DOWNLOAD the newest It-Tests PL-400 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1YCHJfpOwm7WPl3aaHxTDx178URC8TroL>

After you purchase PL-400 exam questions, you should always pay attention to your email address. Once there is a new version, we will send updated information to your email address. As we all know, the authority of a product matches its hit rate. How high the authority of PL-400 Real Exam is, I don't need to say any more. You just know what you will know. You can't really find a product that has a higher hit rate than our PL-400 study materials!

Exam Domains

As mentioned, to pass PL-400, the candidate must have the ability to create solution components such as system integration, client user experience, user visualization and automation, and much more. In other words, this official test is based upon seven learning modules. Each of them carries a different weightage and explains a different set of skills such as:

- **Configuring the business process automation setup**

Though this section is short, it requires the candidate to explain concepts like Power Automate and implementing processes in a diligent manner.

- **Developing integrations**

Publishing and consuming events by using the API and the Plug-in Registration Tool, as well as data synchronization implementations are covered by this last exam module.

- **Creating a technical design**

Validating requirements and creating technical architecture, solution components designing, and Power Platform extensibility points are what will be tested according to this part.

- **Extending the user experience**

Prove your expertise related to the business logic application using client scripting, PCF components (in the Component Framework for Power Apps), and command functions.

Study PL-400 Materials, PL-400 Associate Level Exam

It-Tests's product is prepared for people who participate in the Microsoft certification PL-400 exam. It-Tests's training materials include not only Microsoft certification PL-400 exam training materials which can consolidate your expertise, but also high degree of accuracy of practice questions and answers about Microsoft Certification PL-400 Exam. It-Tests can guarantee you pass the Microsoft certification PL-400 exam with high score the even if you are the first time to participate in this exam.

Microsoft Power Platform Developer Sample Questions (Q231-Q236):

NEW QUESTION # 231

An organization has a Dynamics 365 Sales environment.

You need to create a Power Apps component.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Run the following `npm run build` command.

Run the `pac pcf init --namespace SampleNamespace --name ControlName --template field` command

Run the `pac solution init --publisher-name developer --publisher-prefix dev` command.

Run the `npm install` command.

Create a project folder.

Answer Area

Answer:

Explanation:

Actions

Run the following `npm run build` command.

Run the `pac pcf init --namespace SampleNamespace --name ControlName --template field` command

Run the `pac solution init --publisher-name developer --publisher-prefix dev` command.

Run the `npm install` command.

Create a project folder.

Answer Area

Run the `pac pcf init --namespace SampleNamespace --name ControlName --template field` command

Run the `npm install` command.

Run the following `npm run build` command.

Explanation

```
Run the pac pcf init --namespace  
SampleNamespace --name ControlName --  
template fieldcommand
```

```
Run the npm install command.
```

```
Run the following npm run build command.
```

Step 1: Run `pac pcf init -namespace ..`

This is the first command which creates basic folder structure of PCF control project.

Run the following command to create the control. The format of the control is:

`pac pcf init -namespace <specify your namespace here> -name <put component name here> -template
<component type>`

Step 2: Run the `npm install` command

Install Dependencies

Once 'init' sets up the basic folder, as a next step install all the PCF control dependencies using 'npm install' command.

Example:

```
C:\source\PCF\HelloWorld>npm install
npm WARN deprecated opn@6.0.0: The package has been renamed to 'open'
npm WARN pcfc-project@1.0.0 No repository field.
npm WARN pcfc-project@1.0.0 No license field.
npm WARN pcfc-project@1.0.0 SKIPPING OPTIONAL DEPENDENCY: fsevents@1.2.9 (node_modules\fsevents):
npm WARN pcfc-project@1.0.0 SKIPPING OPTIONAL DEPENDENCY: Unsupported platform for fsevents@1.2.9: wanted {"os":"darwin","arch":"any"} (current: {"os":"win32","arch":"x64"})
added 653 packages from 497 contributors and audited 10328 packages in 19.295s
found 0 vulnerabilities
```

Now at this point, there is nothing we have actually created. However, the solution created contains sample PCF control code.

