Don't miss these incredible offers. Order real Veeam VMCE\_v12 Exam Questions today and start preparation for the certification exam.

### Veeam Certified Engineer v12 Sample Questions (Q37-Q42):

#### NEW QUESTION # 37

An administrator needs to create a strategy in advance of a disaster to ensure that applications can be started in a specific order. How can this be accomplished?

- **A. Failover plan**
- B. Veeam ONE migration script
- C. Attach XML file to existing job with the VM start order
- D. Application group

**Answer: A**

Explanation:

To ensure that applications can be started in a specific order in advance of a disaster, an administrator should use a Failover Plan in Veeam Backup and Replication. This feature allows for the creation of a predefined sequence for starting up VMs, ensuring that applications are brought online in the correct order during a disaster recovery scenario.

#### NEW QUESTION # 38

Which of the following is a unique feature that allows Veeam Cloud Service Providers to offer backup and replication services to customers?

- **A. Veeam Cloud Connect**
- B. Veeam Data Vault
- C. Veeam Archive Services
- D. Veeam Cloud Scale-out Repository

**Answer: A**

#### NEW QUESTION # 39

The engineer configured Veeam Backup & Replications 3 years ago with an all-in-one physical server with one job backing up all VMs. The environment grew considerably and RPOs are no longer met.

The engineer checks the backup job and sees:

Load: Source 0% > Proxy 68% > Network 0% > Target 0%.

What should be done to decrease the backup processing time?

- A. Split the VMs in several jobs with the same schedule to process the VMs in parade
- B. Install another Veeam Backup & Replication server and move half of the VMs to be processed in a separate job
- C. Edit the Backup Job settings and enable parallel processing from Advanced options
- **D. From Backup Infrastructure add an extra Windows/Linux machine as Backup Proxy**

**Answer: D**

Explanation:

Given the proxy load of 68% and all other loads (source, network, target) at 0%, the bottleneck is at the proxy. To decrease the backup processing time and accommodate the growth of the environment, adding additional Windows or Linux machines as backup proxies would help distribute the load. This would enable parallel processing and reduce the time taken to complete the backup jobs, thereby helping to meet the RPOs.

### NEW QUESTION # 40

Your company is using Veeam ONE to monitor VM performance in real time. An end user has called to complain about the performance of a VM and has asked you to investigate the cause of the issue. Where in Veeam ONE do you go to view real time VM metrics?

- A. In the monitor client under the infrastructure view
- B. In the monitor client under the data protection view
- C. In the reporter portal in the dashboards tab, VM performance dashboard
- D. In the reporter portal in the workspace tab, VM performance

**Answer: A**

Explanation:

Reference: <https://www.veeam.com/blog/monitoring-vmware-hyperv-environment.html>

### NEW QUESTION # 41

A customer has a physical windows server running Microsoft SQL 2020. Which component should be used to protect the whole server?

- A. Veeam Agent
- B. Cache Repository
- C. Veeam Backup Proxy
- D. Veeam Plug-in for Enterprise Application

**Answer: A**

Explanation:

To protect a physical Windows server running Microsoft SQL 2020, the Veeam Agent should be used. Veeam Agent is designed to provide comprehensive backup and recovery for physical servers, including those running critical applications like Microsoft SQL Server.

### NEW QUESTION # 42

.....

We can calculate that Veeam Certified Engineer v12 (VMCE\_v12) certification exam is the best way by which you can learn new applications, and tools and mark your name in the list of best employees in your company. You don't have to be dependent on anyone to support you in your professional life, but you have to prepare for Itcertking real Veeam Certified Engineer v12 (VMCE\_v12) exam questions.
