## 2025 Realistic Best C\_SEC\_2405 Vce Help You Pass C\_SEC\_2405 Easily

At the Lead1Pass, we strive to provide our customers with updated and real SAP C\_SEC\_2405 exam questions. We are committed to helping our students reach their goals and advance their careers through comprehensive, convenient, and cost-effective Prepare for your SAP Certified Associate - Security Administrator (C\_SEC\_2405) exam preparation material.

## SAP Certified Associate - Security Administrator Sample Questions (Q25-Q30):

### NEW QUESTION # 25

In the administration console of the Cloud Identity Services, which system property types can you add? Note: There are 2 correct answers to this question.

- A. Standard
- B. Internal
- C. Credential
- D. Default

**Answer: A,B**

Explanation:

In the administration console of Cloud Identity Services, system properties can be configured to enhance system integration and management. The two property types are:

\* Standard (A): These are predefined system properties provided by SAP. They help maintain consistent configurations across systems and streamline administrative tasks.

\* Internal (B): These properties are used internally by the system to manage configurations and processes specific to SAP Cloud Identity Services.

SAP Security References:

\* SAP Cloud Identity Services Documentation

\* SAP Help Portal: Administration Guide for Cloud Identity Services

### NEW QUESTION # 26

You are building a PFCG role for access to an SAP Fiori app on your SAP S/4HANA on-premise system.

After you enter the catalog in the role menu, an entry for an OData service is missing and you have to add it manually to the role menu. When you maintain authorization data in the PFCG role, why does SAP recommend that you NOT maintain the SRV\_NAME field value of the S\_SERVICE authorization object manually?

- A. Because the SRV\_NAME hash value for the front-end server component and back-end server component are different.
- B. Because the TADIR Service name for the back-end server component was automatically added to the role menu.
- C. Because the SRV\_NAME hash value for the front-end server component and back-end server component are the same.
- D. Because the TADIR Service name is the same for the front-end server component and the back-end server component.

**Answer: A**

### NEW QUESTION # 27

Which entities share data with Business Partners in the S/4HANA Business User Concept? Note: There are 2 correct answers to this question.

- A. Employer
- B. Administrator
- C. Employee
- D. User

**Answer: C,D**

Explanation:

In the S/4HANA Business User Concept, Business Partners share data with the following entities:

\* User (C):

\* Business users in S/4HANA are often linked to Business Partners to ensure seamless integration of data across HR and transactional modules.

\* Employee (D):

\* Employees are managed as Business Partners in S/4HANA, enabling integration with HR, organizational structures, and other master data.

Why Others Are Incorrect:

- \* Employer (A):Represents an organizational entity, not directly linked to Business Partners.
  - \* Administrator (B):Refers to system roles, not master data entities like Business Partners.
- SAP Security References:
- \* SAP Help Portal: Business Partner Integration in S/4HANA
  - \* SAP Note: Business Partner Concept and User Synchronization

#### NEW QUESTION # 28

You are evaluating startable applications. Which of the following can you use to check if there is an application start lock on an application contained in a PFCG role? Note: There are 2 correct answers to this question.

- **A. Transaction SUIM-Executable Transactions report**
- B. Transaction SM01\_CUS
- C. Transaction SM01\_DEV
- **D. Transaction SUIM - Transactions Executable with Profile report**

**Answer: A,D**

Explanation:

\* Context:Application start locks prevent certain transactions or applications from being executed. SUIM provides reporting functionalities to analyze these locks.

\* Solution Descriptions:

\* A. SUIM-Executable Transactions report:Identifies executable transactions linked to roles and checks for start locks.

\* D. SUIM - Transactions Executable with Profile report:Provides detailed insights into transactions executable via specific profiles, also highlighting start locks.

SAP Security References:

\* SAP SUIM Documentation

\* SAP Help Portal for Transaction Analysis

#### NEW QUESTION # 29

To connect to data sources that are NOT all based on OData, which of the following options does SAP recommend you use?

- **A. SAP Integration Suite**
- B. OData Provisioning service
- C. Cloud connector
- D. SAP Process Integration

**Answer: A**

Explanation:

For connecting to data sources that are not exclusively based on OData, SAP recommends using the SAP Integration Suite. This comprehensive platform supports a wide range of integration scenarios, including OData, REST, SOAP, and other protocols, making it ideal for connecting diverse data sources, whether on- premise or cloud-based. The SAP Integration Suite provides tools for data mapping, transformation, and orchestration, ensuring seamless and secure data exchange across heterogeneous systems. In contrast, the OData Provisioning service is specifically designed for OData-based integrations, limiting its applicability to non-OData sources. The Cloud connector facilitates secure connectivity between SAP BTP and on-premise systems but is not a complete integration solution. SAP Process Integration, while used for integration in older SAP landscapes, lacks the flexibility and cloud-native capabilities of the SAP Integration Suite. By leveraging the SAP Integration Suite, organizations can achieve robust, scalable, and secure integrations, aligning with SAP's modern integration strategy for complex, multi-protocol environments.

#### NEW QUESTION # 30

.....

Our C\_SEC\_2405 learning questions engage our working staff in understanding customers' diverse and evolving expectations and incorporate that understanding into our strategies, thus you can 100% trust our C\_SEC\_2405 exam engine. And our professional C\_SEC\_2405 Study Materials determine the high pass rate. According to the research statistics, we can confidently tell that 99% candidates after using our products have passed the C\_SEC\_2405 exam.