Step 3: Run the following `npm run build` command

Build PCF Component.

Once you implement the PCF component, build the code for any syntax errors.

Syntax:

`npm run build`

```
pcfc-scripts build
[build] Initializing...
[build] Validating manifest...
[build] Validating control...
[build] Generating manifest types...
[build] Compiling and bundling control...
[Webpack stats]:
Hash: 7836f673449072fa8d61
Version: webpack 4.28.4
Time: 1153ms
Built at: 10/02/2019 5:54:08 PM
    Asset      Size  Chunks             Chunk Names
bundle.js  6.34 KiB          0  [emitted]  main
Entrypoint main = bundle.js
./HelloWorld/index.ts 2.34 KiB {main} [built]
[build] Generating build outputs...
[build] Succeeded
```

NEW QUESTION # 232

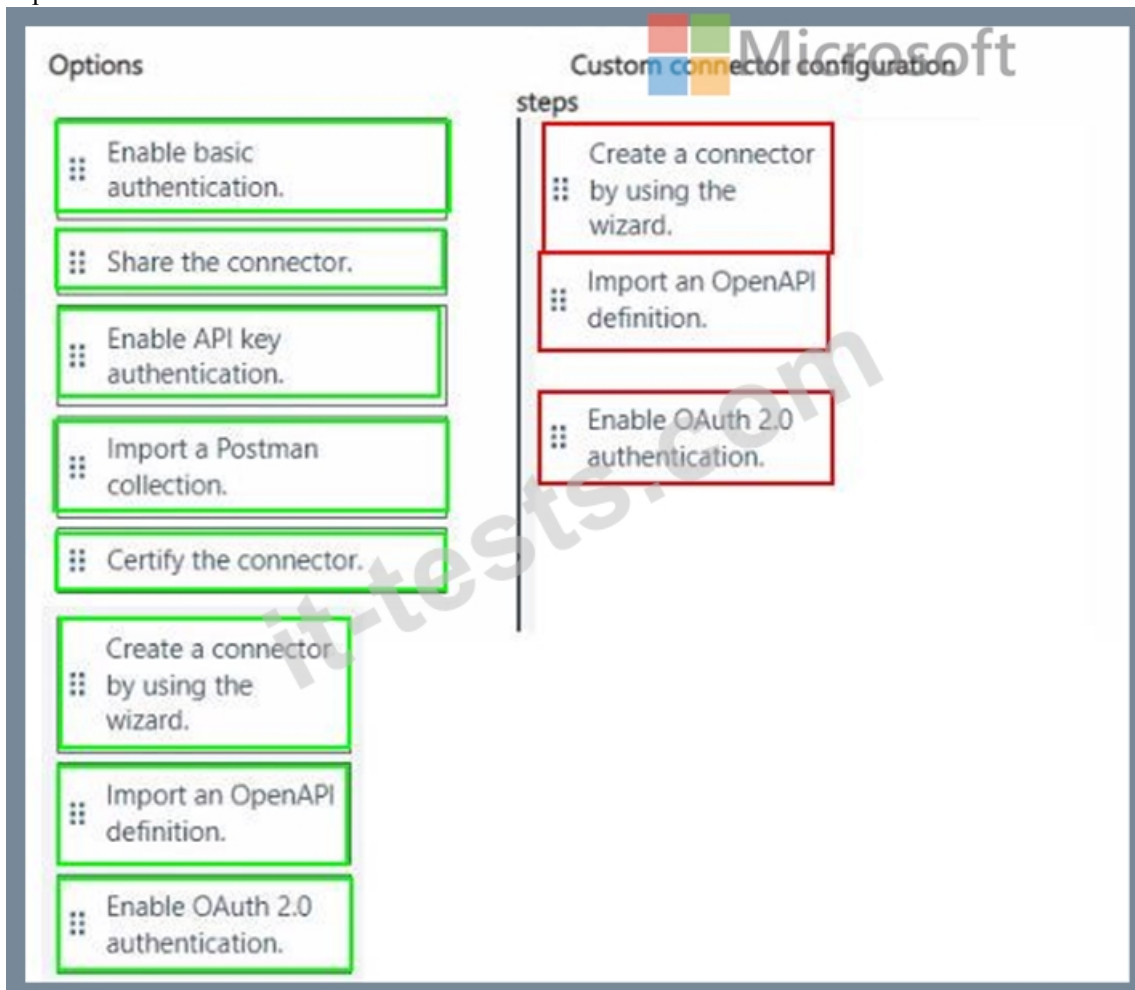

You need to configure a custom connector for the claim submission portal API.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION # 233

You need to configure a Power Automate flow to update account records by using the response from the Web API.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Add a condition step to check if the variable value equals 404.	
Add a terminate step and set the status to failed.	
Add a Dataverse update record step to update the Dataverse account record.	
Add an initialize variable step and set the value to the DataId from the Dataverse account record.	
Add an initialize variable step and set the value to the response code from the custom connector.	
Add a condition step to check if the variable value equals 200.	

Answer:

Explanation:

Actions	Answer Area
Add a condition step to check if the variable value equals 404.	
Add a terminate step and set the status to failed.	
Add a Dataverse update record step to update the Dataverse account record.	
Add an initialize variable step and set the value to the DataId from the Dataverse account record.	
Add an initialize variable step and set the value to the response code from the custom connector.	
Add a condition step to check if the variable value equals 200.	

Answer Area contents:

- Add an initialize variable step and set the value to the DataId from the Dataverse account record.
- Add an initialize variable step and set the value to the response code from the custom connector.
