (A) and posting lists (B) are helpful for awareness but do not solve the underlying structural issues. Requiring admins for every new channel (C) is too restrictive and counter to Slack's flexibility model. (Reference: Slack Administration Study Guide - Channel Management and Naming Conventions)