- Add a condition step to check if the variable value equals 200.

Explanation

Add a Dataverse update record step to update the Dataverse account record.	

Answer Area contents:

- Add an initialize variable step and set the value to the DataId from the Dataverse account record.
- Add an initialize variable step and set the value to the response code from the custom connector.
- Add a condition step to check if the variable value equals 200.

NEW QUESTION # 234

You are creating a flow using the Common Data Service (CDS) connector.

You need to select the appropriate triggers.

Which triggers should you use? To answer, drag the appropriate triggers to the correct scenarios. Each trigger may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Triggers	Answer Area	Trigger
Record creation	Scenario Choose accounts that are in the USA and send those account contacts an email. Contacts that have not been modified in 60 days should no longer be in the system. An area code has been mistyped in all records.	Trigger
Record selection		Trigger
Record deletion		Trigger
Record update		

Answer:

Explanation:

Triggers	Answer Area	Trigger
Record creation	Scenario Choose accounts that are in the USA and send those account contacts an email. Contacts that have not been modified in 60 days should no longer be in the system. An area code has been mistyped in all records.	Record selection
Record selection		Record deletion
Record deletion		Record update
Record update		

NEW QUESTION # 235

A company uses Dynamics 365 Sales.

You need to configure the customer lookup search for email activity in the canvas app.

How should you complete the expression? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

```

If (
  ( ThisItem.'Company Name' ), "",
  ( ThisItem.'Company Name', [@Accounts] ),
  "Account: " & ( ThisItem.'Company Name', [@Accounts] ).'Account Name',
  "Contact: " & ( ThisItem.'Company Name', [@Contacts] ).'Full Name'
)
  
```

Answer:

Explanation:

If ( (ThisItem.'Company Name'),  ,

 (ThisItem.'Company Name', [@Accounts]),

"Account: " &  (ThisItem.'Company Name', [@Accounts]).'Account Name',

"Contact: " &  (ThisItem.'Company Name', [@Contacts]).'Full Name'

)
